Audi-Oh! Meeting

Invited 1032244@student.sae.edu.au [Cody Cork](#)

Attachments [Audi-Oh! Meeting](#)

Meeting records [Transcript](#)

Summary

Cody Cork and Erin Colgrave confirmed that Project 1 is due in week seven, not week eight, and that Project 2 will not have a feedback round. Erin Colgrave will provide the unabridged version of "Book 1" to Cody Cork this Saturday, which needs to adhere to standard audiobook audio levels and format. They also discussed sound design, with Cody Cork planning to mix the prototype and unabridged version as benchmarks, and Erin Colgrave organizing sound libraries and planning to go sample shopping using resources like Soundly and Pixabay. They also discussed AI in content creation and its potential use for voice parts and graphic design, as well as the acquisition of new recording equipment by Erin Colgrave to improve recording clarity. The team discussed survey feedback for Project 1 using Survey Monkey, and Cody Cork proposed using a request form integrated with their Linear project management system for feedback. Erin Colgrave will work on the spotting sheet and record the unabridged version by Saturday, while Cody Cork aims to deliver the scene six mix and master by next week.

Details

- **Feedback and Project Timeline** Cody Cork initiated a discussion on the feedback procedure for the mix and master of the books. Erin Colgrave clarified that for Project 2, there wouldn't be a feedback round, unlike Project 1 which includes audience feedback. They confirmed Project 1 is due in week seven, not week eight, and that testing needs to be done before that ([00:01:10](#)).
- **Unabridged Version and Audio Format** Erin Colgrave will provide Cody Cork with the unabridged version of "Book 1" this Saturday, noting that it features a single

voice and scene. Cody Cork confirmed that the unabridged version still needs to adhere to standard audiobook audio levels and format ([00:01:10](#)).

- **Sound Design and Libraries** Cody Cork plans to mix and master the prototype (chapter six) and the unabridged version to set a benchmark for the team's sound design efforts. Erin Colgrave has set up a table with sound library links for each book and plans to go sample shopping ([00:02:11](#)). Cody Cork suggested using Soundly for sound effects, while Erin Colgrave mentioned Pixabay as another resource ([00:03:10](#)).
- **Sound Library Upload Challenges** Cody Cork noted difficulties uploading extensive cinematic sound libraries to Google Drive due to the sheer number of items. They plan to assess book overviews for relevant sound libraries to dump into the linked Google Drives. Erin Colgrave explained that the overviews are intended to provide an understanding of each book's overall aim ([00:04:21](#)).
- **Spotting List and Music Direction** Erin Colgrave will begin placing elements into a spotting list without time codes, simplifying the process for Cody Cork by identifying dialogue, foley, and ambience directly ([00:05:39](#)). They also discussed music for the books, with Erin Colgrave noting that Ben has created some music but hasn't seen the other two books, including a "dark fantasy" fairy tale ([00:06:32](#)). Cody Cork emphasized the importance of music that adds to the narrative without being distracting or overpowering ([00:08:44](#)).
- **AI in Content Creation** Erin Colgrave discussed the use of AI in content creation, sharing an experience where Co-Pilot found a story too dark and violent, while Cody Cork mentioned a "jailbroken ChatGPT" for less restricted storytelling ([00:07:25](#)). Erin Colgrave plans to replace a small voice part in the dramatized version with an AI-generated voice of an elderly male to test if listeners can discern AI voices in an upcoming survey ([00:30:27](#)). They also intend to compare human-created and AI-generated graphic design art for cover art ([00:33:02](#)).
- **Recording Equipment and Process** Erin Colgrave is acquiring new recording equipment, including desk stands, pop filters, and a Signature 12 desk to manage three microphones simultaneously with basic EQ, to improve recording clarity ([00:11:00](#)). They confirmed they can send dry recordings with basic EQ if preferred, which Cody Cork can then clean up and adjust reverb in Ableton ([00:12:06](#)).
- **Survey Feedback for Project 1** Erin Colgrave plans to conduct A/B testing using Survey Monkey to gather feedback on audio quality, character identification, and the impact of music and foley on the narrative ([00:14:09](#)) ([00:16:35](#)). Cody Cork

suggested questions regarding the devices listeners use and how they listen (e.g., actively or during other activities), noting that most audiobook listeners engage while commuting or doing chores ([00:15:21](#)) ([00:20:21](#)). They also discussed including questions about immersion and anything that might have disrupted the listener's experience ([00:17:54](#)).

- **Project Management and Communication** Cody Cork proposed using a request form for feedback instead of messages or meetings, integrating it with their Linear project management system for immediate task updates ([00:37:05](#)). Erin Colgrave expressed willingness to use this method for better organization and record-keeping, as they currently manage communications across various platforms like Facebook Messenger, Slack, Google, and email ([00:39:33](#)).
- **Deliverables and Next Steps** Erin Colgrave will work on the spotting sheet, record the unabridged version by Saturday, and send it to Cody Cork by Sunday ([00:28:11](#)). Cody Cork aims to deliver the scene six mix and master by next week, ahead of the week four deadline, to facilitate Erin Colgrave's A/B testing ([00:34:17](#)). They plan to check in again mid-next week, with Tuesday or Thursday being preferred days for meetings ([00:35:41](#)).

Suggested next steps

Erin Colgrave will get the unabridged version of the first novel and send it to Cody Cork this Saturday.

Erin Colgrave will go sample shopping over the weekend and will create and share a music library.

Erin Colgrave will do the recording on Saturday and send it to Cody Cork by Sunday. Cody Cork will provide an update or a check-in on the scene six deliverable by mid next week, aiming to get it by next week.

Cody Cork will look through the book overviews to find specific relevant sound libraries and dump them into the linked Google Drives.

Erin Colgrave will start working on placing the sound design elements into the spotting list without time codes and will work through the spotting sheet.

Cody Cork will try to swap Erin Colgrave's voice for an AI voice saying "The buses are delayed love, need a lift?" for an old, elderly male that is warm and casual.

Cody Cork will look into setting up a direct way for Erin Colgrave to pass on tasks without official communication, possibly through a request form or by adding her to the linear team.

The group will find and throw cool samples into the sound library.

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

Please provide feedback about using Gemini to take notes in a [short survey](#).

Audi-Oh! Meeting - Transcript

00:00:00

Cody Cork: So, say we do the mix and master and we add a couple things in uh how you would want to do the feedback for that.

Erin Colgrave: Uh what payback for your company?

Cody Cork: So I'm just thinking with the timeline um yeah in the sense of like say um book one you hand us the uh book one we do the mix and master and we like add a few things in um and then we pass it back to you being like hey cool mix is done we've added this and that in do we do like round of feedback where you go, "Cool, I like that, but maybe take this out, blah blah blah." Does that make sense? Like, um, do you reckon we're going to have time for that?

Erin Colgrave: Yeah. Yeah. Um yeah, but in saying that, I was talking to Tim this morning and there's no feedback

Cody Cork: In terms of because two weeks, right, per book or every two weeks we get a new book, right?

00:01:10

Cody Cork: Yeah.

Erin Colgrave: for the last for project two. It's just project one with audience feedback.

Cody Cork: brought. Okay.

Erin Colgrave: Um, but I'll I'll leave the dates as is because that helps with with you guys because you'll have stuff going on.

Cody Cork: Um, yeah, because it's due week eight, right?

Erin Colgrave: But if you need a little more time, there's room in there.

Cody Cork: Um, project one, is it week eight?

Erin Colgrave: Week seven. Week seven.

Cody Cork: Week seven. Right. Right.

Erin Colgrave: You need the testing in before that.

Cody Cork: Yeah.

Erin Colgrave: I'll get the um unabridged version for you this Saturday and I'll send it to you.

Cody Cork: Okay. Cool.

Erin Colgrave: Um but it's literally just one guy, one voice.

Cody Cork: What?

Erin Colgrave: So just make the voice look.

Cody Cork: Yeah.

Erin Colgrave: It's one scene, so that shouldn't be too much.

Cody Cork: Yeah. Cool. And they um still need to hit So the underbridge still needs to hit all the audio levels the same as um Yeah.

00:02:11

Erin Colgrave: Yeah.

Cody Cork: Cool.

Erin Colgrave: Yeah.

Cody Cork: All right.

Erin Colgrave: The standard audio book format.

Cody Cork: Yeah. All right. So, I think what because I've spoken to the guys um and they're keen to basically jump in with all of it. So, I'm thinking I might do the mix and master for um the cuz what what sent me before was like the prototype, right? Was like scene six.

Erin Colgrave: Yeah, it's just chapter six of the first novel.

Cody Cork: Yeah. Yeah. So, I might do the mixer master for that um and the unabridged. So, then they know kind of what to bounce off and we might see about um swapping and changing and then we can all jump in on sound design if need be.

Erin Colgrave: Yeah. Well, I've I've set up this table so it's got a sound library link to each book on each page.

Cody Cork: Yeah.

Erin Colgrave: Um, so if you just click on that sound library link, it will take you to the link. Um, I'm going to go Yeah, I'm going to go sample shopping over hopefully over the weekend when I get time.

00:03:10

Cody Cork: Yeah. Okay. Do it.

Erin Colgrave: Um, and then like if you guys find some cool samples or something that you think might be of interest, throw them in there.

Cody Cork: Yeah. Um, have you looked at Soundly before?

Erin Colgrave: You know, soundly

Cody Cork: Yeah. It's like a It's specific for like film audio and um that kind of that kind of vibe, but I'm pretty sure they do like a um like a free month or some s***. Um, and that's real good where you can literally just search up like type in whatever follow like footsteps or some s*** and you can select out of all the audio files the exact like amount of the audio you want and just drag it into like Ableton and s***.

Erin Colgrave: Yeah. Right.

Cody Cork: Yeah, that one's that one's a good one.

Erin Colgrave: Um, yeah, I've got a couple going now.

Cody Cork: That's helped me out a lot. Um, Yeah.

Erin Colgrave: There's family. Pix I was looking at Pixabay. Pixabay has got quite quite a bit of stuff on it, too.

00:04:21

Cody Cork: And I've got heaps of like cinematic sound sound libraries and s*** saved somewhere.

Erin Colgrave: Um, yeah, you sent me a sound library. Um, I was looking through some of the music of it, which I think will be good for book two, like the whole

Cody Cork: Yeah. I didn't even get to like actually uploading s*** cuz I I like selected a bunch of sample packs and sound libraries and was like, "Yeah, cool. I'll just like dump it into Google Drive." Um, and it's like uploading. It's like, "Oh yeah, uploading like 200,000 items is going to take like f***** like 24 weeks or some s***."

Erin Colgrave: Jesus.

Cody Cork: I was like, "Okay, maybe not." Um, but yeah, I'll have a look through the um like the book overviews and if I got any like specific um sound libraries that are um relevant, I might actually dump them in the um the linked Google drives and s***.

Erin Colgrave: Yeah. Yeah. Cool. Cool. So that's that's why I've put in the overview so you kind of get an understanding of the over like of the overall book and what we're trying to achieve.

00:05:39

Erin Colgrave: But what I try to do is um I'll start working on just placing this stuff into this spotting list like without the time codes.

Cody Cork: Yeah. Yeah.

Erin Colgrave: I'll just that way you won't have to go through all the adapted scripts because you probably really don't need to know what they say. I mean, you can have it if you want to, but this will probably be easier from your point of view to like have a look go, yep, this is dialogue, this is foley, this is ambience, you know what I mean? Um, yeah, on the notes I'll basically put in what's needed for that sound clip, like whether it need to be like music, tension, strings, fight scene, or whatever.

Cody Cork: Yeah. Yeah.

Erin Colgrave: You know what I mean? I can put that notes in there so you kind of know it can kind of give you guys a guide of what to look for.

Cody Cork: Yeah.

Erin Colgrave: Um, if you wanted to look or the overall feel of that particular moment in the scene.

00:06:32

Cody Cork: Yeah.

Erin Colgrave: Yeah. And I'll do it that way.

Cody Cork: Cool. Cool. And Ben's done a bunch of the music for the books.

Erin Colgrave: And then as Yeah, he has.

Cody Cork: So done.

Erin Colgrave: I'm catching up with him tomorrow. I haven't seen any of it. He gave me two ambient guitar things, but he he said that he's done a bit more. Um, but he also hasn't seen the other two books. So, like the fantasy fairy tale as we're going through it like which fantas you know like the Hobbit type thing, but it's actually quite dark and morbid.

Cody Cork: Cool.

Erin Colgrave: So, it's like a dark fantasy which is way cooler.

Cody Cork: Yeah. Yeah. Yeah. f*** yeah.

Erin Colgrave: So, um, yeah, like it was it was quite interesting to go through each book like breaking it down and stuff like it took took us so long to do. We've been working on it for weeks. I mean like weeks um and trying to find the right design and stuff that we felt um there was one section I put into co-pilot to see what it would give me and it basically said it was too

00:07:25

Cody Cork: Yeah.

Erin Colgrave: dark and too violent that we that they weren't able to do it. However, they can tone it down and give me some examples off that.

Cody Cork: Oh, G. Yeah, dude.

Erin Colgrave: So for fun I turned it down toned it down and it was s*** as f***** writing. It was so funny.

Cody Cork: They're so like I managed to find um they call it like a jailbroken chat GBT cuz chat GBT does the same where it's like oh no that breaks f***** some terms of service or whatever but I've managed to find one where it's like um completely like offthe-wall. we can it'll talk about whatever um in terms of like story narration and stuff. Um if you want I can find it and link it to you if you want.

Erin Colgrave: Yeah.

Cody Cork: Um because yeah I've tried Yeah.

Erin Colgrave: Yeah. God, I was cracking up at it. Like I was like, I wonder what it would do. And I was like, no, this is like, you know, it says like, you know, stab like knife going through the chest and and flesh and it did not like it.

00:08:44

Cody Cork: And it's like Yeah. It's like It's like No, he poked him and sparkles came out. It's like no, bro. That's That's s***.

Erin Colgrave: Like they rummaged. No. Yes.

Cody Cork: All right. Dope. Um cuz what are we We're two now, right? Okay. So, yeah, we've got little bit of time.

Erin Colgrave: Yeah.

Cody Cork: Um, yeah, cuz let me know about the music, Vince music, cuz I feel like that's off the top of my head, I feel like would possibly be the maybe most difficult to kind of like get like perfect in the sense of um where it like adds to the narrative and stuff without actually like being too obvious or evident or like take takes taking people out of the story. Do you know what I mean? Where it's got to be like saying like just ambient guitar stuff.

Erin Colgrave: Yeah, I mean he's kind of jumped the gun and he's just created a whole bunch of stuff, but he hasn't actually seen the books, so it could all really it it feels like as long as the feeling of

00:09:58

Cody Cork: I feel like it'll be good. Um it'll fit well. It's just Yeah. Just off the top of my head.

Erin Colgrave: it right it would be good to fill in the gaps.

Cody Cork: Yeah.

Erin Colgrave: Um, I'll create a library just on music and um, I'll share that cuz it might be better to fit in somewhere like I mean we we can do our best to, you know, try fill it all but there

Cody Cork: Yeah.

Erin Colgrave: might be spots where we just come hasn't haven't come up with an idea kind of thing or Yeah.

Cody Cork: Yeah. But I feel like you can kind of fill those gaps with um like Atmos and ambience where it's like like drones and stuff where it has the the tone and kind of like carries the tone without actually being anything um overpowering or like musical in a sense.

Erin Colgrave: Yeah. Even it's like um like sound waves even like you know how you can like mix um frequencies and it gives that little hum to it.

Cody Cork: Yeah.

00:11:00

Erin Colgrave: Yeah. So, but yeah, also I've been trying to had to go out and get some new equipment. Um, but I'm setting all this tomorrow with Oh, just a couple of like desk stands and pop filters and stuff just cuz yeah, I'm recording it here.

Cody Cork: Oh, really? Oh, yeah.

Erin Colgrave: So, it's obviously it's treated as best I can treat, but obviously I'm not like a acoustic treatment person. So, um yeah, let's just get a bit more clarity in it.

Cody Cork: Yeah. Yeah.

Erin Colgrave: And um we're going to try out this um signature 12 desk that way we can throw all three microphones in, EQ at once.

Cody Cork: Yeah. Okay.

Erin Colgrave: Like, so you'll have a basic EQ before it even hits the door.

Cody Cork: Yeah. Yeah. We can kind of like set a few things and just forget about it.

Erin Colgrave: Yeah. Like a bit of reverb and s*** or Yeah. just to make it like sound okay prior to production. And like it's got the like digital meter so I can actually see where it's sitting rather than that focus, right?

00:12:06

Erin Colgrave: Which is just three colors and you can't really tell where it's sitting. So um yeah, so hopefully it should give out a decent recording to begin with. Um I mean, if it's easier not to put reverb on it and just give it to you dry, I can with like a basic EQ.

Cody Cork: Yeah. I mean, worst case scenario, if it had even has if it has like a little bit of like room tone or reverb or whatever, I can usually clean it up in RX pretty easy.

Erin Colgrave: Yeah.

Cody Cork: Um, I'll leave that up to you because like, um, I think that that'll be more of a stylistic choice as you're kind of putting stuff in. Um, so I'm assuming you probably send me the uh Ableton project. Are you Are you doing it in Ableton or Logic?

Erin Colgrave: Yeah. Uh I was done.

Cody Cork: Okay, cool. Yeah, cuz I'm assuming you probably send me the um Yeah, I'm assuming you probably send me the Ableton project. So, if I need to like adjust the reverb, I can just do it in that.

00:13:12

Erin Colgrave: Yeah.

Cody Cork: That'll be a good way to kind of like gauge what stylistic direction you want for the dialogue and the vocals and stuff.

Erin Colgrave: Yeah. Yeah. Like I said, like the notes section, I I'll put in like where it needs to be and how it needs to be kind of thing. Um, like that's what I mean is realistically this is all about transferring it from the script to here because I've kind of done it all in the script and the reason why we did it in the script is

Cody Cork: Yeah.

Erin Colgrave: so like the voice actors actually understand what's going on.

Cody Cork: Yeah. Yeah.

Erin Colgrave: Like we've given them sound cues and stuff like that like how they should be speaking and yeah it's got gone out of control but in a in a good way.

Cody Cork: Yeah. Yeah. Yeah. Kind of like a movie script pretty much.

Erin Colgrave: Yeah, pretty much. And it's got director's notes for a scene and stuff like that. So, I can put director notes in it as well.

00:14:09

Cody Cork: f*** yeah.

Erin Colgrave: Um, M actually yeah if you want to come up with a couple of questions about the audio that I

Cody Cork: Sweet. Is there anything you need from us for your um like project one feedback like

Erin Colgrave: can put into a survey. I mean I don't mind do it but if you like if there's something in specific you guys want to like have feedback on like if the you know if the volumes were too loud or like the balance in itself or um was there anything distracting about it or anything like that?

Cody Cork: as in like um we give you initial feedback from what you give us.

Erin Colgrave: Um,

Cody Cork: like you give us the um uh like premaster audio book and then we give you feedback where it's like yeah cool um like give you feedback on that as well or do you want us to give you

Erin Colgrave: no, no, no. um for the for the um it's it's more to help you guys out like cuz so I'm basically running AB testing out a focus group right so in the AB testing I'm using survey monkey to create surveys of

00:15:21

Cody Cork: Yeah. Okay.

Erin Colgrave: like questions that will basically gauge our performances in our each individual like sections like you like you know something that really startled them um and like threw them off track.

Cody Cork: Yeah. Yeah. Okay. Yeah. So, if you have any Yeah. So, any like Yeah. Any directed directed questions for survey?

Erin Colgrave: Yeah, just like audio directed questions for the general person um and I'll throw them into um the survey and then I'll give you that feedback on what they said in those in those questions and the overall production of

Cody Cork: Yeah. Yeah. Okay. Cool. Yeah. Yeah. Yeah.

Erin Colgrave: it. Um, yeah, I discussed

Cody Cork: The only one that I'm thinking would be a good one, like off the top of my head, is to probably get a list of um uh like what do they listen on? Was it like headphones like studio headphones?

Erin Colgrave: that with Tim this morning. Yeah. So, what device did you listen to it on?

00:16:35

Erin Colgrave: Um, to change the I was going to put like um age or gender is like um
Cody Cork: Yeah. So that'll be that'll be interesting to gauge like um what most people actually Yeah.

Erin Colgrave: like don't have to answer the question if you don't want to kind of thing. But like I want to put in um stuff about the voice actors. Do they talk too fast? Did they talk too slow? um you know you identify the characters and that would be an audio as well like and then with the audio stuff like you know um what they liked about on a bridge verse bridge like is it too distracting to have characters um are you know is it foley and background noise too or not enough um h how did it assist your imagery of the story line and stuff like Hello.

Cody Cork: Yeah, cuz the only other one as well was um so like YouTubers do this all the time where like like you know how you're talking about where you're trying to uh simulate something that's like in someone's head.

00:17:54

Cody Cork: um where like YouTubers do all the time where they use a a certain type of reverb like a a plate reverb or something, but it's like super tiny and you can hear it like like echo out and it literally just it grinds my gears and takes me out of the experience.

Erin Colgrave: It sounds like Yeah, it grind me too.

Cody Cork: Sorry. But it's like Yeah. Um, but just like anything that might have had that effect where it's like, did anything actually take you out of the immersion? Like, oh, there was, you know, a car crash and there was an explosion sound effect, but it was like way too hectic or something.

Erin Colgrave: Yeah. Not throw them off.

Cody Cork: Yeah.

Erin Colgrave: Yeah.

Cody Cork: So, I guess it's also like gauging like the importance of that, right? where if you think about it like if you're sitting down and like critically listening to like the audio book then something like that would be like yeah like took me out of the like immersion of the story but

00:18:51

Erin Colgrave: Mhm.

Cody Cork: like you were saying like most use cases are people like listening while they're like you know doing the washing or some s***.

Erin Colgrave: It might have just been too long. like mix too loud that certain bit. You know what I mean? And then we know turn that stuff down because it distracts narrative cuz like what the way you submit it like that's an overall sound.

Cody Cork: Yeah. Yeah.

Erin Colgrave: But like if we have like everything really really quiet then all of a sudden there's a massive you know it's going to startle someone. Um so you got to watch out for that kind of watch out for that because that can cause issues and it can throw people off and stuff like that.

Cody Cork: Yeah.

Erin Colgrave: And that's the stuff we'll be asking about like if anything's jumped out or was it too soft? Could you hear everything like um you know was the music too distracting from the narrative and stuff like that?

Cody Cork: Yeah. I guess

Erin Colgrave: Like um

00:20:21

Cody Cork: Yeah, I guess another thing to jump off um like what device they listen to is like how they listen to it in the sense of like did you literally just sit down in a chair and listen to the whole Thanks.

Erin Colgrave: Yeah, something went weird. You know what I'm saying?

Cody Cork: Um, what what did you catch there?

Erin Colgrave: I just the very start of it.

Cody Cork: Um yeah, to jump off like um like what device they listen to um maybe have like a second question like how they listen to it like do they sit down and just listen to the audio book or were they doing stuff in the background because yeah I feel like that would inform the experience a little bit.

Erin Colgrave: Yeah.

Cody Cork: Um yeah.

Erin Colgrave: Yeah. Well, in my research said that a lot of people listen to it while commuting, um while doing household chores, going shopping, like they're rarely sitting down, which is why it's one of the main reasons like people listen to audio books because most of the narrations are s*** and monitoring.

00:21:43

Cody Cork: Yeah.

Erin Colgrave: Um and you know, people can't really like some will talk too fast, others will talk too slow.

Cody Cork: Yeah.

Erin Colgrave: Like so like what my partner Trista was saying this morning she listens to it like some narrations where like they emphasize certain syllables and it pisses them off like there's this one narration where emphasizing a K every time

Cody Cork: Yeah. Yeah. Yeah.

Erin Colgrave: he said it you know and he walked through the door and kicked it like you know she she drove her mad. Um like little stuff like that. Um, but they listen to it because they're busy. You know what I mean?

Cody Cork: Yeah. Yeah.

Erin Colgrave: They're writing and they're doing stuff. They don't have time to sit down and physically read a book. And that's what most people are saying. It's like, you know, and that's why book sales are still quite high, like hardback book sales, is because people actually enjoy reading. It's just more about the time frame.

Cody Cork: Yeah.

00:22:41

Cody Cork: Yeah. Yeah. And if you get like a like a I don't know feedback being like, "Oh, it wasn't um like it could use more intense sounds or something, but then they literally just yeah sat down in a chair and listened to the audio audio book straight for an hour and a half doing nothing." It's like, "Okay, well maybe that doesn't do you know what I mean?" Where it's like Okay.

Erin Colgrave: Yeah, but there could be like if you sat down Yeah. there could be a secondary question of why because another reason that people listen to audio books is like they have learning disabilities like my partner for example, she is like she's massively dyslexic, right? She's got a law degree, but um what she found with studying is that like she used different colored pieces of paper. Somehow that actually helped her brain realize what she's reading. Um but she loves to read and she has a Kindle and sometimes she will sit there and she'll read on a Kindle.

Cody Cork: Yeah.

Erin Colgrave: Um but she listens to audio books for the fact that she doesn't have to read it.

00:23:55

Cody Cork: Yeah. Yeah.

Erin Colgrave: You know what I mean?

Cody Cork: Because it's like a strain on the brain, especially if you're Yeah.

Erin Colgrave: you can just do it and and she'll have like she puts audio books in her ears when she's going to sleep um when she's driving, when she's doing like the when she's like, you know, in general household chores. Like she absolutely loves books, but she does not also does not have the time.

Cody Cork: stress at all.

Erin Colgrave: So she has two different reasons why she listens to them.

Cody Cork: Yeah.

Erin Colgrave: But yeah, there you are.

Cody Cork: Um, and one last question for me. I remember you mentioning was it The Hobbit as a good like reference. Um, is uh Oh, I think I downloaded Lord of the Rings. Um, was it The Hobbit that you mentioned? Yeah. Um, do you have one for the murder mystery? Cuz I downloaded a bunch of Karen Slaughter books. I know. Apparently, she's hell good. So, um, I'm just going to give those a listen to see if there's anything that like would be a good reference.

00:24:54

Erin Colgrave: That would be I tell you what, I'll ask Trista when she comes home from picking up the kids cuz like I said, she's got a massive library of audio books and she'll be able to find she'll find some for you.

Cody Cork: otherwise. Yeah. Yeah. Even if it was just one where it's like oh the Yeah. Like it really um had a good atmosphere or something like cool. That' be a good frame of reference for to work off.

Erin Colgrave: Yeah. Yeah. I'll find some for you for sure. Oh, forgot to ask at the start. I should have asked at the start. Did you um put that transcript on for those?

Cody Cork: Uh yeah. Yeah, I think I missed the the very start um because I didn't turn it on, but it's been transcribing um the most of it. I think I just missed the very start of the meeting.

Erin Colgrave: Yeah. No, no. Cool. Um because I download I did actually and it helps me put them into a folder so if I need to go back to anything of what we discussed I can find it.

00:26:01

Cody Cork: Yeah. Do do you find that helpful? Yeah.

Erin Colgrave: Um and I ended up doing it with Tim this morning and I sent him the transcript.

Cody Cork: Yeah. Yeah. Cuz do you did you use Google Meet as well?

Erin Colgrave: No, we're just on Zoom. But I found this No. Well, not that I know of, but I found this app on my phone and it just like um f*** summary AI and you just basic put it up to something, press the like record

Cody Cork: Or does Zoom do it? Oh yeah.

Erin Colgrave: button and it transcribes it for you and summarizes it for you and you just send it to your Mac like Yeah.

Cody Cork: Oh.

Erin Colgrave: So you can use it for like so if you're face to face having a chat just press it chat like you know so

Cody Cork: Yeah. Yeah. because I tried a bunch of different ones um for like in-person meetings um and like one company was like, "Yeah, cool. We'll send you like a discount code for like a student discount or whatever." And

00:27:12

Cody Cork: it like looks super flash and s***. And then when it like pumped out the notes, it was just like one giant paragraph like an a half meeting. So I'm like, I can't even read that. like, oh, like why did I Oh, that's dope.

Erin Colgrave: Yeah, like it it does it is a free one, but it does say like speaker A and speaker B. Yeah, but then it gives you an actual summary like Yeah.

Cody Cork: Yeah. Oh, yeah. Yeah. Cuz I paid five bucks for literally a wall of text and I'm like, that's f***** stupid.

Erin Colgrave: Now this this one this one is absolutely free called summary AI. So it shows you if you can see it shows you the meetings and then like yes this one says summary at the top it says summary transcript and chat.

Cody Cork: Yeah. Yeah. Oh, yeah. Yeah.

Erin Colgrave: So you can like that's the summary and then you can flick it to the transcript and it will actually give you the whole and then you just press the share button up top.

00:28:11

Cody Cork: Yeah. It's got the full. Yeah, that's it. Easy peasy.

Erin Colgrave: Hey, give me two seconds.

Cody Cork: Yeah. Anything?

Erin Colgrave: Okay. Just going to go pick up the kids and then take one of them to jiu-jitsu. So yeah, she's just I think so.

Cody Cork: Oh, nice. All right. Well, yeah. Does that cover everything, you think? Was there anything else you want to we need to go over?

Erin Colgrave: Um I'll work through this spotting sheet. Um I'll do the recording on Saturday and send it to you.

Cody Cork: Yeah.

Erin Colgrave: Um yeah. Can Have you gone into the sheet? Have you seen it?

Cody Cork: Yeah. I'm in it now.

Erin Colgrave: Yeah. So you see the tabs at the bottom there. So like I just thought it' be easy it wouldn't get so mixed up there.

Cody Cork: Yeah. Yeah. Yeah. Um Yeah.

Erin Colgrave: Um that's it will be a different color.

00:29:12

Cody Cork: Yeah, cuz we had one another spreadsheet like a resource audit one that was like everything for it in one spreadsheet and it was like yeah it was a bit overwhelming looking at like three 400 items

Erin Colgrave: So, you know, you're only working that chapter. Um, yeah. I just thought this way it might be a bit more easier to read and you could focus on a bit more.

Cody Cork: Yeah. So, um, when did you say you wanted you were getting the a bridged version for Yeah.

Erin Colgrave: Saturday, I'll get him recorded at Saturday. So, hopefully I'll send it to you Sunday by Sunday.

Cody Cork: And that's just scene six again, right? For the AB testing.

Erin Colgrave: Yeah.

Cody Cork: Cool. Do it.

Erin Colgrave: Yeah. And then we'll just do AB testing on that. But uh while I've got you in the dramatized one, there's one little tiny voice that I did that says um hey love need a lift or something is a driver.

Cody Cork: Yeah.

Erin Colgrave: Is there any chance that you could swap that out for an AI saying the same thing?

00:30:27

Cody Cork: Uh, maybe I can give it a go. Was it? Hey, love.

Erin Colgrave: It's the only thing the driver says in the um I think it's hey love need a lift or something.

Cody Cork: driver. Okay. It's like hey love something something.

Erin Colgrave: Um hang on I'll find it in the script.

Cody Cork: Okay. And uh like what kind of voice did you want for it?

Erin Colgrave: the buses at delayed love need a lift.

Cody Cork: Love it. Lift. Cool. And what kind of voice did you want for it?

Erin Colgrave: Uh an old elderly guy like warm and casual.

Cody Cork: Yeah.

Erin Colgrave: Yeah. So he's just a pass by and rocks like comes up to us.

Cody Cork: Warm casual. Yeah, cool.

Erin Colgrave: Yeah, cuz she's staying at a bus stop and she like the buses are delayed.

Cody Cork: Cuz Yeah. Um, right.

Erin Colgrave: Love need a lift.

Cody Cork: Cool.

Erin Colgrave: Um because I want to put in like a because there's this big controversy about whether using AI or real voice actors at the moment in the industry.

00:31:38

Cody Cork: Cool.

Erin Colgrave: Um so I just want to throw a like but obviously there's a major part um but something as small as that and I want to put the question on the um survey saying do you um AI was used

Cody Cork: something. Yeah.

Erin Colgrave: in this production if if so when and where or what part kind of thing um just to see if they can actually tell and that will also gauge us on our audio production as well.

Cody Cork: Yeah.

Erin Colgrave: Like if it was like 100% yes, there's a AI this person, it's like, okay, well, maybe we're not, you know what I mean?

Cody Cork: Yeah, maybe could have. Yeah. Yeah, I get you.

Erin Colgrave: um just because there's a there's a big ha about at the moment like um audible will not accept AI voices whereas Apple is releasing books voices at the moment and so what students have used AI or voice

Cody Cork: Yeah. Yeah. where it's like bully AI red.

Erin Colgrave: actors you know um do people mind listening to AI like do they know it's AI um you know do they not like it because there's AI like that kind of question.

00:33:02

Cody Cork: Yeah.

Erin Colgrave: Yeah. So, I wanted to put that in and I'm going to do the same thing with the um graphic design art. Um with the first one, I'm just going to like get someone to do it and then like um AI generate a similar picture.

Cody Cork: Yeah. Have you looked at Sora? It's like open.

Erin Colgrave: Yeah.

Cody Cork: Yeah, that one I find is like I don't know the easiest to use but also actually can pump out like some pretty f***** insane images.

Erin Colgrave: Yeah. Yeah. I did um last last try I had to create a song and um we need to upload it to Soundcloud so we needed some cover art for it and I used Sor that and it gave me a pretty good picture.

Cody Cork: Yeah.

Erin Colgrave: Yeah.

Cody Cork: All right. So, um yeah, I think that covers everything off the top of my head. Um, when did you want to touch base again? Um, even if it's just for like a a check-in.

00:34:17

Cody Cork: Um, cuz you need the scene six um delivered by week four.

Erin Colgrave: Yeah. To get some.

Cody Cork: Week four, the latest, right? Cool. Um, yeah. because I'm gonna aim to because that one's like actual like clear deliverable.

Erin Colgrave: Yeah.

Cody Cork: So, I'm gonna aim to try and get it by next week. Um cuz everything else that I need to do is kind of just like a oh like this kind of thing maybe where this is like actual um and yeah, just kind of get ahead of everything. Um so yeah is there any I guess yeah the earlier that I can pass it on the earlier you can kind of get your um feedback AB testing

Erin Colgrave: I'll give you understand what the actual books are about the difference between them.

Cody Cork: sust Um, was that just on Slack like the SA uh jobs board or something?

Erin Colgrave: Yeah, Tim found me a graphic designer, so they should be reaching out to me and hopefully they'll need the thumbnail as well. He's found three people that I think he's thrown it on the graphics, the graphic design and he's had about three people interested in it.

00:35:41

Cody Cork: Oh, channel or something. Yeah.

Erin Colgrave: So, he's just going to get them to contact me via Slack.

Cody Cork: Okay, that's cool.

Erin Colgrave: Um, and hopefully they can punch one out pretty quickly.

Cody Cork: All right. Um, I'm going to I'll give you an update, but let's just say next week, like mid next week, I'll probably aim to um have either something like delivered or just a check in to kind of like um see where that deliverable is at.

Erin Colgrave: Yeah, the only only day I'm not free is Wednesday afternoon because I have an online but Yeah.

Cody Cork: Um yeah, so I think we do um most of our meetings on Wednesday now, like with Matt and stuff. Um but yeah, so yeah, either Tuesday, Thursday, I think. Um I'll aim to have either Yeah. a deliverable or like just a checkin.

Erin Colgrave: Yeah. Yeah. Just um let me know. Um I'll get you that unabridged version hopefully Sunday, latest Monday.

Cody Cork: Yeah. Yeah.

Erin Colgrave: Um yeah, there shouldn't be much to it.

00:37:05

Erin Colgrave: If we can we can EQ it through here and get a decent sound through here. Um should just be more about leveling and file size.

Cody Cork: Yeah. Oh, actually, one thing, and I don't I don't even know if I'm going to do this, but it'd be good to get your opinion. Um so you know how I was saying that we use linear for like our project like management.

Erin Colgrave: Yeah.

Cody Cork: Um so they don't do like a public facing thing. You have to like be part of like the software or like the team or some s***. Um, but um I think I found a way to do like a um like a request form. So say that um I pass on like the the mixing master, right? And you go, "Oh s***, I've listened to it, but it's actually a little bit too low." So instead of like sending me a message or um organizing a meeting, you can just literally punch it into like this form and then it immediately gets me it updates in our project that like oh cool you need to fix this issue.

00:38:22

Cody Cork: Do would you find that easier than just like say organizing a meeting or sending me a message or whatever?

Erin Colgrave: Um, yeah. Well, it's a live document, isn't it? So, like I'll probably flick you a message saying check document, but document or whatever, but um yeah, cuz I I can get to that page. I can view it. I can get to all the Google drives. Just the stuff that's saved on that linear project. I can't access Open.

Cody Cork: Yeah. Um, yeah. So, I'm just trying to think whether it's actually Yeah, I'm just trying to think whether it's um like worth the the time to set up in the sense of like um having a direct way to like pass on a like task from your end without having to like um like officially communicate.

Erin Colgrave: Yeah.

Cody Cork: So, I feel like sometimes that can get lost in translation, especially if we've got like all these projects going on where it's like you can just Yeah.

Erin Colgrave: Yeah. Yeah.

00:39:33

Erin Colgrave: Yeah.

Cody Cork: legit send me a to-do and it's like, oh, cool.

Erin Colgrave: I'm more than happy to do it that way. Then it's all recorded in there, too.

Cody Cork: All right, cool.

Erin Colgrave: Like, and it's all in the one spot. So, at the moment, I've got this sheet going on. Um, that's just kind of like diary entries, but it's got the date, who was involved, the communication, method, the topic, summary, changes, actions, responsibilities, new buy, and resources and references.

Cody Cork: Okay.

Erin Colgrave: Um, which is good for me, but like Yeah.

Cody Cork: Yeah, sometimes it's good just to have everyone involved be able to see what needs to be done and s***.

Erin Colgrave: Yeah. like at the moment I'm working through let's see what we've got here um Facebook Messenger, face to face, Slack, Google, email um yeah

Cody Cork: It's like Yeah. Yeah. It gets messy. Like everything's like, "Oh, if you want to be using our thing, you have to pay like per seat now." It's like the thing that everyone's doing.

00:40:40

Cody Cork: It's like f***, man. It's like, oh, \$12 per seat or per person. It's like f*** that.

Erin Colgrave: Yeah, that's the way. Yeah, that's what I mean. So, every time like this is now current. It took me a while to figure it out, but now that it's current, whenever I do something or I get a message or I get a phone call or whatever, I'll punch it into this so I've got a timeline and what and I can always reference it back. But it's more from my personal like, you know, when did I do this or when did we have that conversation? Oh s***, what did we talk?

Cody Cork: Yeah.

Erin Colgrave: What do you want? Like, you know what I mean?

Cody Cork: Mhm.

Erin Colgrave: Like, but yeah.

Cody Cork: Yeah. All right. Yeah, I'll look into that and see see how it goes. If not, I might be able to just add you to the linear team maybe. I don't know. You get like a few free members and then after that you have to like actually pay.

Erin Colgrave: Yeah.

Cody Cork: f*** that. Um yeah.

Erin Colgrave: Let me know how you go.

Cody Cork: Yeah.

Erin Colgrave: if it's otherwise. Yeah.

Cody Cork: All right. Easy. Um, cool, cool, cool.

Erin Colgrave: Cool. Yeah. But if you can Yeah.

Cody Cork: Keep I'll keep in contact.

Erin Colgrave: If you can throw that AI in, that'll be great.

Cody Cork: Yeah. Yeah. I don't think I don't think it should be a problem.

Erin Colgrave: Yeah. Just an old elderly male that's warm and casual emotionally cuz she's standing at a he rolls up and he goes, "The buses are delayed.

Cody Cork: Yeah. Cool. Uh, easy.
