Meeting Sep 24, 2025 at 10:48 AWST

Meeting records [Transcript](#)

Summary

Cody Cork and Nicholas Miller discussed various project updates, including delayed filming days, the collaborative editing process with Elliot, and the need for a project title and asset list for gun sounds and music. They also explored technical challenges like learning Wwise and overcoming PC hardware issues, with Riley Lyons also sharing similar experiences. Nicholas Miller and Cody Cork discussed various project updates, including delayed filming days for a project, collaborative editing with Elliot, and the need for a project title and asset list for gun sounds and music, with Nicholas Miller aiming to create demo tracks based on "Unreal Tournament" to elicit specific feedback from the game team. Nicholas Miller shared their frustration with the other game group's secretive nature and the lack of concept art needed for sound design, while Cody Cork mentioned using Google AI Studio for transcribing meetings. They also discussed technical challenges such as the game being PC-only, the need for Cody Cork to learn Wwise for audio implementation on Windows, and Nicholas Miller's PC performance issues, which Riley Lyons also experienced with Ableton crashing. Nicholas Miller plans to be on campus on Thursday around 10:30 AM to assist Elliot with editing and suggested that they and Cody Cork could work on project-related tasks.

Details

- **Scheduling and Filming Updates** Cody Cork and Nicholas Miller discussed their recent activities, including Nicholas Miller helping with a mate's event promo and Cody Cork's struggles with their sleep schedule ([00:00:00](#)). They also

touched on the delayed filming days for a project, with beach days pushed back and filming at Dean's place uncertain. Cody Cork mentioned not hearing from Harry since the date changes, while Nicholas Miller had been in contact with Elliot, the assistant director and editor ([00:02:12](#)).

- **Editing Process and Audio Feedback** Nicholas Miller described their collaborative editing process with Elliot, where they provide feedback from an audience perspective and discuss audio choices for each scene ([00:03:23](#)). They aim to integrate dialogue next week but are waiting for others to get their materials together before full production. Nicholas Miller emphasized the need for a project title and asset list for gun sounds and music ([00:04:32](#)) ([00:06:37](#)).
- **Game Group Secrecy and Music Direction** Cody Cork noted the other game group's secretive nature, particularly regarding their Discord channels, where only an audio channel is accessible, preventing them from seeing other project developments. Nicholas Miller expressed frustration about the lack of concept art and specific gun details needed to start sound design ([00:05:27](#)).
- **Music and Atmosphere for Games** Nicholas Miller stated their intention to prioritize gun sounds and music, as these are critical for the game's atmosphere ([00:06:37](#)). They plan to create drafts based on desired music styles, understanding that initial player feedback might lead to adjustments. Nicholas Miller also mentioned a short audio task for Joe's brand, noting the importance of getting paid for such work ([00:07:42](#)).
- **Meeting Transcription and AI Use** Cody Cork mentioned using Google AI Studio for transcribing in-person meetings and asked about consent, while Nicholas Miller confirmed Matt's advocacy for AI and their own need for notes ([00:08:44](#)). They discussed dumping the transcript into a meetings document and the potential for AI to identify action items ([00:09:45](#)) ([00:41:44](#)).
- **Project Soft Start and Asset Needs** Nicholas Miller suggested a "soft start" for the project, noting Cody Cork's progress. Riley Lyons proposed meeting with game groups to start on audio assets, and Nicholas Miller reiterated waiting on Nick for gun and music specifics ([00:11:04](#)). They plan to prioritize these two aspects, with other elements like atmosphere being easier to add later ([00:12:11](#)).
- **Technical Challenges and Wwise Usage** The team discussed technical challenges, including the game being PC-only and the need for Cody Cork to learn Wwise for audio implementation on Windows ([00:12:11](#)). Nicholas Miller shared their own difficulties with Ableton crashing on their PC, which Riley

Lyons also experienced, leading them to suspect hardware issues. Nicholas Miller mentioned needing to fix their PC to continue working ([00:14:04](#)).

- **PC Maintenance and Hardware Issues** Nicholas Miller detailed their struggles with PC performance, despite clearing disk space and updating BIOS ([00:14:53](#)). They expressed apprehension about cleaning the inside of their PC tower due to static electricity risks ([00:15:51](#)). Riley Lyons and Nicholas Miller also discussed the power demands of audio equipment, with Riley Lyons noting their mixer's impact on their power supply ([00:16:38](#)).
- **Music References and Feedback Approach** Cody Cork discussed gaining music references from another game group, including "Fury" and "Undertale," with the latter providing inspiration for tracks with different versions across eras ([00:19:57](#)) ([00:56:44](#)). Nicholas Miller acknowledged the conflicting references and decided to create demo tracks based on "Unreal Tournament" to elicit specific feedback from the game team ([00:22:46](#)).
- **Collaboration and Feedback Strategy** Cody Cork proposed a feedback collaboration with Ethan's team, offering audio expertise in exchange for feedback on game music ([00:28:51](#)). Nicholas Miller suggested incorporating weekly feedback into their journal and highlighted the value of face-to-face sessions with Elliot for immediate feedback ([00:30:15](#)).
- **Seeking External Feedback and Portfolio Development** Cody Cork suggested reaching out to game lecturers like Glenn and Nick Harrison for audio feedback, with Nicholas Miller also mentioning their friend in game studies ([00:31:33](#)) ([00:35:04](#)). Nicholas Miller emphasized the benefit of diverse perspectives, including that of Diet, who understands game flow. Cody Cork also discussed creating a website for "Signal" to showcase their capstone projects and personal portfolios ([00:36:02](#)).
- **Career Insights and Industry Opportunities** Nicholas Miller shared positive insights from a friend in the film industry about the high demand and good pay for boom operators and sound recorders ([00:37:08](#)). This information prompted Nicholas Miller to consider pursuing this trade for income while working on other projects on the side ([00:38:18](#)).
- **Jury Duty and Payment Issues** Nicholas Miller recounted their frustrating experience with jury duty, specifically the requirement for a full-week sick note and the financial burden of obtaining it ([00:46:03](#)). They also expressed anger at not being paid for jury duty as a full-time student, leading them to consider altering the sick note to avoid an \$800 fine ([00:49:24](#)) ([00:51:30](#)).

- **Sound Reports and Shoot Day Information** Cody Cork requested that Nicholas Miller upload sound reports from previous shoot days for easy reference and to understand formatting for future shoots ([00:52:21](#)). Nicholas Miller confirmed that Elliot has the sound reports and acknowledged a moment where they forgot to hit record on one shot, though other material is available ([00:53:25](#)).
- **Team Dynamics and Project Needs** Cody Cork observed that the "barrels group" is very secretive and not keen on meetings, describing Nick as "all business" and James as "super nice" ([00:54:32](#)). Nicholas Miller noted their need for another programmer, which explains their current focus on game development ([00:55:42](#)).
- **Barhala Game Development** Nicholas Miller and Cody Cork discussed the game Barhala, which features medieval, cyberpunk, and current-day themes. Cody Cork offered to compile information about the game for demos, and Nicholas Miller expressed interest in contributing ([00:57:38](#)). They also discussed a demo for the game's music, which Nicholas Miller found suitable for a bullet hell game, confirming it was accessible for download and comment without an account ([01:01:38](#)). Cody Cork explained that the music demo includes different versions with varying BPMs, accessible by clicking "V 1.0" ([01:02:43](#)).
- **Samplify and Ableton Updates** Cody Cork introduced Samplify, an audio-sharing platform similar to Frame.io but for music, noting its robust free account features and usefulness for sharing music and different versions. Nicholas Miller indicated they would explore Samplify using their student ID ([01:00:28](#)). Cody Cork also informed Nicholas Miller about Ableton's new stem separation feature in the beta version of Ableton 12, which eliminates the need for external tools like Ultimate Vocal Remover due to its efficiency ([01:06:11](#)).
- **Upcoming Project Work and Collaboration** Nicholas Miller plans to be on campus the following day, Thursday, around 10:30 AM to assist Elliot with editing and suggested that they and Cody Cork could work on project-related tasks. Cody Cork agreed, highlighting the benefit of planning everything from a "bird's eye view" and expressing interest in exploring Wise and Reaper for project work ([01:05:05](#)) ([01:07:02](#)). Nicholas Miller also expressed a desire to start organizing their group project for presentation ([01:07:02](#)).

Suggested next steps

Cody Cork will dump the transcript of the meeting with Matt in a meetings dock.

Nicholas Miller will try to figure out what is wrong with his PC.

Nicholas Miller will message Glenn or Nick to get feedback on the game music.

Cody Cork will write up the references that the other game group has given them as a brief and share them with the group.

Nicholas Miller will send drafts of music to the group and get feedback on them.

Nicholas Miller will upload the sound reports for the shoot day done so far.

Cody Cork will clean up his linear stuff.

Cody Cork will write up and dump all the info to allow others to jump on and write some demos.

Nicholas Miller will check out Samply using their student ID and try to give Wise a shot.

Nicholas Miller will start cleaning up and figuring out what needs to be done for the group projects.

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

Please provide feedback about using Gemini to take notes in a [short survey](#).

Meeting Sep 24, 2025 at 10:48

AWST - Transcript

00:00:00

Cody Cork: Yo, how we doing?

Nicholas Miller: Yo yo, good, good. Just um such it's such nice weather like the last like couple days here in here in f***** Middle Earth.

Cody Cork: I know, man. Nice. Nice.

Nicholas Miller: Yeah. No, but it is really nice weather. So like I've been like kind of getting up at like a decent time lately.

Cody Cork: Yeah, I've been trying to fix my f***** sleep schedule and just ended up f***** it even worse.

Nicholas Miller: It's hard, man. It's hard. And like, yeah, another I was just like, yeah, I'm not going into jury duty while this this weather's so nice. Like, what the hell?

Cody Cork: Yeah, f*** that. Yeah.

Nicholas Miller: Um, get paid.

Cody Cork: Ever since um finding out that you can't even what do you call get paid?

Nicholas Miller: Get paid.

Cody Cork: is like, "No, what's the point?

Nicholas Miller: I know. Ex. That's what I'm I was just like, this is b*****. I'm not f***** um I'm not doing that, you know.

00:02:12

Nicholas Miller: Besides, I got like other like there was other things like I was part of like um my mates uh filming promo for their event. So, I was um helping with that and then um yeah, I don't know. I just kind of didn't want to miss class slash like get behind, you know.

Cody Cork: Yeah. Yeah.

Nicholas Miller: Apart from that, how's everything been? Have you Have you filmed yet?

Cody Cork: Um, it's been f***** s.

Nicholas Miller: Have you guys filmed like at Dean's house yet?

Cody Cork: No, we we didn't end up they got they got pushed back.

Nicholas Miller: But I thought the I Oh, I thought it was just the beach days that got pushed back.

Cody Cork: So, from memory, the beach says got pushed back and then um he said maybe film at Dean Dean's place or some s***. So, it was kind of like up in the air.

Nicholas Miller: Yeah, I think I think there I'm not sure if he's in on campus today, but Elliot messaged me this morning was like, "You coming in?"

Cody Cork: Um I I haven't heard from Harry since he changed the dates.

00:03:23

Nicholas Miller: And I was like, "Oh, no. I didn't know I was meant to." And he was like, "I think Harry might be coming in." But um yeah, I just I just asked Elliot pretty much because um yeah, he's like assistant director, editor as well, so he's he's very in the prompt.

Cody Cork: Right. How does that all that work? So that you just like goes through the edit and just kind of like points to um the vision or some s*** for it.

Nicholas Miller: Um uh as in like him him editing it.

Cody Cork: Like when Sorry.

Nicholas Miller: Hang on.

Cody Cork: Yeah. When you're in the editing room with him, like how does how does that work?

Nicholas Miller: Oh yeah. Yeah. Oh yeah. We were well I was just like, you know, kind of I was also giving I was actually also giving him feedback from like a audience perspective like him cutting and him telling me like why he made these cuts and everything and I was also asking about the audio and I was like which ones do we use and everything and kind of like yeah I want to kind of go scene by scene with him and if he's like okay this scene I'm kind of liking how this is going.

00:04:32

Nicholas Miller: And I'll be like, "Okay, give me the audio. Give me the audio for that clip and I'll and we'll get stuck into it. We'll do the dialogue for it. It's not that much dialogue to be honest, so it's it's going to be it's going to be easy." Not

Cody Cork: So, have you already started like cleaning up the dialogue and s***?

Nicholas Miller: yet. Not yet. Um maybe maybe next week possibly. Might start next week. Um, I gave myself like kind of like a week or two weeks to kind of like just get everything kind of like, you know, with like um like get all the others to kind of like get this their stuff together before we start going to full production and every full production mode cuz yeah, I was been waiting for like yeah, project title to get back to me and uh they said they would have a response within

Cody Cork: Yeah. Cuz yeah.

Nicholas Miller: within a week. So they Yeah, I did see a clip and that's all I've seen, but like I don't know about Yeah, like that's really I've actually like not checked really the other chat the other

00:05:27

Cody Cork: Do you have any Do I remember checking the Discord? They they had like a clip or something. I was like, "Damn, that looks cool." Really?

Nicholas Miller: their other like um Yeah, but I did have a quick go through and I was like, "Wait a minute, that's that's just that like screen grab that they I was like, "That's pretty f***** sick."

Cody Cork: channels. Yeah. Yeah. But yeah, the other guys haven't I mean actually I'm pretty sure on the Discord for the other games group um is legit just an audio channel. So like you can't even see anything else that's popping off.

Nicholas Miller: Like, you can't see anything.

Cody Cork: Yeah, dude. They're so like weirdly secretive about s***. Okay, literally that just give me some f***** concept art or some s***.

Nicholas Miller: I'm like, "What? What do you think I'm going to do?" I'm like, "I don't know. Yeah. Um, yeah, I know. It's like give me some just please give me something. I'm kind of want to be I'll be like, "All right, guys. Look,

00:06:37

Nicholas Miller: your most important aspect is the guns. I need to know what the like I know like just give me whatever guns you've got. I want to start making sounds for them and all that. At least then I've got something to work with." But I think the music and atmosphere

Cody Cork: Do you reckon you do the music at the end? I'm starting the music now because I'm stressing that like Oh, true.

Nicholas Miller: were like we don't know what we want because we are waiting for player test. And I'm like, okay.

Cody Cork: But yeah, like wouldn't you want something for the player test?

Nicholas Miller: How can you play a test with nothing, though?

Cody Cork: As in like if you just have like a scratch idea for music for the player test and be like, "Oh, the music is a bit too like hectic."

Nicholas Miller: Yeah.

Cody Cork: She's like, "Oh, cool. So, I know how to dial it back.

Nicholas Miller: Well, that's what I'm going to do. I'm going to be like, okay, I'm just going to get like guns and music.

00:07:42

Nicholas Miller: Like those are like two main important ones. And because everything else probably kind of like do easy like after.

Cody Cork: Yeah.

Nicholas Miller: But um yeah, I just want to kind of like get like, okay, what music like in the ballpark, what music do you want? And then I'll send out drafts and everything. And then at least got a draft. And then if people like, nope, don't like any of those tracks. It's like fine. It's like that's fine.

Cody Cork: M yeah.

Nicholas Miller: Cool. At least I know what not to do. But um yeah, that's just my little I knew this was going to happen like even after like at the end of last I knew I was like I'm not going to get an asset list by week one.

Cody Cork: No chance.

Nicholas Miller: Yeah. But um yeah, I I mean after the after we finish this call, I gotta do a little bit for Joe because he's doing something for a brand or something and he wants me to do like a little like quick like audio thing for it.

00:08:44

Nicholas Miller: So I'm like, I'll quickly do that today.

Cody Cork: Oh yeah.

Nicholas Miller: And then yeah, I did the one for the last clothing label, but um I didn't get paid for it, so I was like and I did I I was like I told I was living with him at the

Cody Cork: Is that for his like clothing label?

Nicholas Miller: time. I was just like, "Look, I did this in like 15 minutes. There you go." But this and he's like, "I'll pay you for it." So I was like, "Okay, cool." I was like, "I'll just I'll just do that for like a couple hours."

Cody Cork: Hell yeah. Okay.

Nicholas Miller: But yeah.

Cody Cork: What up? What up?

Nicholas Miller: Um right.

Cody Cork: Oh, by the way, um I did get the um some transcription of the the meeting with um yeah, I was I was supposed to like ask beforehand cuz I I sent him a message.

Nicholas Miller: So sick with Matt.

Cody Cork: I'm like, "Oh, I was just like for cuz I started um I was f***** around with the like Google AI like studio thing to like for like inperson meetings and s***."

00:09:45

Nicholas Miller: Can you put Can you get AI to transcribe it for us? Yeah.

Cody Cork: I was like, "Wait, is it like a consent thing? Do I need to actually ask?" And he's like, "Just ask at the start of the meeting."

Nicholas Miller: Yeah.

Cody Cork: I didn't ask, but like, "Yeah, it'll be fine.

Nicholas Miller: No, I reckon I Matt would be totally chill with it.

Riley Lyons: Yeah, he's a he's a big advocate for AI.

Nicholas Miller: He's a Yeah, he's a big advocate for it. So imagine if he was like, "No, don't do that. But um yeah, that's good because I yeah put I forgot to take notes and I was about to like try and like write some and be like what did we just discuss?

Cody Cork: Yeah, I started writing notes and I got like the title and then just completely forgot.

Nicholas Miller: Yeah.

Cody Cork: Yeah, I'll dump it in a meetings dock or whatever.

Nicholas Miller: Um yeah, I want to um uh yeah, get a start on like at least a soft like at least a soft start on like the project.

00:11:04

Nicholas Miller: Like you've already started Cody, which is great. Um like but like Oh my god, Cody, your screen is just like kind of frozen.

Riley Lyons: Yeah. Oh, there it is.

Cody Cork: Is it nice?

Nicholas Miller: It was frozen. You're like Yeah.

Riley Lyons: Big big happy freeze frame.

Nicholas Miller: Yeah. Yeah. Um but um yeah, like a soft start on like I guess everything. So like yeah, with the film like I guess I already I guess we already have kind of like with the film like these like weekly sessions with like Elliot

Riley Lyons: Yeah. Yeah. I think sometime like either end of this week or next week or whatever, we should meet up with at least one of the games um groups so that we can start putting towards uh like audio assets.

Nicholas Miller: That's what we were just I was just talking about that.

Cody Cork: Yeah.

Nicholas Miller: Um um yeah, I was saying I'm waiting on Nick to get back to me.

Riley Lyons: Oh yeah.

Nicholas Miller: He said that you get back in within a week.

00:12:11

Nicholas Miller: Um because I just need some like I think it's going to be like I'll just be like send me the gun what what guns you've got and also just give me a rough idea of like the music you want and then I can get started on that cuz that's those two of the hardest things or at least you know what I mean like they're the most important things and then I can just do atmos and s***

Cody Cork: Yeah.

Nicholas Miller: and all that stuff like easy.

Cody Cork: Um, f***** Discord needs to update every time I open. Jesus. Um, so I can Yeah, because I was going to say I need to check how to actually do all that.

Nicholas Miller: And then also I need to get I need to get the the build as well. And I also need to get Yeah, you can do it on Mac.

Cody Cork: um on Windows cuz I'm used to Mac. Yeah, but isn't the game like PC only?

Nicholas Miller: Yeah. Um. Um. Oh, yeah. True.

00:13:10

Nicholas Miller: If we're doing a good It's probably better to do It's It's better to do It's just way better to do on a PC to be honest.

Cody Cork: Because usually like a git pool or like a repo clone or whatever, you just do it in the like terminal.

Nicholas Miller: Yeah. Yeah. Because you can do Wise like you can do Y's on Mac. You've just got to make sure that you select um like that you're when you're put when you're like um committing the sounds like porting them into the engine that you have to like tick that it's like window that's going into a Windows engine or something. But I'm pretty sure you can still do it on off a Mac.

Cody Cork: Bro, yeah, I really just got to f***** actually learn how to use wires.

Nicholas Miller: Don't quote me on that. It's been like yeah it's been like six months since I've used it. So yeah, it's so it's pretty it's pretty easy. Yeah, you just come come to mine or something. Actually, why don't I get my computer fixed?

00:14:04

Nicholas Miller: Cuz right now it's I'm just trying to fix it at the moment. Yeah, that's probably what I'll do like for the rest of today is actually just trying to actually figure out what the f***** wrong with my PC so I can actually work on some stuff because man, Ableton is just crashing just as soon as I boot it up.

Riley Lyons: I've been getting that as well.

Cody Cork: Oh, really?

Riley Lyons: I'll be I'll be sitting in an Ableton session for like an hour and then all of a sudden it just like flashes black and then like Yeah.

Nicholas Miller: Yeah. Whoa. Are you on PC?

Riley Lyons: Yeah. Yeah. I'm on Windows.

Nicholas Miller: Yeah. So, it I don't have this issue on my Mac, but on my PC, like it's like I open something and it just like it takes forever for something to buffer and it'll do like the not responding and then

Riley Lyons: Yeah.

Nicholas Miller: I then I'll have to like sit there and wait for like like you know like a minute.

00:14:53

Riley Lyons: Yeah. Yeah. No, I've been getting that when I when I open it as well. Like if I if I open it and I immediately go to click open session uh or just like anything, then it Yeah, it will it will not respond.

Nicholas Miller: Yeah.

Riley Lyons: I don't know if it's just like taking a while to f***** open, but I did just upgrade my RAM.

Nicholas Miller: Yeah.

Riley Lyons: So, yeah.

Nicholas Miller: I think it's okay.

Cody Cork: Hey, stone.

Nicholas Miller: I think I think it's a hardware thing because I've I've this only started happening when I had to like unplug everything and I had to for my window to get replaced and everything. So when I plugged it back, s*** was just like going way too slow.

Cody Cork: Weird.

Nicholas Miller: And also it's like the the disc thing flashes sometimes and I was like, "Oh, I've got to clear all space." I cleared like 900 gigs worth of stuff off my p off my PC and still it's being an a*****. And I updated I updated the BIOS.

00:15:51

Nicholas Miller: The only thing I need to do is like actually clean my desktop, but I'm too afraid to do that.

Cody Cork: Are you one of those c*****? Does everything go all over your desktop and s***?

Nicholas Miller: What? Sorry.

Cody Cork: You one of those kinds everything all over your desktop and s***.

Nicholas Miller: No, no, no. Like, no, no, my desk, my actual desktop. Sorry, I meant my my tower.

Cody Cork: Oh, true.

Nicholas Miller: Yeah. Like my like it's so dusty in there. And like you got to be careful when you blow cuz people some people like, "Oh yeah, I'll just get a blower and just blow the dust out." And I'm like, you can really f***** your computer by doing that.

Cody Cork: Are you talking about like with the fans and it Yeah, like static electricity and s***.

Nicholas Miller: Yeah. Yeah. Yeah. Like when you clean the fans, you have to like hold it and make sure that like they don't move because if they move, it's really bad.

00:16:38

Nicholas Miller: also static electricity.

Riley Lyons: Yeah.

Nicholas Miller: If it's not grounded, you can f***** your motherboard and then you're cooked. You're done.

Cody Cork: Yeah.

Nicholas Miller: And I have all my warranty and s***'s um this computer is like four years old, so it's I'm not going to get anything replaced.

Riley Lyons: Yeah, mine's reaching on Mine's reaching on six now.

Nicholas Miller: Sorry.

Riley Lyons: So, it's just I'm having a Frankenstein it now.

Nicholas Miller: Yeah, but it's just like ridiculous how much of a f***** how intensive Ableton is to be honest.

Riley Lyons: Yeah, I've got mine I've got mine attached to a f***** desk cam and um uh bought it January.

Nicholas Miller: Oh, nice mixer.

Cody Cork: Oh s***. Nice.

Nicholas Miller: Did you buy that M? Wait, when did you when did you get that mixer?

Riley Lyons: Bought it like Jan or Feb. Yeah.

Nicholas Miller: Ah, I swear I don't know if it was you or someone was telling me that they wanted to buy I think or something like that like recently it was probably Harry actually.

Riley Lyons: Well, I've been chatting with Harry about it, so might have been him.

00:17:39

Nicholas Miller: Yeah.

Riley Lyons: Yeah, but yeah, that's eating a lot of my power supply.

Nicholas Miller: Sick.

Riley Lyons: So, I think that might be the next thing I have to upgrade. Um, yeah.

Nicholas Miller: Yeah.

Cody Cork: House of Oh man, you don't want to be f***** f***** around with that s***.

Nicholas Miller: M yeah but if you up no yeah as long as you're not getting like a new graphics card or anything.

Cody Cork: As in like don't don't cheap out on that s***.

Riley Lyons: But mine's like six years old now. So yeah, I'm running a f***** bomb.

Cody Cork: Oh, god damn. God damn.

Nicholas Miller: If you're getting a new graphics card, then you're gonna have to like spend like probably a little bit more because you're gonna have to accommodate the power that.

Riley Lyons: Yeah, I upgraded it.

Nicholas Miller: But if you're just if you're just upgrading Yeah.

Riley Lyons: I upgraded a while ago, but only to like a 30 60. So,

Nicholas Miller: And if you're planning on keeping it, then you just Yeah. All you got to do is just get it kind of same just just a newer one, you know.

00:18:38

Nicholas Miller: But um yeah, what's

Cody Cork: Uh, so I'm dropping the link to the meeting notes in Slack. Where is it? Um, that's for today with um with Matt.

Nicholas Miller: Yeah, cool. Cool. Oh, sick. So, that was just like Well, AI just did that.

Cody Cork: Yeah, because I was trying out like a whole bunch of different ones cuz I wanted one for like like the Google one's hell good.

Nicholas Miller: Mhm. Yeah.

Cody Cork: Um, but they don't do anything for like when you're in person. So, I was trying out a bunch of different ones, but um yeah, I mean, Apple Notes does it now.

Nicholas Miller: Oh, yeah. You could just like audio record. You could just do like a voice memo for when you're like um speak when you're like um seeing someone like face to face and then you can like upload it possibly.

Cody Cork: Um but it doesn't The only thing it it doesn't do is actually like sort by speaker. Like, you can't tell two different people speaking.

00:19:57

Cody Cork: So, it's just like this wall of text just like No f*** man.

Nicholas Miller: Oh, true.

Cody Cork: Um, also for um cuz have you asked the the game guys for music references before?

Nicholas Miller: I have Yeah, I've got Look at the um Go to Hang. I got I got to go on my thing. It should be linked in the project. Uh question. Yeah, the question air responses. Um um yeah, there's what genre the music should reflect that

Cody Cork: because I did end up sending a message in the other game group chat and

he actually came back with I mean like a couple references but it it did actually help
Nicholas Miller: Yeah, that's the thing I that's all I wanted was like references. Um cuz like the first thing that I heard was obviously early early 2000s like techno or something like that and I was like sick. But then I was like oh maybe that's not what they're going for when I actually ended up speaking to them. Um hold on just give me one sec.

00:21:30

Nicholas Miller: Oh yeah. Uh Robert Yeah, still under consideration. see how the play as we will see how the player testers engage with the game and how their feedback informs the environment's mechanics and pacing. However, the initial feel of this is linear ambient tracks that inform the tone of the scene with the occasional highlight track when a major event such as a bus battle occurs. So really like nothing really like referenced but um like like what I was saying in terms of um uh you know like they're wanting to see how the game how it in like what like what they like what the player test they're going off like what the what the player test and I'm like you know like come on give me a little bit more to work with Man

Cody Cork: Yeah. Maybe just be like f***** if they're going to not going to share um like clips or assets or anything that they've got so far and just be like, "Man, can you share or can you just give me um references that like do you know the the the games that have like inspired this one?

00:22:46

Nicholas Miller: Oh, yeah. They've got they've got Yeah, they've got Quake for um Unreal Tournament, which I actually grabbed a whole bunch of references.

Cody Cork: Wait, did I

Nicholas Miller: I didn't get to play it for them, but like um not so I don't know much about Halo 4's. I don't feel that Halo 4's one. Did you just trash the meeting the Yeah, it says the f this file's in the owner's trash. Yeah.

Cody Cork: f*** my bad.

Nicholas Miller: Um um uh yeah, it was just I don't know. I think I feel Halo 4's one Halo 4's soundtrack is more less techy and more I don't know your traditional like kind of like like yeah like Halo and stuff, but like Unreal Tournament has like full like liquid

Cody Cork: Like ambience. Yeah.

Nicholas Miller: drum bass and s***. So, yeah, I'm going to go through and just have a look and just be like, uh, here are what I'm here's from what I've gathered, these are like the tracks, these are some references.

Cody Cork: So yeah, it's kind of like very opposing points of reference.

00:23:59

Nicholas Miller: Let me know what you think. If so, I'll get a start on a couple drafts and stuff cuz yeah, I need a start on that.

Cody Cork: Maybe even just do like just to like brush the the dust off. like do whatever like you're vibing. Whatever you vibe easier with, just do like a a quick demo. Say it's like the Unreal Tournament f***** liquid style and then just do something like that like cool.

Nicholas Miller: Mhm.

Cody Cork: Like I just whip this up. Whip this up based off like the references of Unreal Tournament blah blah blah.

Nicholas Miller: Mhm.

Cody Cork: Is this the right direction?

Nicholas Miller: Yeah.

Cody Cork: And that at least starts the combo like whoa whoa whoa. We want like just ambient sounds. It's like okay thanks for f***** telling me now.

Nicholas Miller: Yeah, thanks for telling me.

Cody Cork: You know what I mean?

Nicholas Miller: Yeah. Um, yeah. Well, I mean, what they say? They said, yeah, he's like, James's been unwell. I've been dealing with he I think they've been they've had some stuff going on behind the scenes that's kind of slowed their progress.

00:25:16

Nicholas Miller: Um, and he's like saying, "We'll get in contact with you guys within the week with some scope and expectations info." So, that's like that's good. That's good to me.

Cody Cork: Okay.

Nicholas Miller: Like, yeah.

Cody Cork: Yeah, that helps.

Nicholas Miller: Yeah. Cuz I like I cuz I did tell him last try. I was like the scope like the

timeline audio stuff implementation the 3 week time frame that's it's do it's very it's like just doable. But I would rather it not be that.

Cody Cork: Mhm. So, also what I might do is I'll write up whatever the other game groups given us um as like a like a brief um to share with you guys in case you guys want to scratch up some of

Nicholas Miller: Yeah. Are they Yeah, I remember cuz I I discussed the music with them um at one stage.

Cody Cork: your own ideas um for the music.

Nicholas Miller: That was the time when you when you went there and I don't know if it's changed or not but kind of got eat.

00:26:21

Cody Cork: Yeah. Um, yeah, it' be good to have like a like a um music brief or some s*** and then we could all I don't know, even if you got like f*** all to do like, oh, maybe I'll try to scratch out some ideas.

Nicholas Miller: Yeah, definitely. I think that's a good idea. Um, what else? It's good. No, I didn't because I didn't really know what was going on with like errands thing. So, like we're just what just doing like the mix and master slash um just providing feedback.

Cody Cork: So yeah, basically um I pull up leading cuz I changed I updated all the what do you call it milestones or whatever But yeah, it's got to I I don't know the like the full scope of how it's going to go to actually like mix and master master it, but like bit of a an aggressive um turnar around. But basically um all three books uh basically due week nine which is like end of week nine which is November 16th but it's like basically on a two week rotation.

00:27:32

Nicholas Miller: Mhm. Okay. Okay.

Cody Cork: So um she will get all the assets all the stuff basically done for book one by end of week four I think. And then so by end of week six, book two will come in. End of week eight, book three will come in. So basically, you got two weeks except for or well, yeah, two weeks one after the other to

Nicholas Miller: Yeah. Okay, cool.

Cody Cork: like pump out except for book three, which is basically one week, but she said it's um super short in comparison to the other ones.

Nicholas Miller: Yeah. Yeah.

Cody Cork: and she just outlined it in the sense of like she's doing yeah all the she's basically do doing all the editing and she's like cool she's giving me like a um u what do you call it the audio

Nicholas Miller: Oh my go.

Cody Cork: yeah deliverables or whatever um for like audible it's like cool just mix and master it to like these levels blah blah blah and then she said in the process of like you mixing and mastering if you have any

00:28:51

Nicholas Miller: Mhm. Mhm.

Cody Cork: input for like sound design and whatnot fully like just add them in and kind of feed back that way.

Nicholas Miller: Okay, cool.

Cody Cork: Yeah.

Nicholas Miller: Um, project one in terms of um that format that Matt showed us. Um, what are we thinking? Like any ideas?

Cody Cork: So yeah, so I started drafting up like something to send to Ethan and was being like was going to say basically, hey, uh would be good to basically team up for like a feedback collaboration to basically We're giving feedback on like all their music demos, mix, mastering, whatever.

Nicholas Miller: Yeah.

Cody Cork: And we just literally just give feedback cuz it's like um uh like they get value out of it because we're like audio students, right?

Nicholas Miller: Yeah. Yeah.

Cody Cork: And then we they give us feedback on say like the game music and whatnot. And we just give like the points of like what the music needs to hit for the game and it's like cool.

Nicholas Miller: Yeah.

Cody Cork: while we're hitting those points.

00:30:15

Nicholas Miller: Yeah. That's that's a good idea cuz like Yeah.

Cody Cork: Um Um So yeah, there was that.

Nicholas Miller: Music's like not well I mean like as like arrangement or at least is like not really my strong suit.

Cody Cork: Uh

Riley Lyons: Yeah, I mean we we had that idea like early last try um to send out just like a second round of The questionnaires

Nicholas Miller: Yeah. Um, it might be good just like if we're cuz if we're working on like just like each week we just like take like we maybe like just get like feedback just from like you know like got like Matt said we got our journal that we're working on and then maybe that week just aim for to get like a little bit of feedback or something. doesn't could literally only be like two sent two three sentences, you know, have to be Yeah.

Riley Lyons: Yeah, it'll add up.

Nicholas Miller: It all add up and then you've got something to kind of like write about.

Riley Lyons: Yeah.

Nicholas Miller: Um, exactly.

Riley Lyons: And we can also, you know, write about things we change because of feedback.

00:31:33

Nicholas Miller: Yeah. Which is why I think having like these like face to face sessions with Elliot is like really good because um Wait, is today Wednesday?

Cody Cork: Yeah.

Riley Lyons: Yeah, it's paid it.

Nicholas Miller: Yeah. Um yeah. Um it's good with Elliot because then we can, you know, right then and there like, you know, provide feedback. We Elliot will probably ask us to be like, "What do you think about this shot?" or something and then we'll be like, "Okay, well, we like this or that." And then like he can also be like and then he we can be like, "What about this for like audio or something?" And if you can be like yes or no or you know

Cody Cork: cuz the uh The thing I was thinking was um uh like uh like lectures and stuff. So like did anyone know like a game lecturer?

Nicholas Miller: yeah we got we got D. We got Nick Harrison and Glenn Spores.

Riley Lyons: Oh yeah, we got diet or um Yeah.

Nicholas Miller: I can I can me Yeah, I can message either of them actually.

00:32:41

Riley Lyons: Yeah. Yeah. Glen. Yeah.

Nicholas Miller: Glenn Glenn or Nick probably would be the best just because Yeah, Glenn does.

Riley Lyons: I I've got Glenn right now for audio for games.

Cody Cork: Cool. Oh, sick cuz Glenn's like an audio dude.

Nicholas Miller: Yeah, Glenn does like audio stuff and but Nick is like over in He is He is Yeah, he is.

Riley Lyons: Yeah.

Cody Cork: He was like y about making music and s***.

Riley Lyons: Yeah.

Cody Cork: Yeah.

Nicholas Miller: And so is so is Nick Harrison like over in Melbourne. He he's also like really good as well. So I I'll also I contact Nick every now and again. So like I can also send some stuff through to him.

Cody Cork: Yeah.

Riley Lyons: Sorry to sorry to pop up for a sec.

Cody Cork: So, yeah. So, I'm Oh, yeah.

Riley Lyons: I've I've got an orthodontist appointment I've got to go to.

Nicholas Miller: Oh yeah.

Riley Lyons: Um so I love you and leave you guys.

Nicholas Miller: No, easy easy man.

00:33:24

Cody Cork: Easy, brother.

Riley Lyons: But um yeah, if anything important comes up, just just chuck it in the slack and I'll give it a good old read.

Nicholas Miller: No worries.

Riley Lyons: So um yeah.

Nicholas Miller: Yeah.

Cody Cork: Yeah.

Nicholas Miller: Yeah.

Cody Cork: Easy peasy of things to do.

Nicholas Miller: Definitely. Yeah. We'll have like we'll have like a list of everything.

Cody Cork: Yeah.

Nicholas Miller: Yeah.

Riley Lyons: Yeah, I think I think we're on a really good track and um it seems like um yeah.

Nicholas Miller: Mhm. I think it's Yeah, it's a good thing having like just a list of things to do cuz sometimes it just like when everything's kind of like all over the thing I'm like I don't know what's what.

Cody Cork: everywhere. Yeah.

Riley Lyons: Yeah. And it it seems like Matt is just absolutely head over heels for us. Um so I think so I think we're doing all right so far.

Nicholas Miller: Yeah, I know. I don't want to disappoint him. Yeah.

Riley Lyons: Um, but anyways, I'll uh catch you guys catch you guys on campus or on Slack or on a meeting, whatever.

00:34:13

Nicholas Miller: No worries, dude.

Riley Lyons: Um, yeah.

Cody Cork: Catch on the flip side.

Riley Lyons: Peace.

Nicholas Miller: All right. Have fun at the um Have fun at the orthodontist.

Riley Lyons: Yeah. Or it could be the day. Today could be the day I get these m***** off.

Nicholas Miller: Oh, get him off, dude.

Cody Cork: Oh s***.

Nicholas Miller: You It's going to be Dude, it's going to be nuts cuz I got them.

Riley Lyons: Maybe. Maybe.

Nicholas Miller: That was two years ago. I got mine off. Oh, man. You're gonna be licking your teeth for weeks.

Riley Lyons: Oh yeah. Stop freaking everyone out. But anyways, catch you guys.

Nicholas Miller: Yeah. All right, see you.

Cody Cork: All right. So Um, so yeah, Glenn, Nick, Harrison, u because I'm thinking for uh another part for like feedback

Nicholas Miller: I wish I could go back to that feeling of getting my braces off for the first time. Sorry, M. Yeah.

Cody Cork: is obviously, you know, um other people like in our cohort and whatnot or like Um, yeah.

00:35:04

Nicholas Miller: I've got a mate who's studying games or not in essay and I can probably send it to her and see what she thinks in terms of like, you know, she might have something to get outside of like outside

Cody Cork: f*** yeah.

Nicholas Miller: of the client or something, you know, you L uh LinkedIn.

Cody Cork: Yeah, because I was thinking um lecturers specifically because I don't like I don't know how easy it would be to actually like hit up someone in like the games industry in audio or whatever like how quick like a reply and stuff. Um but lectures will be quick and then that way you can get um a pretty like direct feedback for whatever questions in the sense of like hey here's like a demo track for this kind of game.

Nicholas Miller: Mhm.

Cody Cork: Is it too much? Will this cause issues in like the mix later? Is it Yeah. Do you know what I mean?

Nicholas Miller: Yeah, I think um yeah, definitely lectures will be a good one. I think having multiple actually.

00:36:02

Nicholas Miller: Yeah. Having Glenn, Nick, and also Diet as well would be sick because Diet will have a different take have a different They'll all have I feel Glenn and Nick's will be pretty they're the one they've got they they'll be kind of similar in their response or they might be completely different but Diet's one will be like pretty different because he'll be coming from someone that's not you know audio or musically but knows what but knows what a

Cody Cork: like audio backs. Yeah.

Nicholas Miller: game needs to kind flow and everything. So, that would be a good one for both. Um Um Oh, yeah. What's this portfolio thing you were talking about?

Cody Cork: H. Oh, the like a website.

Nicholas Miller: What's the portfolio thing? Yeah.

Cody Cork: Yeah. So, I started like f***** around with like making a website for like Signal last try. Um and like coming into this try I feel like um was going to jump back on it for say even like showcase if we all have like our own like uh personal portfolio and that's linked on like a

00:37:08

Nicholas Miller: Yeah. Like a portfolio. Yeah. Mhm.

Cody Cork: website that's like oh signal say like a QR code.

Nicholas Miller: Yeah.

Cody Cork: Someone pops a QR code and it's like this is our like capstone project.

Nicholas Miller: Mhm.

Cody Cork: These are all the projects that we worked on over the capstone period and then linked um all of our personal portfolios through that.

Nicholas Miller: This reminds me that I need to get my portfolio f***** I need I need need to do a lot more.

Cody Cork: Yeah, I haven't even f***** done that.

Nicholas Miller: Um I was actually so like cuz I was filming with uh for my mate uh for their like event promo and everything. Um I was talking to my mate who's doing like the camera and lighting and everything for it and he rocks up in this like really like brand new car and I was like and like he's got all this equipment. I was like man he's f***** like killing it at the moment. He was like yeah he was like he's I just bought a house and everything.

00:38:18

Nicholas Miller: I was like yes doing pretty well. I was like, "Yeah." I was like, "f***, I hope I'm hoping that in like, you know, I can be in similar position." He was like, "Dude," he was like, "If you're like," he was like, "If you're just like a chill dude and you're wanting to do like boom or sound recorders," he was like, "There's so much work out there for you." Yeah.

Cody Cork: Oh, really f***** a f*** yeah.

Nicholas Miller: He was like, "And you can earn." He was like, "You'll get he was like, you'll probably get end up getting more than me because you'll be able to work more than me because you'll have there's more of a demand for you, bro. Bro,

Cody Cork: We got to keep keep that s*** in the loop um when this s*** wraps up.

Nicholas Miller: I'm I'm fully I think for my I think for my trade I think for my trade I'm going to actually like try and like Yeah, I think to earn money I think I'm going to try and like do that and on the side I'll do all this other stuff.

00:38:59

Cody Cork: Yeah. Film. Yeah. f*** yeah.

Nicholas Miller: Yeah. But yeah, I thought I'd let you know. I was going to let Harry know as well just because it's that's the second time I've heard it from someone that's in the that's in the industry that's like said like Yeah.

Cody Cork: f*** yeah. That's good to know as well.

Nicholas Miller: Yeah.

Cody Cork: Hell yeah.

Nicholas Miller: And it's a good part. It's really good pay as well.

Cody Cork: Really see that?

Nicholas Miller: Well, yeah. Like Harry Harry said that someone said to him that it was like 60 something an hour, but then I also searched online just quickly and saw Sally and they're going from sometimes I think it's like a half day

Cody Cork: That's a little unexpected. Damn.

Nicholas Miller: could be 500 and then like a full day could be like over could be like over a thousand.

Cody Cork: s***.

Nicholas Miller: And you're also like the first ones the last ones to rock, first ones to leave. So I'm like I'm like I'm down.

00:39:46

Cody Cork: Yeah. f*** yeah. I can vibe that.

Nicholas Miller: Yeah. Cuz this whole time I was like f***. I was like am I gonna have to just like work my ass like just work my ass off like relentlessly in this industry just trying to like get like pennies before I get like big if I even get

Cody Cork: Yeah. Something good.

Nicholas Miller: big bucks. But it's like you can kind of I think it's just because all all the audio people like at least from what I've gathered a lot of them want to like you know do post production you know which I I do I I want to do that but it's like I kind of like being on my feet.

Cody Cork: Yeah. And it's like like if it's that competitive and it's like oh, you know, location stuff's really the only thing going. Like I'm still more than happy to do that.

Nicholas Miller: I'd rather do that than live sound.

Cody Cork: Oh, f***.

Nicholas Miller: Yeah, I'd rather do that than live sound.

00:40:38

Nicholas Miller: I I'd rather do that than kind of even being like a mix engineer. Just like a full-time mix engineer. I also it's just like, you know, you do it and then like you get to like go on like sets and like who knows what set you'll be on and you're like f*****, you know, go back up to

Cody Cork: Yeah. Yeah. It's like, yeah.

Nicholas Miller: Michael. What's his name? I'd like to say I'd like to have beers with what's his name, you know?

Cody Cork: Yeah, that'd be sick.

Nicholas Miller: So yeah. Um, it was this week has been kind of like good week cuz I've kind of been like, "Oh man, okay, things are kind of moving quick. Things are kind of not falling into place, but things are because I kind of like see where I'm going a little bit better." So, I was a bit lost before.

Cody Cork: Yeah.

Nicholas Miller: Um, but anyway, sorry, getting back to that. Getting back to what we were talking about. Um uh with the this transcript will we like will you like list like okay this is what we discussed this is what we're going to do and everything transcript for this one cuz I feel yeah as I

00:41:44

Cody Cork: What's this the the Google Google um like all of our other online meetings it's it kind of just does it all automatically.

Nicholas Miller: Um, yeah.

Cody Cork: Um yeah.

Nicholas Miller: Yeah. Um, yeah. I want to I Yeah, I just want to make sure cuz I I would like Yeah. I like looking at the meeting minutes or something just to know like, oh, okay, this is like what I've got to do for this week or or or what's left to do.

Cody Cork: So, so um even with uh say like the one with Matt how I just like copied and pasted it from like a different one.

Nicholas Miller: Mhm.

Cody Cork: Um, you can actually legit just Where is it? I'm pretty sure you can use like Gemini or like whatever the Google AI is like in the document being like, "Hey, what are my action items or whatever and it like lists them and s***."

Nicholas Miller: Gemini. Yeah.

Cody Cork: Um, I know what you mean though.

Nicholas Miller: Yeah. Yeah. Um, and then we can input that.

00:42:52

Cody Cork: just like like it's good to have like a summary and s*** if you need to like find something specifically, but like Oh, I I did all that s*** last week.

Nicholas Miller: Yeah, we can like input that into like linear and everything cuz I've got to go in. I might even go in and just clean up some of my linear stuff and everything. And bro, you should have told me be like, "Hey, Nick, could you just like do like the film or the game or something?"

Cody Cork: Legit took me days, bro.

Nicholas Miller: I would have been like, "Yeah." And I like in terms of like like like cleaning it up because like here's the thing is like yeah

Cody Cork: So, I left all the ones that like were your like project lead and stuff and any anything that you added in, I've left. I'm basically just cleaning up all the s*** that f***** um I added in. Um but yeah.

Nicholas Miller: like I've not I know I've not been as like I know I've not been as like frequent on linear and everything but um But I I mean half a time it doesn't f***** open.

00:43:50

Nicholas Miller: For some reason when I shut my computer and I open it, sometimes it's like up. Sometimes it's just constantly saying loading.

Cody Cork: Oh, really?

Nicholas Miller: Yeah. Yeah. It's kind of annoying. But yeah, I need to like kind of go through and be like, okay, this is like the project management. This is where like everything is stored. So, like if I can kind of um I think I might do that after this is just like go through the game one and just be like, "Okay, this is what I need to do. This is what I'm going to ask them and everything also there." Oh,

Cody Cork: Yeah. Yeah. Um, but yeah, if you check because I think I've posted some some updates and s***. Um but no, you go you go

Nicholas Miller: sorry. Yep. Oh, I was just going to say um there's a possibility. So, the person who did the filming for that um event promo, they have another event for their

festival at the bird in November and they're wanting to like possibly hire out the studio to film it and they're going to I and I said I'd help with like the audio.

00:44:57

Nicholas Miller: They might also want me as talent as well, but I said I' Yeah, I said I'd ask cuz I was talent for this one.

Cody Cork: H. f*** yeah.

Nicholas Miller: like I had to do like drag and s*** and put I'm like f*** it. It's pretty funny. But um yeah uh if you're if you're down or whoever like you know to do something for that you could add it to the portfolio but who knows it might be a little bit it might be too explicit

Cody Cork: f*** yeah.

Nicholas Miller: for a portfolio piece. So yeah.

Cody Cork: I mean, you can always, you know, like censor whatever But yeah, no, f*** yeah.

Nicholas Miller: Mhm.

Cody Cork: Because also just even just like um so I feel like stuff like that as well is like say parts are just too explicit for like the portfolio like still good to have it on there because it's like oh like I'm happy to work with whoever whatever communities and stuff blah blah Huh?

Nicholas Miller: Yeah, exactly. Um, oh my god, just so annoying.

00:46:03

Nicholas Miller: Sorry, I was I got an email from I got sick. So like cuz I pulled a siki for the f***** jury duty. Um they were like, "You need to get a sick note." And I was like, "Okay." But I don't have any money. So I was like, "f***, where do I get a sick note?" So I had to like I think borrow money off like my sister to pay for this online like sick note. And then um I was like I called them this morning. I was like, "Hey, where do I send it to?" They're like, "Yeah." They're like, "Does it go for the do do the dates encompass the whole week?" And I was like, "No, it's only for like Monday and Tuesday because those are the days I'm technically sick." And they were like, "It's got to be for the whole week." And I was like, "f***." And then I've just asked the f***** medical people and the the place where I got I was like, "Can you amend it?"

00:46:47

Cody Cork: Oh, you're kidding.

Nicholas Miller: And they were like, "You've got to make a new appointment." And I was like, "I'm not f***** paying another f***** 25 bucks." Yeah. And I was just like, let me find the font.

Cody Cork: Yeah.

Nicholas Miller: Do you? Surely there's not like some sort of like metadata that's going to be they're going to be like, no, this isn't actually that does.

Cody Cork: Oh, yeah. Cuz I mean like like I don't know. it's the courts and stuff. So, I don't know how like how much they check, but basically like you can go and edit metadata, but if you say take that one, make a copy and then um like do a little Photoshop edit, it'll have

Nicholas Miller: That's

Cody Cork: like in the metadata like uh say it's from like your email or some s***. It's like who the sender was, who the email recipient on what date, and if they see the dates the same, but then like the file creation date is different, they're like, "Oh, so you received the these two doctor's

00:47:44

Nicholas Miller: H. Mhm.

Cody Cork: notes on the same day, but this file is created on a different day." Yeah,

Nicholas Miller: But sure they won't check it that that bad. I mean, I'm just like, can I just because the thing is I just need to get the right font and just change the last digit. Just change it from the 24th to the 28th.

Cody Cork: yeah, if you're on your Mac, I'm pretty sure um hang, let me let me check.

Nicholas Miller: Yeah, like I've got it here and I've command I and file name.

Cody Cork: So, I'm pretty sure if you go whatever the file is, you go like command I, it gets like the info up.

Nicholas Miller: Yeah.

Cody Cork: Uh, hang on, let me try and find a document and see if I can.

Nicholas Miller: Encryption.

Cody Cork: So you got command I um yeah I don't know cuz there's like usually like there's like hidden metadata and stuff we have to like have like an app or some s*** to

show you. Um cuz like sometimes like Yeah, cuz if you if you do that and then um like scrub the metadata so then it literally has no metadata.

00:49:24

Nicholas Miller: I just want to Yeah, I just want to like change the I just want to find the font that they're using like Yeah.

Cody Cork: Then it's like they can't even say anything, you know?

Nicholas Miller: Um yeah, it should be fine. I'll just give it a shot. Um, I'll just keep going through every single f***** font until I find something that's similar.

Cody Cork: Cuz like, okay, say you didn't.

Nicholas Miller: That's annoying, but I mean I wish we just No, I'll get a fine like 800 bucks.

Cody Cork: Do you do you still have to maybe actually just go in or you get a fine 800?

Nicholas Miller: Yeah, man. It's a lot of money, but it was like I've already deferred it and like they just Yeah, it's just Exactly.

Cody Cork: That's f*****. So, it's like, "Hey, we're not going to pay you if you come in, but if you don't come in, you're going to have to pay us 800 bucks."

Nicholas Miller: Just because I'm a citizen, dude.

Cody Cork: That's f*****. That's actually f*****.

Nicholas Miller: Oh, this this looks Yeah, I know, man.

00:50:31

Nicholas Miller: I think it's so s***. Like, I think if I was working, I'd be like, "Okay, yeah, I'll do it." Because the thing is Oh, wait. Actually, I think as cuz we'll be like contractors kind of, right? Won't we as freelancers for like if like if we're like contracting or something and like you know we don't we're not we're not we're full-time but we're not like entitled to like leave like like this would be like

Cody Cork: Oh, wait for Oh, yeah. Yeah. Yeah.

Nicholas Miller: like next year when we're like in the field. Yeah.

Cody Cork: Yeah.

Nicholas Miller: You can actually be excused because it's like Yeah. bad because they they it was like, yeah, they pay like \$40 for each day or something like that, but only to full-time and casual. So, full-time and part-time people, but then the work makes up the difference of what you missed if you if you're meant to be working. But because

you're a contractor, you can't the work won't be able to do that.

00:51:30

Nicholas Miller: So, they're like, you can't actually be excused, which is ridiculous cuz I'm like, I'm a full-time student. I should be able to get excused, man.

Cody Cork: Well, that's actually pretty cool.

Nicholas Miller: It's so cooked, man. It sucks. And it's like just No. No. I was just No, I was not.

Cody Cork: No.

Nicholas Miller: I was going I was getting so mad like f***** like the day of I was like I didn't even have any money to get like I realized I probably should have filled up my smart ride because I was like I have no way of like getting into the city and I don't want to f***** like drive my car and pay for parking. Um so I was just like f*** I have no way of getting there cuz I was going to be like if I go there I'm just going to ask to be excused every moment I can. Just be like can I be excused? Can I be excused? Can I be excused? Can I be excused?

00:52:21

Nicholas Miller: Because apparently when you get to the court, the judge asks, "Does anyone want to be from the jury want to be excused?" And if you put your hand up, they can they can they they can send.

Cody Cork: They can just send you. Oh my god. Waste of your time though.

Nicholas Miller: It's a waste of my time.

Cody Cork: Like f*** that.

Nicholas Miller: Yeah. And they've got that's why they've got a lot of people like a hundred people in the jury thing because it's like there be people going out and out and people filling that spot. And I'm like there are people that they're like that are happy to do it. I'm not not if I'm not getting not if I'm not getting paid.

Cody Cork: Yeah, f*** that.

Nicholas Miller: Yeah, exactly. Um yeah, I can't yet.

Cody Cork: Oh, also one thing before I forget. I just remembered. Um, uh, can you upload the sound reports for the shoot day done so far?

Nicholas Miller: But I can message Elliot, too, because I every every day every day every day that we filmed when we finished, we'd give him the SSD and we'd give him

the um the sound report.

00:53:25

Nicholas Miller: So, yeah, he he's got him.

Cody Cork: art dope.

Nicholas Miller: Yeah. Um

Cody Cork: Um just so that like it's on hand. Plus, um I initially wrote it down for like so I know what the what do you call it? Um the formats and stuff are um in case that I'm on a shoot without you guys or some s***.

Nicholas Miller: Yeah. No, it's um Yeah.

Cody Cork: Yeah, it's just easier to reference that way. Perfect.

Nicholas Miller: Yeah. No, it's um I'll probably be on the next shoot as well. Um cuz now that I know with the whole um jury jury duty and s***. Um but yeah, Elliot's got the I saw him when I saw him on um last week, he had he had brought the sound reports with him. So he's like cuz there's actually an there is a there's a shot that's there's no audio because I forgot to hit record. Yeah, I know. But it's it's they've got they've got other shots that they've got other stuff that they can use for it.

00:54:32

Nicholas Miller: So yeah.

Cody Cork: a side to side.

Nicholas Miller: Yeah. All right. Well, um yeah. Um let me know when this uh transcribe thing comes out. I'll start going into linear and then I might even message Nick cuz he said he messaged me wasn't it was yesterday morning and I might just message him and be like yo I was like tomorrow sound for like

Cody Cork: Cuz like have you met in person with those guys?

Nicholas Miller: possibly talking about everything. Yeah. Yeah. Not this tribe.

Cody Cork: Ultra cuz I feel like the other games group like just hella really not keen on really like any meetings.

Nicholas Miller: But yeah, the um which one?

Cody Cork: Um the the barrels group

Nicholas Miller: Yeah. Yeah. No, they're they're very interesting. They're very like kind of like oh secret. Nick and um James are just very much like we've just got to make the we just got to make the game. And like Nick is just very like all business.

00:55:42

Cody Cork: Yeah.

Nicholas Miller: like all business like no he's like no AI all business he's like I'm like don't crack a joke with him just which is kind of good you know it means he's super passionate about what he does he's yeah

Cody Cork: Yeah. Yeah. You don't f*** around, bro. Yeah.

Nicholas Miller: um definitely a little bit like autistic for sure but um uh and James is James is is super nice so but Nick seems to be the one that like they post they posted a I saw they posted on

Cody Cork: But yeah.

Nicholas Miller: the capstone board. They were like we need another programmer.

Cody Cork: Oh, true, true.

Nicholas Miller: Yeah. So I think they're actually like wanting like they actually need help with it.

Cody Cork: Yeah.

Nicholas Miller: So that's why I'm like giving them a little bit of grace. But I'm like just give me something to work with.

Cody Cork: Uh yeah, I I'm going to do all the logistical.

Nicholas Miller: Yeah. Yeah. Can you let me know what the music what music did they want for the barrels?

00:56:44

Cody Cork: Um so they gave a reference for Fury the game. Have you played it?

Nicholas Miller: Okay. No, no, no.

Cody Cork: Um yeah, it's like um the music for that, the soundtrack for that is actually f***** pretty sick.

Nicholas Miller: You said it was pretty hard.

Cody Cork: Um not going to lie.

Nicholas Miller: Yeah. What kind of what kind of music?

Cody Cork: um like like cyberpunkish that kind of like like retro synth wave kind of stuff as well that and then they gave a reference for um like an Undertale track um but he

Nicholas Miller: Sick. Yeah. Yeah. Sick. I'll have to have a look.

Cody Cork: explained it in the sense of like um you know how they've got three different eras like three different time periods um there's a track in Undertale that has three different versions.

Nicholas Miller: Mhm. Yeah. Yeah. Yeah.

Cody Cork: And he was like, this is how he was explaining how he wants like three different versions of the same thing.

Nicholas Miller: Yeah.

00:57:38

Cody Cork: Kind of like that.

Nicholas Miller: cuz they've got medieval, they've got like cyber punk, right? And then I don't know what the other one current day.

Cody Cork: Um like current day like Yeah.

Nicholas Miller: Yeah.

Cody Cork: Yeah.

Nicholas Miller: So, yeah, that would be good. Um, do you know what?

Cody Cork: Um but yeah, so yeah, I'll do I'll write up the um like I'll dump all that info so then in case you guys want to jump on um write in some demos.

Nicholas Miller: I I definitely will. I I definitely will for sure.

Cody Cork: f*** yeah.

Nicholas Miller: I'll definitely I'll definitely help out. I kind of as much as I'm feel I'm also helping the film, I also kind of want to help out with the barrel a little bit more. Um uh oh, sorry. I watched um what you call I watched Fantastic 4 last night.

Cody Cork: Oh, the new one with Pedro.

Nicholas Miller: Yeah. Yeah. Yeah. Yeah, bro.

Cody Cork: Is it good?

Nicholas Miller: Um, f***** uh I Who the f*** is What the f*** is Disney doing with their f***** CGI team, man?

00:58:39

Cody Cork: Did that bad? Oh my god.

Nicholas Miller: There was a lot of instances where I was like, "This is really bad CGI." Like, this is really ter terrible.

Cody Cork: f***.

Nicholas Miller: And it sucks because it's Galactus who I've I've always wanted to see. I'm like, you know.

Cody Cork: Oh, what? Yeah, Galax is f***** OG comic team.

Nicholas Miller: Yeah, man. But I know, dude. Dude, but they did the design for the Galactus and everything is really good. I loved it.

Cody Cork: True.

Nicholas Miller: But like I they Ralph whatever his name is who voices him, man. The guy that's that English dude. He's been on so many so much s***.

Cody Cork: Yeah.

Nicholas Miller: Coolest f***** voice. And the sound design so good. So yeah, man.

Cody Cork: True, but just the CGI is a bit f***** How you going?

Nicholas Miller: when he like Yeah, there was a bit where and I guess maybe this was a bit critical, but it's just like, you know, he like stepped he took his foot and he stepped on like the ground or something like this massive behemoth thing and the water just looked like little like streamers and I was like, "What? No,

00:59:37

Nicholas Miller: it's meant to be like a tidal wave." I'm like, "It's meant to He's huge, man."

Cody Cork: Yeah. Yeah.

Nicholas Miller: But and like Silver Surfer looks kind of cooked as well, but it's not him.

Cody Cork: Oh, f***. Oh, he's one of my favorites, bro.

Nicholas Miller: It's It's a girl. But like I like that it's a girl. Like um as much as I like the other one, I But anyway, yeah, I thought Galactus was cool. He actually kind He looks cool. Like he's got the they've got everything kind of right. It's just like explosions, some fire and stuff like that. But I was like this this really sucks. Yeah. Yeah.

Cody Cork: Um just quickly as well um so you know you know frame.io right?

Nicholas Miller: Yeah. Yeah. I actually had to redo I went to log in the other day and I had to um upgrade to like the new version for free though.

Cody Cork: Um yeah.

Nicholas Miller: I'm pretty sure is people by the same people.

01:00:28

Cody Cork: Um if you look up Samplify, it's like the audio version and there's

like a free What's that? Nah, no. It's like a small indie team. Um but I've tried this one and a couple others. This one's the best one.

Nicholas Miller: Mhm.

Cody Cork: Um, and the free account is actually pretty good. Um, but yeah, so I I'm using that just in case that piques interest.

Nicholas Miller: Yeah, definitely.

Cody Cork: Um, it's good for like sharing music and yeah, just to check it out.

Nicholas Miller: I might with my student ID just for this one. Um, while I'm just a Yeah, while I'm a student, I'm just signing up for f***** I'm signing everything with my student ID.

Cody Cork: Yeah. Um but it's hell good because um like even on the free account you can have different versions and s***.

Nicholas Miller: Nice.

Cody Cork: Um yeah, it's it's dope. f***** have a look at it.

Nicholas Miller: Yeah. Yeah, definitely give that a shot. Um, I've got it right here.

01:01:38

Nicholas Miller: For some reason, it's taking forever. It's like I don't know.

Cody Cork: Actually, I'll share um because this was the first what do you call it? Demo for like the game music. I sent it in the chat if you so you can have a look.

Nicholas Miller: Can I look at it without um being a person without being like Yeah.

Cody Cork: Yeah. Yeah.

Nicholas Miller: All right. Cool. All right.

Cody Cork: as far as as far as I know.

Nicholas Miller: Oh, yeah. You can like you just download it. Cool. download. Pop that in. Let's put what's the name of the what's it called?

Cody Cork: Yeah. So, oh maybe you can't comment unless you have Oh, no. You can comment. Sick.

Nicholas Miller: Barra Barilla Bar.

Cody Cork: Barhala, you know, like uh Valhalla, but like Barhala.

Nicholas Miller: Oh, like Valhalla. Barl. How do you spell that?

Cody Cork: Barhala E L H A L A. Yeah, there's a game called Brawlhalla, so I think they're kind of riffing off that.

01:02:43

Nicholas Miller: B. Yeah. B A R E L, right? Cool. I didn't realize like how much stuff when I was clearing out all my stuff from my Mac and everything, like how many duplicates of s*** I had. Yeah. All right. I want to look Give me a listen now. Oh s***. Oh my god. Yeah, I could totally see this in the game. Like in terms of like a bullet hell game.

Cody Cork: Yeah. Yeah.

Nicholas Miller: Yeah.

Cody Cork: Yeah. Um, so if you click where it says V 1.0, it'll drop down like a all the different versions.

Nicholas Miller: Um.

Cody Cork: So there's one for like different BPM.

Nicholas Miller: Oh, wait. Hang on.

Cody Cork: Yeah. So that's the cool thing where it's like if you've got Yeah.

Nicholas Miller: What? How do I do that? Hang on. If I go It's only got one.

Cody Cork: So if you click it should say like comment and then V1.0.

01:04:07

Nicholas Miller: Oh, hang I was looking cuz I had to download it on my thing to Wait, hang on.

Cody Cork: Oh right, right. Um yeah.

Nicholas Miller: Oh, I could have just played it up here. My bad.

Cody Cork: So if you Yeah, you can even Yeah, if you click on the V 1.0 zero.

Nicholas Miller: If I go What? Oh, V one point. Oh, right. Mhm.

Cody Cork: Um, and even yes, you can like drop a comment being like, "Oh, this part's too loud or blah blah blah blah."

Nicholas Miller: And this one 10. Yeah.

Cody Cork: Um, so yeah, it's kind of like frame.io just for like music.

Nicholas Miller: Sick. Hang on. I'll um I think it's I would need to see the game to see like but I think that's like that's kind of like a good thing.

Cody Cork: Yeah, I'm I'm literally I don't even know what it looks like. It could literally be f***** Oh, yeah.

Nicholas Miller: We've only seen that physics presentation on Yeah.

Cody Cork: I'm literally just little f***** bubbles in f***** no texture devand like

01:05:05

Nicholas Miller: Yeah. I'm possibly going to be on campus tomorrow around like 10. Well, I said Elliot I'd be there around like 10:30 to like help with like do the editing thing this week. I don't know if you want to come through. Um yeah.

Cody Cork: Yeah, for was tomorrow, Thursday. Yeah. Yeah.

Nicholas Miller: And then um and then also at the same time I guess we could like also do some project work or whatever like do some other stuff.

Cody Cork: Yeah. Cuz it' be good to like just plot everything out. Um, so I still got like a bunch of stuff I got to clean up for like the projects, but just like laying everything out from like a bird's eye view would be good.

Nicholas Miller: Yeah, maybe if we we could probably give like wise a shot maybe.

Cody Cork: Oh, yeah.

Nicholas Miller: Yeah.

Cody Cork: Cuz I I I've been telling myself to like just look into it, but it's one of those Yeah.

Nicholas Miller: Um I mean you Yeah. One of those things you really can't do unless you got a project to do it do it on.

01:06:11

Nicholas Miller: Um, and I mean I was meant to remember what I said about Reaper did not f***** open it. So I I Yeah, I just need to open it.

Cody Cork: I got it installed. I just haven't even

Nicholas Miller: But I just know that like it's just like it's a whole thing of like, you know, learning a new door, but it also Yeah, I've got to like customize it to like work with and everything. So it's something that I'll pro I'll probably end up doing. that um I heard about that.

Cody Cork: Yeah. Also, have you seen Oh, it might not be in the new update yet. Um, so I'm on the Ableton beta. They have stem separation in inside Ableton now.

Nicholas Miller: I I saw it was a it was a new release.

Cody Cork: Dude, uh, just 12. Bro, it's actually pretty good because it's like if you got like a sample and it's got like a like a vocal and a pad and it's like I don't need the vocal.

Nicholas Miller: It was it was a new was a new update for Was it for all of them or just 12?

01:07:02

Nicholas Miller: Okay. Yeah. some so it's just Ultimate Vocal Remover just f***** So it's Ableton's officially using AI or like Well, I mean they've actually probably been using algorithms for a long time to be honest.

Cody Cork: Bang. Straight out. Yeah. But it's like so quick. Yeah. Yeah.

Nicholas Miller: Yeah, but that's f***** sick.

Cody Cork: Yeah. It's so handy. It's like it's literally made Yeah. Ultimate vocal remover like completely redundant now. Like M yeah the f*** around man like

Nicholas Miller: Yeah. Yeah. I mean, Ultimate Vocal Remover was I still use it when I have to, but I try not to because it's like it's a bit hard process. Yeah, I do like getting drums from it though. It's pretty good with drums. Um, but yeah.

Cody Cork: uh wait so what what time are you going in tomorrow?

Nicholas Miller: Um Elliot said 10:30. Uh or he said he's got they've got their supervisor meeting at 10. So like I'm I'm going to get there at like 10:30 probably.

Cody Cork: Yeah.

Nicholas Miller: And then like uh they'll probably either go into the editing and I'll come with them or they'll um pretty much like yeah to 10:30 but regardless I'll be on campus tomorrow.

Cody Cork: Yeah.

Nicholas Miller: Yeah.

Cody Cork: Easy.

Nicholas Miller: Easy. Yeah. All right. Well, um I'm I'm going to go I'm Yeah, I'm going to start on like linear and just start cleaning some stuff up and then when you got the meeting minute or whatever, um just let me know and or

Cody Cork: Yeah.

Nicholas Miller: let us know and I'll Yeah, I'm just going to start like just seeing like okay, what do I need to do?
