Therapy Terms & Buzz Words

There's a lot of therapy terms that get thrown around I should at least know what some of these mean before even deciding to pull the trigger with someone.

- *'Holistic trauma informed strategies'*
- *'Somatic Embodiment'*
- *'Mindfulness based therapies'*
- *'Transpersonal Therapy'*
- *'ACT and CFT'*

Should try & find someone local

To also possible practise *talking* to someone about some of these things, it's probably better to find someone local to actually talk to in person

- Rhiannon King

“

Rhiannon King

Rhiannon King, Psychologist, Osborne Park, WA, 6017
psychologytoday.com

Notes

- By *far* one of the cheapest - but she also seems like should would be a good fit for the things you want to talk about
 - Covers all the bases for sex & sex identity concerns & ADHD
 - Also really like how she said it's like a collaborative method - where I bring the knowledge of the situation, & she brings the research & knowledge of how to work through it

- *This does harbour back to what Catie said - where something like how Rhiannon seems to have it setup might be the perfect way to do it.*

Info

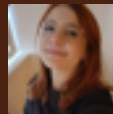

- **Osborne Park | Online & In Person**
 - Individual Session: \$90
-
