Mr Cody Sampaokaew-Cork

RECOMMENDATIONS FROM YOUR CONSULTATION

****Medication Recommendations and Dosing Schedules****

****Vyvanse****

- ****Current Dose****: 50mg in the morning (between 7-9am)
- ****New Dose****: Increase to 70mg daily
- ****Effectiveness****: Previously lasted approximately 8 hours but currently not as effective

****Dexamphetamine****

- ****Current Use****: Afternoon top-up
- ****Alternative Regimen****: Consider switching to Dexamphetamine-only regimen if Vyvanse 70mg is not effective after one month trial
- ****Experimentation****: Try taking 3 Dexamphetamine tablets at once with half Clonidine on medication break days to assess effectiveness and duration

****Clonidine****

- ****Current Use****: One tablet at night to assist with sleep, occasionally two if struggling to fall asleep
- ****New Recommendation****:
 - Half tablet with morning Vyvanse
 - Another half tablet 4-5 hours later
 - Purpose: To augment ADHD medication effects and reduce physical side effects of stimulants

****Ural Sachets****

- ****Purpose****: To potentially extend the duration of Vyvanse effectiveness by altering blood pH
- ****Usage****: Mix sachet in water and drink with Vyvanse in the morning and possibly again throughout the day

****Additional Recommendations****

- ****Avoid****: Citric acid and B vitamins as they can reduce medication effectiveness
- ****Medication Breaks****:
 - One day per week or one weekend per month to manage tolerance
 - On break days, consider using half Clonidine with Dexamphetamine to manage symptoms

****General Advice****

- ****Monitoring****: Continue monitoring response to ADHD medication adjustments
- ****Follow-Up****: Book another appointment if the new regimen is not effective after one month

- ****Sleep Management****: Use Clonidine regularly to improve sleep quality and reduce racing thoughts

****Summary****

- Increase Vyvanse to 70mg daily
- Trial daytime Clonidine to augment effects
- Use Ural sachets to extend Vyvanse duration
- Consider switching to Dexamphetamine-only regimen if needed
- Experiment with Dexamphetamine and Clonidine on medication break days

Please follow these recommendations and reach out if you have any questions or need further assistance.

Kind regards,
Elite Focus Team
