

W04 - Facilitator Meeting

Action Items

Export the dialogue for the unabridged audiobook and share it with the team

- Assignee: Cody
- Schedule: Not mentioned

Work on the asset list for the game and reach out to the team for help with music

- Assignee: Riley
- Schedule: Not mentioned

Check in with Riley about assets and music for the testing

- Assignee: Nick
- Schedule: Not mentioned

Share the ozone software with the team for mixing purposes

- Assignee: Cody
 - Schedule: Not mentioned
-

Meeting Outline

Testing Methodology and Project Approach

- Students should be able to explain the number of components they are testing in their group.
- Each student should articulate why their testing approach is appropriate for an authentic project.
- The focus is on making the project feel useful rather than just an assessment.
- The performance standard is outlined in the brief, which clarifies expectations for the project.
- The importance of discussing artifacts and testing methods will be emphasized in week six.

Team Collaboration and Communication

- There is a need for in-person meetings to enhance collaboration and communication among team members.
- Concerns were raised about communication breakdowns and the need for better information sharing regarding project statuses.
- The suggestion was made to implement structured agendas for team meetings to improve focus and productivity.

Project Management and Structure

- Team members expressed feelings of being overwhelmed with the workload and the need for better structure in their projects.
- The lack of regular classes has contributed to feelings of disconnection and difficulty in managing tasks.
- Establishing a structured approach to meetings and project management could help alleviate some of the stress and confusion.

Meeting Scheduling

- The group discusses scheduling a meeting for Thursday at 10 AM at a local cafe instead of campus.
- Speaker2 mentions the need to bring computers and suggests having someone take notes during the meeting.
- The meeting is confirmed for the following day, and Speaker2 will send out the details.

Project Management Tools

- Speaker2 asks the group about tools they can use to keep track of their projects and progress.
- There is a suggestion to have a weekly synopsis to track the status of projects and check in on each other.
- Cody explains how the project management tool allows tagging team members for notifications and creating threads for comments.

Tool Familiarity and Training

- Some members express feeling intimidated by the project management tool and its complexity.
 - Cody offers to help Riley understand the tool better, suggesting they work together after the meeting.
 - The group discusses the importance of using the tool for updates and communication about project statuses.
-

Communication and Updates

- The group agrees on the importance of tagging each other in updates to ensure everyone is informed about project changes.
 - Speaker2 emphasizes that important updates, such as delays, should be communicated to the entire team.
-

Project Management and Communication

- The team should start each meeting by reviewing project updates to ensure everyone is aligned and can provide input.
 - There is a need to revisit the timeline and scheduling for projects, particularly due to delays in filming.
 - Communication varies between projects; one team is good with updates while another is lacking, which affects progress.
 - There is a suggestion to create a draft asset list to help clarify what is needed from the teams.
 - The importance of having a structured approach to project expectations is emphasized to facilitate progress.
-

Asset Development and Requirements

- There is uncertainty regarding the audio asset list and what is needed for character design versus environmental sounds.
 - The need for character sound design is highlighted, as it is crucial for gameplay experience.
 - Nick is working on concept art and sketches for weapons and needs to share these with the team for feedback.
 - The team discusses the importance of gathering more assets to support sound design and gameplay development.
-

Film Production and Collaboration

- Concerns are raised about the workload during the film's post-production phase, especially with other projects ongoing.
 - The team acknowledges that collaboration will be necessary during the film's production, as it will involve multiple team members.
 - The music for the film is being handled by a team member who is balancing it with other projects.
-

Project Status and Team Support

- Speaker5 expresses concern about feeling more involved with the film than another team member, indicating a need for better communication and collaboration.
 - Speaker2 mentions the importance of having a test asset ready by week seven, highlighting the need for clarity in dialogue and sound mixing.
 - Speaker4 suggests that team members should check in with each other regarding their workload and feelings of burnout to foster a supportive environment.
 - Speaker2 emphasizes that the responsibility for the film should rest with the designated person, allowing others to focus on their tasks and support each other.
 - Speaker2 encourages the team to communicate their needs and offer help, reinforcing the idea that it is a group project.
-

Meeting Structure and Communication

- Speaker2 proposes establishing a regular meeting time for the team to discuss project updates and support each other.
 - Speaker4 suggests meeting early in the week to allow for better planning and collaboration.
 - Speaker2 highlights the importance of in-person meetings for effective communication and team bonding.
 - Speaker1 agrees on the need for a structured approach to meetings and communication among team members.
-

Task Management and Collaboration

- Speaker2 advises team members to post updates on their individual projects in a shared channel to keep everyone informed.
 - Speaker5 mentions the possibility of helping with other projects, such as the audiobook, to alleviate workload pressures.
 - Speaker2 encourages the team to identify areas where they need help and communicate those needs clearly.
-

Personal Updates and Well-being

- Speaker8 shares that they have been in their head lately and had plans for the weekend that didn't go through.
 - Speaker8 mentions stopping smoking weed, which is affecting their mood and eating habits.
 - Speaker7 expresses a feeling of being out of touch with the class and asks about the current status.
-

Meeting Organization

- Cody suggests organizing a meeting that has been in discussion for a while but hasn't happened yet.
 - The group discusses the possibility of meeting before class, which previously worked well.
 - Speaker5 expresses a desire to have in-person classes again, indicating they were beneficial.
 - The group agrees that in-person meetings are preferable to online ones, as they help maintain focus.
-

Scheduling Meetings

- Cody proposes to meet once a week and suggests they can figure out the best day.
 - Speaker8 mentions that Mondays work well for them, while Speaker3 agrees.
 - Speaker5 suggests scheduling meetings when in-person classes are not happening.
 - The group discusses the possibility of meeting on Wednesdays, as it fits everyone's schedule.
-

Audiobook Project Discussion

- Speaker8 brings up the need for help with the unabridged mix of an audiobook project.
 - Cody explains the project involves creating two versions of the audiobook: one with just dialogue and another with sound effects.
 - The group discusses the sound design responsibilities and the need to fill in gaps during the mixing process.
 - Cody mentions that the prototype needs to be completed by the end of the week, but it shouldn't take long since it's just one scene.
-

Audio File Management

- Cody suggests exporting the audio file to avoid issues with reverbs and other sound problems.
 - Speaker5 mentions they will have limited involvement in the film project for the next few weeks.
 - Cody plans to share information regarding the music style needed for the project to help others create drafts.
 - There is a discussion about the need for feedback on music ideas to reduce stress and improve collaboration.
-

Film Project Coordination

- Speaker5 discusses the need to meet with the film team to ensure proper communication and updates.
 - Cody advises maintaining contact with the film lead to stay informed and cover responsibilities.
 - Speaker5 shares their experience of accidentally attending a meeting and building rapport with the team.
-

Team Morale and Workload

- Cody expresses feelings of burnout due to extensive documentation work.
 - Speaker7 shares similar feelings of being overwhelmed and dealing with personal issues affecting their work.
 - Speaker5 checks in on the team's overall feelings and acknowledges the previous week was challenging.
-

Music and Sound Assets

- Speaker8 mentions needing help with music and assets for testing and plans to discuss this with Nick.
- Cody offers to share a template he created for asset lists, which could help in organizing the project.
- Speaker8 expresses difficulty in finding decent sound samples and mentions the high cost of some desired sounds.
- Cody discusses the importance of using sounds from the same source to ensure they mesh well together.
- Speaker8 raises concerns about the licensing of sounds, particularly regarding royalty-free sounds and the need to credit sources.
- Cody clarifies that when purchasing sound packs, users typically do not need to reference the source, as the license covers that.

- Speaker8 shares thoughts on how sound design can obscure the origin of sounds, making it less likely for others to identify them.
 - Cody mentions the availability of good sound samples on Soundly, but notes that they may not always mesh well together.
 - Cody discusses the creation of a shared drive for resources, including premasters and multi-tracks, to streamline collaboration.
 - Speaker7 expresses uncertainty about the visual design of an enemy character in the game, indicating a need for concept art.
-

Collaboration and Resource Sharing

- Cody suggests creating a public roadmap board for the games group to facilitate task sharing and collaboration.
 - Speaker8 mentions the importance of having a shared drive for sound assets and other project documents to improve workflow.
 - Cody notes the challenges of uploading large files to Google Drive, indicating that it can be slow and time-consuming.
 - Speaker8 refers to a project link where concept art for the game can be found, emphasizing the need for visual references.
-

Sound Design and Creative Collaboration

- Speaker8 will provide the necessary sound requirements for testing, allowing others to start writing.
 - Cody discusses the challenge of creative roadblocks and how bouncing ideas off each other can help overcome them.
 - Cody mentions that his current creative roadblock is in audio, despite having made progress in his own music.
 - Speaker8 expresses frustration about not being able to create sounds during a break but recently made a trap beat.
 - Speaker7 notes that working on campus can be hit or miss for productivity.
 - Cody suggests figuring out the finer details for their weekly meeting and emphasizes the need to complete the audiobook by the end of the week.
 - Speaker8 and others agree to keep each other updated on their progress and tasks.
-

Software and Tools for Sound Design

- Cody mentions having access to Ozone 12 and RX 11, which are tools for sound design.
- Speaker8 requests the newest version of Ozone from Cody, as all their mixing tools are on a different PC.
- Cody agrees to share the sound files and tools with the team.

Meeting Coordination and Follow-Up

- The team discusses their availability for campus work and plans to meet again to touch base.
 - Speaker8 will keep everyone updated on their progress and tasks.
 - The meeting concludes with a friendly farewell and plans to reconnect soon.
-
