Meeting Oct 24, 2025 at 15:08 AWST

Meeting records [Transcript](#)

Summary

Nicholas Miller and Cody Cork discussed challenges with the stereo compressor on the desk and sought to understand the Audient console's signal flow for stereo processing and grouping. They also outlined a four-step process for Project One, focusing on client feedback, and established a centralized to-do list in Linear for project management, including tasks for the audiobook project and future meeting schedules.

Details

Notes Length: Standard

- **Desk Control and Stereo Processing** Nicholas Miller and Cody Cork discussed challenges with the stereo compressor (ProVa 2) on the desk, noting that it's tricky to use with stemmed stereo tracks because the desk operates in mono ([00:00:00](#)). Nicholas Miller explained that when the stereo link is switched, the attack and release controls shift to the left side, and the balance shifts to the right, which they found difficult to manage for proper output, leading to imbalances that required manual adjustment ([00:03:01](#)). Nicholas Miller expressed dissatisfaction with mixing stereo in ProTools with outboard gear on the desk ([00:04:21](#)).
- **Audient Console Signal Flow** Cody Cork suggested consulting the Audient manual for a perfect signal flow diagram, specifically mentioning it is near the "subgroups" section ([00:05:17](#)). Nicholas Miller located a relevant section on "Path swapping" in the manual, which discusses how to route stereo signals, confirming that sending stereo to two tracks on the desk typically requires mono input ([00:07:48](#)). They further noted that using the short fader on the console skips the EQ ([00:09:00](#)).
- **Stereo Grouping and Monitoring** Nicholas Miller and Cody Cork discussed the primary assumption that the Audient 8024 console's stereo capabilities are mainly for monitoring, as individual tracks are typically in mono. They talked

about the concept of sending drums into one stereo group that then goes into ProTools for adding effects. Nicholas Miller sought to understand how to send two stereo tracks from a compressor to a stereo group on the patchbay ([00:10:08](#)).

- **Finding Stereo Output Information** Nicholas Miller searched the Audient manual for information on sending signals to stereo groups. They identified sections like "Stereo inputs" and discussions on "fold back A and B" for speakers ([00:12:46](#)). However, Nicholas Miller expressed difficulty in finding clear instructions on how to send audio through auxiliary or subgroup outputs to a stereo group ([00:14:02](#)).
- **Project Structure and Planning** Nicholas Miller emphasized the need for a structured outline for their project, particularly for Project One, due to time constraints. Cody Cork attempted to add Nicholas Miller to a Notebook LM project, but sharing outside their organization was not supported ([00:16:44](#)) ([00:19:38](#)). They decided to use their school accounts and potentially Google Workspace for project management and AI usage, despite potential restrictions on daily AI use ([00:18:24](#)).
- **Project One Outline** Nicholas Miller and Cody Cork began outlining Project One, starting with the priority of creating a question list. Nicholas Miller recalled Matt emphasizing the importance of obtaining authentic client responses and suggested researching how to get better feedback from clients ([00:21:50](#)). Cody Cork clarified that "quantitative tests" refer to measuring or analyzing using numbers and data, and that questions should be definitive ([00:26:10](#)).
- **Challenges with Project Direction** Nicholas Miller expressed frustration with the lack of structured guidance for the project, noting that they do not have a tangible product and are expected to figure out much on their own, especially regarding the psychological aspects of getting client feedback. Cody Cork acknowledged that their feedback is dependent on client feedback, creating a delay ([00:28:25](#)). Nicholas Miller wished for more direct, step-by-step instructions from Matt ([00:30:48](#)).
- **Project One Steps** Nicholas Miller and Cody Cork established a four-step process for Project One: researching how to get better feedback from clients, writing the questions, asking the questions, and analyzing the gathered information for a poster presentation ([00:31:48](#)). This structure helped Nicholas Miller understand the project's progression. They aimed to dedicate the weekend to research, formulate questions on Monday, and send them out that night ([00:34:03](#)).

- **Outreach Strategy** Cody Cork proposed making a post on the university Slack channel to solicit participants for their mix and master project, considering a humorous and informal tone ([00:37:27](#)). Nicholas Miller suggested creating a quick outreach template for industry professionals and considered using AI (Gemini) to speed up the drafting process ([00:39:39](#)).
- **Feedback on Processes, Not Artifacts** Nicholas Miller and Cody Cork recognized that they currently lack a tangible artifact for feedback, which led them to discuss seeking feedback on processes instead ([00:41:48](#)). Cody Cork suggested they could interview industry professionals like Mick Gordon to ask about their project tackling processes with limited information, focusing on how they would approach projects differently. Nicholas Miller drafted an outreach message asking professionals for insights or principles their team relies on when structuring new projects ([00:43:55](#)).
- **AI for Question Formulation** Nicholas Miller highlighted Notebook LM's ability to formulate questions based on sources, which could be beneficial for their project. Nicholas Miller also mentioned that many of their MUB questions were generated using Notebook LM ([00:46:22](#)). Cody Cork agreed to refine the AI-generated outreach message to be more casual and charismatic ([00:47:30](#)).
- **Project Milestones and Future Planning** Nicholas Miller mentioned a personal goal to record Matt via Zoom for their project on Monday, noting that they need to edit the recording and complete documentation, with a potential special consideration for an upcoming SAT test ([00:51:05](#)). For the music mixing and mastering, Nicholas Miller expressed a desire to work collaboratively with Cody Cork and possibly on campus, especially since they haven't mixed music properly in a while ([00:52:17](#)). They also planned to start drafting an asset list for the game project next week ([00:53:08](#)).
- **Weekly Workflow and To-Do Lists** Cody Cork suggested delaying outreach messages to industry professionals until early next week to align with the start of the work week, believing it would be more effective ([00:54:18](#)). Nicholas Miller and Cody Cork decided to make a detailed to-do list for Monday to ensure they hit the ground running, even if a team member couldn't make it ([00:55:14](#)). They agreed that creating weekly wrap-ups and outlines for the following week on Fridays would improve productivity and avoid wasting time at the beginning of the week ([00:56:06](#)).
- **Centralized To-Do List Implementation** Nicholas Miller and Cody Cork decided to create a centralized to-do list in Linear to manage tasks and track progress. This approach ensures all team members can easily reference outstanding

items and maintain visibility across different projects ([00:58:05](#)) ([01:01:48](#)). They moved away from individual task management systems like Obsidian to foster better collaboration ([00:58:05](#)).

- **Linear Initiative and Project Structure** Cody Cork suggested using Linear's initiative feature for the Capstone 330 project, viewing it as a larger goal encompassing multiple projects and issues. They discussed creating a new project specifically for the audience test to manage immediate tasks, which would contain relevant weekly checklists ([00:59:26](#)) ([01:02:32](#)). This structure allows for a clear hierarchy of tasks and projects within Linear.
- **Project One To-Do Items** Nicholas Miller outlined several tasks for Project One, including completing an outreach message to industry professionals, which one member would be responsible for ([01:02:32](#)). Other tasks involved finding industry professionals (two or three members), collecting scholarly articles and case studies on client feedback, and formulating survey questions, with an emphasis on uploading collected research to Notebook LM ([01:07:16](#)). These tasks are slated for completion on Monday, aiming to progress to step three by the end of the day ([01:11:21](#)).
- **Audiobook Project Tasks and Logistics** Cody Cork detailed tasks for the audiobook project, including consolidating the Ableton project for group usability and referencing director's notes for specific sound requirements. The deliverable structure requires the project to be bounced into chapters, not one large file ([01:18:34](#)) ([01:21:29](#)). They also discussed creating a spotting list based on a template provided by Erin, which includes specific design prompts ([01:22:22](#)).
- **Meeting Schedule and Future Planning** Nicholas Miller confirmed their availability for Monday, planning to start early, and Cody Cork offered to book the control room from 1 PM to 5 PM to maximize efficiency ([01:23:55](#)). They agreed to implement weekly wrap-up meetings or a weekly agenda at the start of each week, with a potential mid-week check-in, to maintain clear communication and manage ongoing tasks effectively ([01:25:58](#)).

Suggested next steps

Nicholas Miller will look into how to get better responses or feedback from clients by researching question design and psychological approaches.

Cody Cork will make a post in the uni Slack to find people for the music project.

Cody Cork will work on the audio book.

Cody Cork will help push along the game stuff by doing the asset list.

Cody Cork and Nicholas Miller will create a to-do list for Monday to ensure a productive start to the week.

Cody Cork and Nicholas Miller will formulate the questions for the clients based on their research, ask the questions, and put the answers into a document to explain them.

Cody Cork and Nicholas Miller will work on an outreach message template to send to industry professionals regarding their project processes.

Cody Cork will book the control room or a studio from 1PM to 5PM for Monday and collect all thoughts for the music stuff by tomorrow or Sunday.

Nicholas Miller will check in with everyone on Sunday to see their progress.

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

Please provide feedback about using Gemini to take notes in a [short survey](#).

Meeting Oct 24, 2025 at 15:08 AWST

- Transcript

00:00:00

Nicholas Miller: Yo.

Cody Cork: Yo yo what's up?

Nicholas Miller: Um, not much. Just playing around on the desk.

Cody Cork: Are you in control B?

Nicholas Miller: Yeah. Yeah.

Cody Cork: How's that all going?

Nicholas Miller: Just Huh.

Cody Cork: How's it all going?

Nicholas Miller: It's good. It's t It's taken a little bit of time. It's kind of like cuz I'm doing like the one of the tracks that I bought and it was like the It's just like it because it's stemmed in stereo. It's just like um yeah uh it's a little bit tricky. Like I was I was using the ProVa too like that stereo compressor and that one was kind. Yeah, that's about it really.

Cody Cork: f*** yeah. Actually, um I don't know if you tried it yet, but if you're using the the stereo compressor, the VA one.

Nicholas Miller: H does it output.

Cody Cork: Um could you cuz if you have it in the stereo link, it outputs in stereo. Hey, so then it's just like patching it back.

00:03:01

Nicholas Miller: I thought I thought it just uh summed all of the attenuation into and and all that into into like cuz like I put it in um stereo link and then cuz I had to like put all my stereo

Cody Cork: Oh.

Nicholas Miller: tracks into a monot track and then um I kind of like outputed the stereo into two channels even with stereo link.

Cody Cork: Yeah. Okay.

Nicholas Miller: Yeah.

Cody Cork: cuz I know that. Yeah, I'm assuming that stereo link is to make it stereo, but I actually have no idea. I haven't actually looked and then sums it, right?

Nicholas Miller: No, no, it it will it takes like two channels in I believe. Yeah. Yeah. It sum and then sums it into Okay. It's It's really weird because it's like I cuz when it outputs you got to output it to two tracks on the uh on the desk because um it's stereo and both the and both the and like the desk is in mono.

Cody Cork: Yeah.

Nicholas Miller: Yeah. But um what happens when you switch like stereo link all the like attack and release and all that goes onto the left side and then on the right side on channel two is like the balance between the two.

00:04:21

Nicholas Miller: So you can kind of like Yeah.

Cody Cork: Oh, okay.

Nicholas Miller: But I was noticing that like mine when it was coming in it was kind of outputting it like like this a little bit.

Cody Cork: Yeah. Yeah.

Nicholas Miller: Like it was like the left was like quiet and the right so I was like I had to tweak the balance and put the balance like the knob all the way that way. So then it kind of was the same.

Cody Cork: Right.

Nicholas Miller: But yeah, I don't know how the f*** they did like masters and s*** with like stereo.

Cody Cork: True. Okay. Yeah.

Nicholas Miller: I hell don't like it.

Cody Cork: Yeah.

Nicholas Miller: I hell don't like mixing like stereo and ProTools and s*** with outboard gear on on the desk.

Cody Cork: Yeah. cuz I know there's there's like the stereo orcs groups. I remember like that's something to do with it, but like Yeah. Yeah. Yeah. It's in like the that middle section like the top corner, I think.

00:05:17

Nicholas Miller: Oh yeah. Yeah. Oh yeah.

Cody Cork: So, so it's something to do with those, but like um I'm pretty sure it's basically just to get it like basically with that desk, you use those to get it back into ProTools cuz obviously you can't really mix

Nicholas Miller: Try Yeah,

Cody Cork: on the desk in stereo, but I just don't remember the routing for that.

Nicholas Miller: because yeah, I had to bust it out and I had to re-record. I printed the drums like left and right. Yeah, I'll give I'll give that stereo one a shot, I reckon.

Cody Cork: Oh, and I actually put this um in my notes and it took me like a day or two to remember what the f*** I even meant by writing it down, but you know that big uh file that's the

Nicholas Miller: M Yeah.

Cody Cork: audient manual? Yeah. Um there's a perfect signal flow diagram on um uh on one of the now I said re read the the titles.

Nicholas Miller: On the front before the contents.

Cody Cork: I remember which title it is.

00:06:24

Nicholas Miller: Is it on the contents?

Cody Cork: Um yeah go like read through the um yeah the contents and I'll shout out which one which u page it is.

Nicholas Miller: Um, is it like at the beginning?

Cody Cork: Yeah, it's near the top somewhere, I think.

Nicholas Miller: Yeah, it's like how to use this manual, unpacking important safety instructions, the stand, removing modules for service, mechanical installation, main power supply, voltages, fuses, audio interface, pin convention, screen connections, connections, recording with ASP8024, inline architecture, record, the recording process, basic tracking, basic mixing, insert points, doing it live, the use of fallback, groups, subgroups. Is any of this uh overdubbing, path swapping, track bouncing, solo, metering, more on connectors, jack sockets, XLRs, gloss.

Cody Cork: is it's it's just after like group subgroups. There's um what's the next one? Next one. No, next one.

Nicholas Miller: Now I'm at the glossery.

Cody Cork: Oh. Um, it's near subgroups cuz I was having a flick through and it was something about like um uh like moving the signal over and it just had like the most

perfect signal flow diagram of like the audient H.

00:07:48

Nicholas Miller: Oh, maybe it's 12 then. Might be 12. Oh, is this on? Did it look like this? I don't know if you can. Hang on. Let me turn my stupid thing off. Um, how do I get this off? How do I go back to like normal? Like I don't want my background anymore. There we go. Cool.

Cody Cork: Nice.

Nicholas Miller: All right. Yeah. Is it Do it look like that?

Cody Cork: No, no, no. It was way way better than that. Uh, keep going through like um No, it's like in the bottom half section and it's on like a title page for something.

Nicholas Miller: one. That one. Oh. Oh, okay.

Cody Cork: Um, yeah.

Nicholas Miller: Um Oh, wait. It's not that one, is it? Path swapping.

Cody Cork: Yeah. Path swapping. Yeah. Yeah.

Nicholas Miller: Okay. Yeah, I was looking through the manual because I was trying to figure out how to like get stereo into like get ProTools to like output it stereo into like two tracks on here, but I think you've actually got to put it in mono.

00:09:00

Nicholas Miller: Um, oh yeah.

Cody Cork: Yeah, that that diagram even like I remember being like that's hell good because it even shows the long fader short fader pa things for like the different points to say like um cuz I remember it having something like

Nicholas Miller: Take a photo of it.

Cody Cork: if you go like um long fader short fader it actually skips the EQ or some s***. I'm like oh I would never have known that.

Nicholas Miller: Yeah. Yeah. I think if it goes to short fader, I think you skip the EQ. Um Yeah. Yeah. If you hit short fader, um it skips Yeah, the EQ and then you go straight to it goes straight to um the short fader like pre then post and you pan mix stereo.

Cody Cork: Yeah. Yeah. Yeah.

Nicholas Miller: Uh okay, I want to I'll look at this soon. I might even try like do like the stereo groups I reckon just to f*** around with it.

Cody Cork: Yeah. What's the console called again?

00:10:08

Cody Cork: Is audience 80024. Yeah, I kind of was under the assumption that so basically

Nicholas Miller: 8024 cuz I feel as though like what you guys send stereo groups.

Cody Cork: with the desk, the only stereo thing that you're thinking about is basically like monitoring. Um because every track's in mono, blah blah blah, right?

Nicholas Miller: Yeah.

Cody Cork: So stereo groups are kind of like cool. Um and then I'll send say all the drums, pants into one stereo group which then goes into um ProTools.

Nicholas Miller: Yeah.

Cody Cork: So then you can basically track and then add like the reverb effects and delays and stuff.

Nicholas Miller: Yeah. I think the um Yeah, I could see I've just pressed something.

Cody Cork: That's kind of the basic understanding I was assuming.

Nicholas Miller: I'm like, the thing is I know I've got to send the I'll have to send the two stereo tracks from that compressor to the stereo group. So, I'm kind of wondering how you do that on here when Oh, maybe that.

Cody Cork: Yeah. Is there is there like input output on the um what do you call it?

00:11:32

Cody Cork: Uh patchbay for the subgroup uh the stereo group.

Nicholas Miller: Oh, right. Oh, so you put it Oh, so you send it straight to the stereo group on the patchbay.

Cody Cork: I'm not sure, but maybe it's either that or um um No, I don't know cuz I feel like the stereo

Nicholas Miller: Cuz you got subgroups there.

Cody Cork: Oh, yeah. Actually, I'm just confusing myself now.

Nicholas Miller: Yeah, I think um maybe it's over here. What's that? That's audience. I'll I'll figure it out. I know that like I've got to send I know I've got to send it to that to that um stereo group. So, I'll figure out how to do that.

Cody Cork: Yeah.

Nicholas Miller: I'm pretty sure it's in here somewhere.

Cody Cork: Yeah. Yeah, I know definitely that say you want like a um a stereo delay,

you have to use the those stereo uh auxiliary settings somehow.

Nicholas Miller: Wait, if you want a stereo delay as in like a delay on a stereo track or just um Oh, yeah.

00:12:46

Cody Cork: Now let's use the uh the out here like the um the lexicon and s***.

Nicholas Miller: Yeah. Yeah. Um, sorry, I'm just having a quick look. Solo, bouncing, groups, subgroups, groups and subgroups. Maybe stereo. I literally saw stereo here. Stereo inputs. Would that be it?

Cody Cork: stereo inputs. Yeah, maybe

Nicholas Miller: 33 subs. Oh, yeah. Here we go. Um, okay. Okay, I think this is it. Is this it? Uh, radic. So, allowing input signal to be sent to multi track recorder. Shift button with working. Yep. Uh, FB and A allows input signal to be sent to fall back A. Oh, yeah. So, fold back A and fall back B. That's the that's the um speakers, I believe.

Cody Cork: Bro, heat.

Nicholas Miller: And then six, rotary fader allowing input signals to be faded up or down. Mix allows input signal to be sent to the stereo mix bus. Yeah.

00:14:02

Nicholas Miller: Seven. And then yeah. All right. That brings the stereo inputs be brought back. This means the effect routing to the fallback system is possible using FB again. trim stereo channels effectively increase number of inputs that are available especially during a mixown every channel doesn't really say anything about sending it to it does it so subgroup it doesn't really say like how would you send like how to send it through to cuz I don't see like another auxiliary like you Okay.

Cody Cork: Um, so you know how there's the auxiliary 1 2 3 4 5 6 in the um middle section where you like monitor it.

Nicholas Miller: Yeah. Yeah. Yeah.

Cody Cork: Is there something on there where it's like say you would send

Nicholas Miller: That's what I'm Yeah. I was That's what I'm I can't see anything for stereo, but I think Oh, hold back A and B. There's four groups, so it's like you'd have to it has to be like four of them, right? Um, or six, link two, or two.

00:15:26

Nicholas Miller: Yeah, there's like fallback A and B and speakers and all that, but I can't see. Oh, wait. Subgroup.

Cody Cork: sub subgroup. That sounds

Nicholas Miller: sub group. Oh, but these are for the Um, yeah, if I go take that out, put mix in. No, there's nothing coming out there. Oh. Oh, okay. So, if I took that out, I wonder if that's going to do anything. No, that can't do anything. Um, I go oops and I bring the level up maybe.

Cody Cork: Surely

Nicholas Miller: No, I'll figure I'll figure it out. But there's um there's got to be a way of like Yeah, it's Yeah, I'll get on to that after this, I reckon. I just want to figure it out. I want to at least by the like by time that we're finished at least know this desk like pretty well.

Cody Cork: yeah, for sure.

Nicholas Miller: I feel it just it'll just help with like signal flow cuz there's um we've got all these subgroups down here and then

00:16:44

Cody Cork: Um, yeah. I've just gone and like actually just grabbed the audient manual. Um, I feel like it's that it's it's

Nicholas Miller: I've got a feeling those subgroups are just like just little groups and s***. Um

Cody Cork: I'm trying to remember this so long ago. Um, but I feel like it's something to do with um yeah, like grouping and then sending.

Nicholas Miller: Yeah. To stereo to a stereo output. Yeah, the B is Yeah, that's what I I I ag I like that's what I think would happen. But the thing is I need to find what where it is that you send that to.

Cody Cork: I think yeah bounce me from the f***** Yeah.

Nicholas Miller: Oh, I think it might have cut out. Yeah. No, I think there's like a way that you can like send it. There's got to be a knob or something where you send it to the stereo group. That's the thing. Cuz right now those stereo groups like I can't even see a button that's near there that's saying Yeah.

00:18:24

Cody Cork: Yeah. There's like no routing into the stereo or

Nicholas Miller: Yeah. But I mean unless it's Oh man, maybe it's in here. subgroup.

Yeah, I'll um I'll I'll give it I'll have a another look. All right. Um Okay. I reckon I we need like 10 minutes or something or or something for this.

Cody Cork: Okay.

Nicholas Miller: We just I need to get like a structure or something going.

Cody Cork: Yeah. So, I've tried um uh adding you guys into like a notebook LM, but it's saying that sharing outside your organization is not supported.

Nicholas Miller: Uh yeah.

Cody Cork: So, yeah. f***. Um and if I add you guys into like my workspace account, I have to pay per user. So, it'll be like Yeah.

Nicholas Miller: Well, do you want to just use um we can just use the surely we can just use school your school account and s***, right?

Cody Cork: Yeah. Yeah. Yeah. Um I just thought I'd try with that cuz um it's like fully unlimited.

00:19:38

Nicholas Miller: Yeah, but I feel as though this school one, wouldn't that be like unlimited as well?

Cody Cork: No, cuz with Google Workspace, you can actually set um the amount of AI use for like your um your workspace or like your company. So like I don't think SAE would have gone like full unrestricted cuz then if everyone's just like non-stop using it that's uh I think it's as many as you want but it's more like say you've got like the

Nicholas Miller: You are Well, how many notebooks are you allowed to create? Like Oh,

Cody Cork: um uh like 330 project one notebook and then you've dumped all your resources. you can only ask a certain amount of like questions per day. So you can make like two podcasts per day. Um yeah.

Nicholas Miller: really? I didn't know that.

Cody Cork: Yeah, that's there.

Nicholas Miller: I I thought there was no restrictions on it.

Cody Cork: That's what I thought and then I realized that um uh there are restrictions when actually not using the the work one. Um that's right.

00:20:47

Cody Cork: If I can also I finally got the audio book stuff from Aaron.

Nicholas Miller: Mhm.

Cody Cork: Um so there's that to do as well. But but should we go through like say top to bottom and actually just outline everything that needs to be done cuz

Nicholas Miller: That's what I think. Yeah, because especially project one because I'm just like still a little bit like I I was really I kind of wish that I didn't have f***** work after because like I would have liked like actually like you know let's actually So what we do what have we got what have we got to get what have we got to grab?

Cody Cork: do the full outline. Yeah. cuz um especially for project one, I think we're going to have to kind of like push pretty hard for the next like week or so.

Nicholas Miller: Yeah. Yeah. Yeah. I agree.

Cody Cork: Um cuz that said that like if we have stuff in the pipeline that he can push it back a week, but that's like the latest.

00:21:50

Nicholas Miller: Yeah.

Cody Cork: Um but okay.

Nicholas Miller: Yeah.

Cody Cork: So you're not spending time like figuring out

Nicholas Miller: I got a pretty busy weekend in terms of like I I've got but I'm going to try and like fit in like at least Sunday I'll be I'll be trying to like do um that's why I was kind of hoping today I was like I kind of wanted to like at least have the outline there so then I'm like I'm not like okay what am I doing?

Cody Cork: what to do. You can just Yeah.

Nicholas Miller: Yeah, I will as well apart from Thursday.

Cody Cork: Yeah. Yeah. Um, yeah, I'll be pretty much like on campus most of next week, I think. Um, okay. So, let me just write my s*** down. Um, so I'm just going to say like week seven, week eight like outline. Um, so project one. Did you have notes from a meeting with Matt yesterday?

Nicholas Miller: I had a couple, but that cuz I didn't have a my notepad on me.

00:22:55

Nicholas Miller: Um, what did I what do I put? I put it I put it with the other ones. Um Um, oh yeah. Well, one, and I'm pretty sure you got this, was just when it came to ADR, like making the room dead and then getting authentic responses from client.

Cody Cork: Yeah. Yeah.

Nicholas Miller: How to get authentic responses from clients?

Cody Cork: So, um, yeah.

Nicholas Miller: Is that like the question? Is that like what we should be like, is that like step one? Is that what we should be?

Cody Cork: So, I think, yeah, that's definitely step one cuz I think priority is to get like a question list, but before we can do the list, we kind of need to know how to write the questions, right?

Nicholas Miller: Mhm.

Cody Cork: Um um cuz he did put like a lot of emphasis on being like you guys should look into how to get the best possible answer.

Nicholas Miller: Right. Okay. Cool. Yeah.

Cody Cork: So I'm like yeah um so like question design research.

00:23:51

Nicholas Miller: So step one would be like uh researching how to get the how to get the best answer, how to get better feed feed better feedback from clients.

Cody Cork: Yeah. Um how to get good honest feedback. um quantitative tests uh had put down. He kept saying quantitative tests. I'm trying to figure out what that meant.

Nicholas Miller: Yeah, I know. Yeah. So I'm like wait what quantitative I'm guess what like quantity of test like multiple tests cuz what did he say was um

Cody Cork: Um um Google now.

Nicholas Miller: um what did he say? Uh um like you know we said something and I was I said something and then he was like yeah see like that's step three remember he's we had done step three we need to figure out step um step

Cody Cork: Um, I remember him saying that, but like what was the context?

Nicholas Miller: one yeah dude Harry's in Melbourne, by the way.

Cody Cork: Um, yeah, that's right. He did actually say he was going to be in bed.

00:25:15

Nicholas Miller: I didn't even know this. And I was like, "Wait, what?" And I was like, "Did he just make up him f***** his neck up so he would get out of I know. But

Cody Cork: I I I think the neck thing was maybe like so we didn't have to do a film shoot just before he left, but he was always coming to me. Yeah.

Nicholas Miller: I think that's absolute b***** though. If that's the case, I think that's really dog. Let someone else do your f***** work.

Cody Cork: Yeah. Like he's supposed to be, you know, lead on his project like f*** man.

Nicholas Miller: Yeah, like what if like no one was available?

Cody Cork: Oh yeah.

Nicholas Miller: They would have been screwed. Well, they kind of were screwed for the second day, but I think it is too.

Cody Cork: I I feel like he's going to come back and bite him in the ass a little bit, which is kind of funny cuz I don't know. Like um I think yeah, he's going to get bitten in the ass, but he's still kind of like the best out of like their group in terms of like just doing s***.

00:26:10

Nicholas Miller: Yeah. Yeah. I mean, I feel Yeah.

Cody Cork: Maybe I'm just referencing Dan because I f***** hate that guy.

Nicholas Miller: Yeah. Yeah. I mean, it's I don't know. That group is kind of like and it's Yeah. It's interesting. Um Yeah. Okay. So, step one, researching how to get better responses or better feedback.

Cody Cork: Yeah. How to get how to get good honest feedback. Um and he and he do you remember him saying like as a good example that we should actually probably try and figure out how to do but like a question is like asking like the peer feedback uh is

Nicholas Miller: questions. Oh, the K10.

Cody Cork: so do you remember him saying like we should ask like do a peer feedback uh report or whatever been like how are we approachable blah blah blah then asking the projects that we're working on um about how like

Nicholas Miller: Yeah.

Cody Cork: our team dynamic and does that give confidence in us? Do you know what I mean?

00:27:15

Cody Cork: Like do they feel confident in us based on like our group dynamic?

Nicholas Miller: Yeah. Yeah. Um, were these just questions that he was like throwing out?

Cody Cork: Um yeah, he said that was a good one that he would

Nicholas Miller: I wish I wish he had f***** like noted this down. f***. Hang on one second. Yeah, I wish you had like I mean I was I I should have tried to like write it down, but I was just also just trying to also like absorb what he was saying.

Cody Cork: Yeah, that that's the one thing that's annoying about the cafe meetings is that like it's too noisy to actually get the like AI summary.

Nicholas Miller: Yeah.

Cody Cork: Um but also so apparently quantitative tests uh tests that measure or analyze something using numbers, data or measurable values. So I think what he meant by that cuz he always says quantitative tests definitive statements. So instead of like oh I sometimes feel depressed one out of 10 being like like a lot more definitive and direct or whatever.

00:28:25

Nicholas Miller: Yeah. Yeah.

Cody Cork: Um um I think maybe a better point for like question research is actually just how

Nicholas Miller: So, should we just be like researching like how do creative like should we audio creatives get feedback when working with clients?

Cody Cork: to like psychologically how to get good answers out of people.

Nicholas Miller: Okay. Yeah.

Cody Cork: Do you know what I mean?

Nicholas Miller: So yeah.

Cody Cork: like um in the sense of if we say if we gave someone like us like a a f***** hell long Google form like I just know that I would be like 10 minutes in just being like I just want this to be done blah blah blah but if it's like engaging in a certain way I'd give way better answers.

Nicholas Miller: Yeah. Mhm.

Cody Cork: So just trying to get like how to to get the best possible answers for like our questions.

Nicholas Miller: Yeah, man.

Cody Cork: Um so I don't know if that's like more like psychology or some s*** stuff.

maybe. Um, it's a little too blas like Yeah.

00:29:33

Nicholas Miller: This f***** h this f***** project is like so annoying. I'm like, I don't it is they're kind of leaving it to us to kind of like figure out or I'm like it's we don't have a product.

Cody Cork: like yeah the structured learning because it's also like um

Nicholas Miller: I'm like guys like I'm like we need a little bit more help. like especially when we've just come out like we're not one we don't have a product but two we're also like not dealing with like a structured like you know and all this and it's just like I'm just kind of like what yeah and and Yeah.

Cody Cork: like our feedback is kind of based off like client feedback, right? But they're they're waiting on their feedback. So it's like we're kind of a step behind

Nicholas Miller: And then also it's really annoying because it's like um like he's like I'm going to like you know sit with you like one on one and ask like do you know what? And I'm like if you're talking about this project no I have no f***** clue what you're talk like what about like no I have no clue because I don't even know what I like yeah I do know what I probably should ask like clients but it's I don't know what you want me to like ask the client like you know what I mean?

00:30:48

Nicholas Miller: Like I don't know.

Cody Cork: Yeah. So, I think with that he's basically saying um Oh, f***. Where do we get the H

Nicholas Miller: I'm like cuz I'm just I'm really bad when it comes to like these kind of like projects where it's like if you like if like when it comes to like actually applying like you know like making something and creative outside I'm more than happy to do that. But when it comes to like psychology and all this s***, I'm like, I don't I I suck at that s***.

Cody Cork: yeah, but it's like it's it's not tangible. It's like too theoretical where I'm like I'm getting lost in the source here.

Nicholas Miller: Yeah.

Cody Cork: Um So,

Nicholas Miller: I just want to know what like I'm just like I just wish you would say like

Nick just said to us. It was just like how about you guys? He's like step one, this is what you do. Step two, this is what do step three easy. just do that instead of just being like, "How about it's like don't give it to me? I

00:31:48

Nicholas Miller: don't know what to do." Yeah.

Cody Cork: uh, I'm looking at the the LO's that he would sent us in that other chat. So, it's like demonstrate. Wait, that's week five. Um, where's the f***** thing? Where can we reference like uh the like deliverables like is that on campus online like cuz it's been so yeah blas I I'm not sure where to actually reference right now.

Nicholas Miller: Um, I don't know. I feel like should we just message Matt and just be like, "Hey, we're kind of like we we need to get start we need to get started this. Are you able to like just give us Yeah.

Cody Cork: No, cuz I I feel like he's he's given us the most that he will actually be able to give us. Do you know what I mean? Without actually being like um and his whole stick is like he's trying to uh steer away from like yeah like a rubric and blah blah blah. So, I feel like we've got the most out of him that he's kind of like willing to pass on.

00:33:02

Nicholas Miller: Yeah.

Cody Cork: Um, but basically, I think we just need to like look into how to get good answers out of people. So, like whenever you do feedback, like I'm sure there are like basic things to to do to get good feedback. So, there's that.

Nicholas Miller: Yeah.

Cody Cork: Um while we actually structure like some questions and then find people to get feedback from

Nicholas Miller: All right. So, okay. So, step one is research how to get the how to get this stuff. Step two is write the questions. And step three is ask the questions. Step four is what do we do with is is the is the document with all the information that we've gotten laid out and we got to try and like, you know, analyze it.

Cody Cork: Yeah. Uh, so I don't think Yeah.

Nicholas Miller: Just I'm thinking of that document, you know, the one that he showed.

Cody Cork: Yeah. Cuz we don't have to write like a report.

Nicholas Miller: Yeah.

Cody Cork: We just have to have that like poster thing.

00:34:03

Cody Cork: What do you call it? Um, and then Yeah.

Nicholas Miller: Yeah. Yeah. So like we So step three when we ask the questions and we get the answers we put that into the document into the poster and we and then we explain it. Um and then we and we can also like again we can also like um uh compare slash um you know reference any scholarly stuff that we've found along the way as well with that.

Cody Cork: Yeah. Yeah. And that'll be the R01. Yeah.

Nicholas Miller: Is that pretty is that pretty much like how we're meant to be doing it?

Cody Cork: So, yeah, I'm pretty sure clicks.

Nicholas Miller: Okay, that's literally okay now. I don't know why it just like just kind of like clicked just then. I was like cuz it cuz it didn't like I didn't have anywhere stating like in writing like that's kind of like how you do it.

Cody Cork: Yeah.

Nicholas Miller: I was like what I was like what is going on?

Cody Cork: Yeah.

00:34:57

Cody Cork: Yeah. Um so um yeah.

Nicholas Miller: Okay. So maybe this weekend like we can focus on like researching and then on Monday we can we can we can look at like maybe like formulating the questions and then hopefully sending them off maybe that night.

Cody Cork: So yeah, definitely like uh one after the other, but I feel like we got to we're on a pretty like aggressive timeline.

Nicholas Miller: Yeah.

Cody Cork: Um, so I was going to make a post um in like the the uni slack and s***.

Nicholas Miller: Mhm.

Cody Cork: Hang on, let me get it up cuz tell me if this is like a little too stupid. Oh, yeah. Yeah. Okay. So, yeah, tell me if this is a little too stupid. Um, actually, I'll paste I'll send it so you can read it as well. Wait, can you I'll just send it in the chat. Just f***** the text. Um, so yeah, I was going to say the in call messages or whatever.

Nicholas Miller: Uh yeah, give me one second.

00:36:24

Nicholas Miller: And so I'm just quickly writing it down using create post.

Cody Cork: Are you writing the outline?

Nicholas Miller: I'm just Yeah, I'm just writing like what we're what we've been talking about. Yeah. Create a post and explain.

Cody Cork: Yeah. Actually, can we Yeah. go through it again so quick.

Nicholas Miller: So it was like step one re researching how to get better feedback from clients brackets how to get good answers out of people like and so research like psychology um practical yeah practical um I don't know case studies

Cody Cork: Yeah. Like question design s***. H. Yeah, cuz

Nicholas Miller: practical tests yeah case studies yada yada um write quest and then step two is write questions So, that'll be a group thing that we got to we'll pull all our information together and we'll and um I think we need like I think we need like half a day to a day because we're on a tight we're on a tight schedule. I think we that could be done over like a couple days.

00:37:27

Nicholas Miller: I think we need to like all meet up on like Monday. Maybe s*** Riley can't. Maybe not. Well, or maybe Sunday night or something like that. I don't know. We need to like meet up. I would prefer it on Mondays and then like we've got like we're in person and we can kind of like do it like you know he's going

Cody Cork: Yeah. So, I know that uh so I was chatting with him heaps yesterday. So, I think Riley's pretty much um out until the end of the weekend cuz he's got both his projects due Sunday and he's going to Rottest or some s***.

Nicholas Miller: to Yeah. Yeah.

Cody Cork: Um but yeah, so next week uh I'm just leaving myself free all day every day. So whatever works best for everyone. We should lock it in. Yeah,

Nicholas Miller: Right question, right questions using uh using findings from findings from research. Um and then uh step three, ask questions and receive that. That's pretty much that's probably the easiest part is to actually just ask the questions.

00:38:37

Cody Cork: I'm even thinking um like with certain like industry people just send the like contact the outreach message like ASAP because even as we're like structuring the questions say next week they might not get back to us till like

Nicholas Miller: Yeah.

Cody Cork: next week Thursday or some s***.

Nicholas Miller: Yeah. Well, okay. um to re is that the is that what you just sent in the chat? So I need I need to have a look at it.

Cody Cork: So, in the chat is what I was going to post in in the essay slack. So, it's going to like, hey guys, serious question.

Nicholas Miller: Yeah.

Cody Cork: Would you rather kick a ball or kick back and relax? Like, neither. That's what we said. to instead help us kick a goal specifically specifically an aggressive two week mix and master project stretch goal whatever um and then said I don't know if this is too spicy but I was like and unofficially the only

Nicholas Miller: Yeah.

Cody Cork: unpaid I was going to say slave labor but it's like the only unpaid labor Yeah.

00:39:39

Nicholas Miller: No, leave the slave labor out. Otherwise, it won't be that. Wait, what?

Cody Cork: Yeah. was like the offic unofficially the only unpaid labor 10 out of 10 lecturers recommend. Um and then I was gonna say if you got like Yeah.

Nicholas Miller: Oh, this the music.

Cody Cork: Yeah.

Nicholas Miller: Yeah. Okay, cool.

Cody Cork: Um and basically yeah if you got a demo lying around blah blah let us whatever. Um so that was the initial message like idea.

Nicholas Miller: Yeah.

Cody Cork: Uh, I just don't know if that's kind of just a little too stupid or Okay, cool.

Nicholas Miller: Um I mean I think it's fine. Yeah. Yeah. I reckon um hang on.

Cody Cork: Cuz Yeah.

Nicholas Miller: Music's got Yeah, I reckon do that. Should we just like come up with a um quick outreach like little thing to like send to people?

Cody Cork: Like a little template.

Nicholas Miller: Yeah. Should we do that like right now?

Cody Cork: Yeah. Yeah.

00:40:39

Cody Cork: Yeah.

Nicholas Miller: I might even like I might even just use AI as well just to kind of like speed up the Yeah.

Cody Cork: Yeah. Yeah. Yeah. Yeah. Because I don't even know what's the best way to structure that outreach template.

Nicholas Miller: I'm just going to go in Gemini because he's track GBT way too much. Um, and now I now now because at first I was like, "Oh yeah, let's use notebook." And then I was kind of like, "Wait, what are we using it for?" Now I'm like, "Oh, okay. Actually, yeah, if we like all link in to a notebook LM project and we start getting all the findings and everything for the question ask, we've got when we meet up to like ask to to formulate the question, we've

Cody Cork: Yeah. Write the questions.

Nicholas Miller: got so much to work with.

Cody Cork: Yeah. Yeah. Um

Nicholas Miller: me an outreach message to send to industry. Um what um regarding regarding what question? Oh, wait.

00:41:48

Nicholas Miller: Hang on. Are we asking them what questions we should ask?

Cody Cork: H no no no no no.

Nicholas Miller: Are we asking them what questions we should ask? Oh, no. Not yet.

Cody Cork: So so basically say in a in a perfect world we've got like uh crazy industry contacts right and then uh like our peers and then um whatever. So it has to be feedback on like the stuff or whatever like relevant stuff.

Nicholas Miller: Oh, we've got to get the questions.

Cody Cork: So cuz we don't actually have a lot of like tangible assets yet cuz the groups are kind of we're waiting on them.

Nicholas Miller: Yeah. Yeah.

Cody Cork: Um I think the questions need to be informed for like navigating like those projects or whatever. So for for example like the games ones I'd be like something to do with wise like like thinking about questions for wise because I feel like that's going

to be the most friction point is

Nicholas Miller: Yeah. Wait, I I thought, wait, aren't are we not sending the stuff to the Oh, wait.

00:42:57

Nicholas Miller: No, we're not sending this stuff to the these like the professionals and everything because um Okay, so let let me just get this straight. When we're asking the questions, are we we're asking are we asking for feedback on like a certain like artifact or are we asking or are we asking that?

Cody Cork: ideally. Yeah. But like I don't think we have but that's Yeah.

Nicholas Miller: Yeah, we don't really have much to show though.

Cody Cork: So that's the problem, right? So, I'm thinking if we can get if we can't if we can't get uh feedback from like an actual artifact because we we don't have that yet.

Um is kind of like cool, how do we get ahead of the curve then? Cuz it's like if we can't do this thing, how do we still Yeah.

Nicholas Miller: Oh, did Yeah. Did Matt say something about like, "Oh, if you don't have anything to show, we've got to try and find a different way of like doing it, right?"

Cody Cork: Yeah. So then something like that I think um cuz that's when he mentioned the like doing the peer review where it's like okay if you don't have any assets then then like what else could you do and it's like

00:43:55

Nicholas Miller: Is that what he said? Yeah.

Cody Cork: okay you could do like a peer group review where we actually ask all the capstone current capstone students like cool like uh are we what were the questions like are we approachable people do they know that we're actually

Nicholas Miller: Yeah. Yeah.

Cody Cork: open for like hire or whatever blah blah blah.

Nicholas Miller: What I want to know though is like because I would like like Matt said it would be really good for us to get like you know outside input and I agree but it's like what can we get outside input for if we don't have an artifact to show for the peers we can do that sure but like you know but like for us it's like um

Cody Cork: Yeah. Um yeah. So I think if you think of it in this frame right where what's the point of the feedback it's like it's to iterate and then kind of show that you can kind

of take um uh constructive criticism and

Nicholas Miller: Mhm.

Cody Cork: then build upon that.

00:45:05

Cody Cork: Right? So if you don't have anything to begin with, then we can kind of get feedback maybe on the process where it's like say we get an interview with like Mick Gordon or some s*** and we go, "Hey, here are the like three ideas that we've got, but these are based off like one reference and no visual cues. So we don't know if it actually fits. We can't even tell you whether it fits. So how could we have gone about this project differently coming from like his perspective?

Nicholas Miller: Yeah, good idea.

Cody Cork: Does that make sense like projects?

Nicholas Miller: Right. Yeah, I'm just quickly I'm just writing into thing. I'm writing outreach message regarding um s***. Sorry, mine just went blank again. um regarding pro regarding um their processes.

Cody Cork: Yeah. processes or like how could we do this differently? Blah blah blah.

Nicholas Miller: Yeah, their process is um tackling pro um projects um um with limit with limited um I'll just say tackling projects for now.

00:46:22

Nicholas Miller: We can add on to it. I'm not sure if this Sorry.

Cody Cork: Yeah, I think this this is going to summarize stuff as well. So yeah.

Nicholas Miller: Yeah. Yeah.

Cody Cork: Um, yeah.

Nicholas Miller: Hi.

Cody Cork: What was I also you got to remember that um in Notebook LM they've got

Nicholas Miller: It It just It just made one. It was like, "Hi." Uh, actually, I'll just I'll just copy it and put it in the thing. There you go. Um yeah,

Cody Cork: like the explainer thing. So, if we can get some kind of project um brief, we can chuck it in there. Be like, cool. But this project brief, how do we use these sources to get this?

Nicholas Miller: we can also ask them you can literally ask notebook Helen to formulate questions that literally that are literally related and call back to the sources

that we get.

Cody Cork: Oh, really? f*** yeah.

Nicholas Miller: Yeah. Yeah. That's pretty. So, a Okay, I hate to say it, but like my MUB all the questions are f***** are just the uh are from Notebook LM and they and it's like um yeah, I just kind of made it a little

00:47:30

Cody Cork: Yeah.

Nicholas Miller: bit more it Yeah, it's it should be fine. Yeah. Are you reading the thing? Because I'm reading it now.

Cody Cork: Uh, what is it?

Nicholas Miller: the I sent it in the message.

Cody Cork: Oh, yeah. Yeah. Yeah.

Nicholas Miller: I hope this is just what it said to me.

Cody Cork: as well. So, I think this would be good. Maybe a little too formal for like an E. Um cuz even like uh like make it a bit more casual and charismatic or some s***.

Nicholas Miller: That's what I'm thinking as well. Yeah. Can you make I'll be like, can you make it a little bit less Yeah. Can you make this?

Cody Cork: Um because I did have written down that I maybe have one industry source for um location sound, but I've done literally no location sound for the project.

Nicholas Miller: Oh, yeah.

Cody Cork: So, I might have to get like I'm happy to be the um initial contact, but like I would have to get info into like what questions to ask um for that.

00:48:40

Nicholas Miller: Right. Yeah. Also, Jeff's a good resource.

Cody Cork: Who's Jeff?

Nicholas Miller: Jeff, he does the location sound here as well. Worked with like ABC and stuff.

Cody Cork: Oh, really? Jeff?

Nicholas Miller: Yeah.

Cody Cork: I don't um Gav.

Nicholas Miller: Who's your Who's your contact?

Cody Cork: It's like Gav Soundo on Instagram. Um there's like a friend cringe.

Nicholas Miller: Sorry, I'm just looking at I'm sorry, I'm just looking at this. I was like, can you make it more casual? It's like, hope you're having a good week. Um, it was like I'm It's like currently I'm trying to level up my understanding.

Cody Cork: Oh my god.

Nicholas Miller: Yeah. What the f***? I'm like, less cringe, please.

Cody Cork: Um, also the guy's name's Gav Rep. He's changed his Instagram.

Gavreppton.audio film and TVC and Doco Western Australia. Sound West Australia.

Nicholas Miller: Yeah. Nice.

Cody Cork: Um, but like cuz I've already I made a like a cold call to him ages ago like before I even started like film audio and he was like look man I can't really say anything cuz you haven't even done like that unit yet.

00:50:07

Cody Cork: It's like um so I don't want to like reach out to him if I don't actually have proper questions for that yet though.

Nicholas Miller: Yeah, this one's kind of good. It said it was like I am currently studying the crucial early age the crucial early age sorry early stage project scoping process. If you have a moment, I would be grateful if you could share one key insight or principle your team or a couple we could say like a couple key insight couple sites or principles you or your team rely on when structuring new projects. How to prioritize features or mitigate early risks. I mean that's a little bit too like eh, but I mean we can kind of like I think that's a really good paragraph right there.

Cody Cork: Yeah. Yeah. Can you share that actually?

Nicholas Miller: Yeah. Yeah. Yeah, I'll send the whole Do we send the whole thing or just the Just that bit?

Cody Cork: Um uh just the the one that was good. Um um so for the music stretch goals, did you still want to jump in on

00:51:05

Nicholas Miller: Yeah, I'll send this. Yeah, I'll just do this one.

Cody Cork: that in the sense of like say uh like three people hit us up and then we got three tracks to mix or say we just go like Yeah.

Nicholas Miller: Yeah. Yeah. I Yeah. Yeah. It should be It should be good. Um I'm going to probably message Matt, see if I can like get to like record him uh do the Zoom like

for my for my project. I want to maybe do that on Monday if I can at some point. um because I've realized I've got to edit that and then also like do the documentation for that. So yeah, uh end of next week, but I will probably put another like I'll probably put another special consideration because I've got the SAT thing.

Cody Cork: When's that J? Yeah. Yeah.

Nicholas Miller: Yeah. So that should be fine. But uh for but definitely for the music thing I I'd like to do it together actually.

00:52:17

Nicholas Miller: Like maybe see if we can do it like in here.

Cody Cork: Cuz cuz the idea that I have in my head is like say like two or three songs should be fine, right? Cuz like you wouldn't take a whole day to mix and master a song.

Nicholas Miller: Yeah.

Cody Cork: You'd be like you want to make it quick, right?

Nicholas Miller: Yeah. Yeah. Yeah. I think um Yeah. if I think it would be good to like do that like together as well like you know like um especially since I haven't like mixed music in like a like properly like mixed like music in like a while

Cody Cork: Yeah, for sure.

Nicholas Miller: I would kind of like to do it with someone I feel I'd probably get better at it maybe also I'd be down to also if you're going to be doing Eron's thing like uh on campus or something I'd

Cody Cork: So okay. So for that um yeah, f*** yeah.

Nicholas Miller: be keen to like come in for that. Yeah, cuz I mean until I've got this asset list.

00:53:08

Cody Cork: Um yeah.

Nicholas Miller: Well, I mean I want to start drafting the asset list. Like I think I'm going to start drafting it next week. Um actually, that's another thing that's put down. Um draft asset list for next week cuz um yeah, while I wait for that, um I'd like to at least feel like I'm doing something, you know?

Cody Cork: Um yeah. So, um, cuz basically like our pipeline at this point is next week, like outside of the project one stuff, we basically just got to be working on the um, audio book.

Nicholas Miller: H. Yeah, we're gonna have push it.

Cody Cork: And then, yeah, basically trying to like help push along the game stuff by doing like the asset list.

Nicholas Miller: Yeah. And like we'll see what we get back from I reckon send that thing that music thing into the Slack thing tonight. We'll send the outreach stuff to people tonight. Um, I've got s*** I've got like an hour left in Yeah.

Cody Cork: See, I'm thinking, wait, what day is it today?

00:54:18

Cody Cork: Cuz it's Friday. Um, I'm thinking the outreach stuff, maybe leave it till early next week cuz it's like the start of the work week. like if you get this in your inbox, um like you wouldn't be really kind of be keen on it.

Nicholas Miller: Yeah. Yeah. Yeah. Mhm.

Cody Cork: Um well, I wouldn't anyway cuz I'm like, "Bro, it's Friday. f***

Nicholas Miller: Mhm.

Cody Cork: off." Um

Nicholas Miller: Yeah.

Cody Cork: you know what I mean? Where it's like Monday it's like h it's I don't even have like a work priority list yet.

Nicholas Miller: Yeah. Yeah. Yeah.

Cody Cork: I'll chuck you on there. Um, so I I can push that back till Monday at at the uh earliest and that'll give us more time to at least like uh fine-tune start questions.

Nicholas Miller: Yeah. Well, that's why Yeah. That's why I feel like Monday I feel like Monday should be like a really like and this is why I think maybe before we can even do it right now like just quickly let's just make like a to-do list for Monday like regardless regardless if Riley it can make it or not.

00:55:14

Cody Cork: Yeah. Yeah. Yeah. f*** yeah.

Nicholas Miller: I think like to even I think it's just like really important that on Monday that we like we we yeah we like hit the ground running.

Cody Cork: kick things off. Yeah.

Nicholas Miller: So that's why I mean like um yeah set make a to-do list of like everything instead of us being like okay what are we going to do? How we think of

this? It's like okay agenda one it mean we got to we got to get this outreach message done. All right hands on decks let's do that or or or it's like or it's like yeah Riley you start on that one. Um uh now maybe me and Cody will start uh doing uh like the research part of that or something. Do you know what I mean?

Cody Cork: Yeah. Yeah.

Nicholas Miller: Yeah, I think honestly having I work a lot better when I've got when I can tick things off trying to do the

Cody Cork: Um, yeah, 100%. I think Yeah, for sure.

00:56:06

Cody Cork: Um, and like it'd be better off to do it like now instead of like spending time on Monday to actually do that.

Nicholas Miller: two.

Cody Cork: Yeah. Yeah.

Nicholas Miller: Yeah.

Cody Cork: Yeah.

Nicholas Miller: Yeah. I think it's like I think and I think maybe we should maybe get into the habit of doing that from now on like on a Friday.

Cody Cork: Yeah.

Nicholas Miller: like like really quickly.

Cody Cork: 100%. cuz um I actually put it in like a a habits thing that I'm trying to like consistently do like to do like a week weekly wrap up. So like one like near the end of the week just one day like cool wrap everything up and then basically outline the next week cuz yeah I feel like you know how like each Monday is like a fresh

Nicholas Miller: Yeah. Yeah. I'm g start doing that. Yeah. I'm going start doing that.

Cody Cork: start of the week. I feel like half of that is literally just being like, "But wait, where am I? Like,

00:56:57

Cody Cork: what the f*** am I doing?" Yeah,

Nicholas Miller: Yeah, you kind of like don't really kick things off until like Wednesday, you know, and that's something that like I've I've struggled with.

Cody Cork: literally.

Nicholas Miller: And I also was like last night realizing I was like, you know what? I

need to start Yeah. start dumping my thoughts and start putting everything onto paper and everything and you know, just like Yeah.

Cody Cork: Yeah, cuz Yeah, cuz I think what I'm going to do like at least till the end of this um is like basically outline it s*** in um linear and stuff for projects um

Nicholas Miller: Yeah. One second. Yeah.

Cody Cork: Yeah, basically use linear like how we've been using it, but then actually just like yeah on the let's say Friday wrap up just actually like write it down in a notebook like cool.

Nicholas Miller: Wait.

Cody Cork: So then on Monday I don't even need to open s*** up. I've got it written it written down.

Nicholas Miller: Yeah.

Cody Cork: Um, it is Friday.

Nicholas Miller: All right.

00:58:05

Nicholas Miller: Shall we do that to start a new to-do list? God, I've got I've got so many tabs on f***** obsidian. do this and I'll just go, what's the date on Monday?

Cody Cork: Um, it'll be the 27th.

Nicholas Miller: 27th. 27th of the 10th. Ah, for f***** sake. To do this. 27th of the 10th. 2024. All right. And And let me forat.

Cody Cork: cool. Um Um that's actually a good chat.

Nicholas Miller: Oh, wait. Hang on. Should we be doing this on a shared document?

Cody Cork: Yeah, probably that probably something we can all reference. Um cuz what were you writing it in?

Nicholas Miller: Yeah. Oh, wait. What about What about linear?

Cody Cork: Yeah, that's what I was saying before. Um cuz Yeah.

Nicholas Miller: Yeah, we'll we'll do it on linear. Hang on. Reload. Oh s***. Got a network error. I Yeah, cuz I'd rather I I like to like I'd rather not like have everything I've got like stuff I got to check in like different spots.

00:59:26

Nicholas Miller: If it's all in one spot, it's kind of good. Should do we have another pro maybe if there's should we just make like Have we got another audience test?

Cody Cork: Um cuz cuz Yeah.

Nicholas Miller: We can put it in audience test.

Cody Cork: So cuz so I was thinking um have you worked with the linear initiatives at all?

Nicholas Miller: No. H. Yeah.

Cody Cork: Okay. So to like super simplify it's basically if you think of like like a goal. So or like a larger thing than a project. So like projects got all the issues which are like tasks right initiative is like something that is relative to multiple projects.

Nicholas Miller: to the whole company.

Cody Cork: So I was thinking of making like the um AUD not AUD the capstone 330 project like as an initiative.

Nicholas Miller: Yeah. Yeah. Yeah.

Cody Cork: So then you can have like the audience test in there and then we could literally just make a new project for like the next week or two weeks while we push um for the audience test actually that might

01:00:38

Nicholas Miller: What? Whatever is easiest to to access, I reckon. Um, yeah.

Cody Cork: be a bit too much to do right now. Um maybe just yeah chuck it in the audience test because it is the audience test I guess.

Nicholas Miller: Um, yeah. Um, yeah.

Cody Cork: Um, oh, so that was um I went through, this was week one.

Nicholas Miller: This weekly checklist items on the

Cody Cork: I went through the campus online and dumped all of the like there was a full list like checklist of everything you do week by week and I just copied it into linear.

Nicholas Miller: I've not even I was like I don't I haven't even checked like the campus online for 330. Where should I write this?

Cody Cork: I don't know if it's H. What do you say, sir? Yeah, I did it week one and was like, that seems useful. Dumped it all in there and I haven't opened up campus online since. So, what are you what are you writing?

Nicholas Miller: I'm trying to like where should I where should we start doing this to-do list like on the audience test?

01:01:48

Nicholas Miller: Like what I don't think it should be an issue. Should it just be an update or should I make like another like a linear document called to-do list and then we that's where we put all our to-do list for now until we figure out a better way of

Cody Cork: Um Yeah.

Nicholas Miller: doing it in linear but because then you can keep because then what can happen is when the week after that rolls through if there is an item on the to-do list that we haven't finished or something we can

Cody Cork: Yeah. Cuz Yeah.

Nicholas Miller: just reference that we need it needs to be a place where it needs to be it can't be like a separate it can't be separate yeah it needs to be more central because we need to be able to

Cody Cork: Yeah, that's actually that's a good shout like centralized.

Nicholas Miller: like easily go back and like see like what's outstanding all right to to list it's going to be really bare bones so like forgive me if it's not if it's not going to look that great um yeah checklist

01:02:32

Cody Cork: Yeah. Yeah. Yeah. That's good s***. Yeah, that's true.

Nicholas Miller: all And I am

Cody Cork: I might move these weekly checklists to oh maybe like have a look after you write the the to-do list cuz I don't know if these are relevant or not cuz it's got like uh individual test artifact presentations individ present your artifacts for feedback blah blah like yeah Like, yeah, cuz I might move these out so then it's not cluttering s*** cuz I'm already getting like

Nicholas Miller: 27th of the 10th. 2021.

Cody Cork: Okay, I'm just going to cancel the rest of the weekly checklist stuff so it can still be there if we do need

Nicholas Miller: Okay. Uh let's so for the first one um the to-do list. Yeah. Um uh complete outreach message to send to industry pro.

Cody Cork: Uh, is it weekly planner? The one you're doing?

Nicholas Miller: Yeah, I we can change we can change it to a different name if you want.

Cody Cork: Oh, yeah. Yeah.

01:04:06

Cody Cork: So, yeah.

Nicholas Miller: I don't I don't mind. I just put weekly planner because I was like I don't know feel like to-do list is like Yeah.

Cody Cork: Yeah.

Nicholas Miller: Um complete outreach message to send to uh to send send to industry professionals. Um, oh, so yeah, which I'm going to put in brackets I'm going to put in brackets um one member as in like that's one member's responsibility to do I reckon or we can we can all do it but

Cody Cork: Yeah. Yeah.

Nicholas Miller: we might save time if one if like one of us is doing it and then we can um find industry professionals.

Cody Cork: Yeah.

Nicholas Miller: Now obviously Iris reckon like should we make like a limit of like how many we should send out.

Cody Cork: nah. Um, oh f***. Cuz I I get in the sense of like you don't want say everyone comes back like yeah sure let's do it and then it's like oh actually I don't have that much time. That would that would be kind of embarrassing, but I'm just Yeah, cuz I might write a little

01:05:13

Nicholas Miller: Yeah. I'll just say find it. We'll we'll know like we'll kind of like know when we like talk. It doesn't we don't have to like put it set in stone right now. Well, I just put two two or three members for that because um yeah, that might be good.

Cody Cork: um Oh, was I f*** lost my train of thought. Um going, keep going. Yeah.

Nicholas Miller: Yeah. Um uh actually let sorry let me make this a little bit even project one. Is any way I can how can I make this under the tab of project one? You know how you can kind of like it does that kind of like collapse thing.

Cody Cork: Oh, so if you make it a title.

Nicholas Miller: Oh, wait.

Cody Cork: So now so if you select this and then um or if you make it a title for example um with like # space and it's if you see the three dots you can go make

Nicholas Miller: Is that how I do it? Hang on.

01:06:12

Nicholas Miller: Complete. No. Oh, yeah. Oh, yeah. Cool.

Cody Cork: it collapsible.

Nicholas Miller: Uh, okay. Yeah. I Hang on. I'll wait. Hold up. I'll fix. Does that have to be a title or just a heading?

Cody Cork: just a heading. So any of the headings do it. If you want like a piece of text to do it, then you can select just a normal piece of text and go make it collapsible.

Nicholas Miller: Yeah.

Cody Cork: But I don't think you can have something collapsible inside of something collapsible. You know what I mean? It's only one level.

Nicholas Miller: Yeah. No, that's all good. I just need to put this like this in there. I don't know how to do it. You know what I mean?

Cody Cork: Wait, what? Say it again. So have the that first one or have Oh.

Nicholas Miller: Yeah. I kind of want to put them collapsible like inside the pro inside the project.

01:07:16

Cody Cork: Um.

Nicholas Miller: It you know it actually we really don't we don't need to do that. I don't know why that's that's my that's my like ADHD like formatting thing coming in. Yeah.

Cody Cork: Um. Yeah. You talking about like this?

Nicholas Miller: Yeah. Yeah. Yeah.

Cody Cork: Yeah.

Nicholas Miller: Like that. Because I was like I was like this one can be and was able to say fine industry professionals um dump. Oh um uh collect scholarly um articles. You know what? It probably would have been better to do the date as the collapsible and then putting the project and all that inside of it because then when we do another one, it's just collapsible. So, you said you can't put a heading inside a heading. It's all right. I'll fix I'll Yeah. Collect SCY. Um Oh, collect research. collect research rearch to what did I say on my thing? I said or how to get better feedback.

Cody Cork: Um, the research question design.

01:08:33

Nicholas Miller: Yeah.

Cody Cork: Yeah.

Nicholas Miller: collect research on how to get better um feedback and feed feedback feedback feedback from clients. I'll just put brackets um like um like uh five Case Yeah, case studies.

Cody Cork: Okay. Yeah, you had a good red.

Nicholas Miller: Yeah, case studies. Um, scholarly scholarly articles. Um, um, graphs etc. Um and then I'll put in bracket. So I'll say all me like three members because by then the out the outreach message and to the industry will have been finished and you know so

Cody Cork: Yeah. Um, also I'm sending you and Riley the like a link to what is it? link to a notebook LM thing.

Nicholas Miller: yeah sick. Oh yeah, collect from clients and I'll say um upload to notebook LM. Do you want to maybe link that notebook LM into this upload to group notebook?

Cody Cork: Yeah. Yeah. Good. Um,

Nicholas Miller: Um I'm think and then uh You got to write the Yeah. Um using using um using research for

01:11:21

Cody Cork: Okay.

Nicholas Miller: And then step formulate send questions. same questions. And that's it for now. I reckon that's it for um for project one. Like that's like five things that we can do on that's five things that we can really actually smash out on Monday.

Cody Cork: Yeah.

Nicholas Miller: And and then that means that we'll be in step three. We'll just be waiting for the answers. And then hopefully by maybe w I mean I'm hoping but Wednesday Thursday we'll have the information.

Cody Cork: Yeah. Um, yeah.

Nicholas Miller: Wait, what's cuz next week is week seven, right? Yeah. So it's not due until the end of week eight, right?

Cody Cork: Is it the end of week eight or is it week eight Wednesday?

Nicholas Miller: Not too sure. Well, I would. Yeah, I think so because I I know that like my project isn't due until the end of week seven, but and I know this one said week eight. It's due week eight, which means you got week eight to work on it.

01:12:42

Cody Cork: Yeah. But like do you remember technically um like our assessment is the like the oral assessment now.

Nicholas Miller: Oh, wait. We got to Oh, we got Yeah, he will have mar yeah

Cody Cork: So then it'll be the allin class on Wednesday and then he'll basically after everyone talks about their projects or their feedback um uh he'll pull us aside and like actually just discuss it with us. So I think it'll be yeah Wednesday to be honest.

Nicholas Miller: let's just hope that like yeah th by Thursday we've got some responses back from industry professionals and we've gotten it from other which means by Thursday, Friday, especially Friday, we can start um using we can start formulating the um actual document.

Cody Cork: Yeah. Plus, worst case scenario, Matt said he's happy to push us that back a week if we've got stuff.

Nicholas Miller: Yeah. Yeah, of course. Yeah, that's that's good. I just um I'm just going to make another heading say um oops sorry I absolutely hate the big text headings for some reason.

01:13:53

Nicholas Miller: Yeah. Um what's it called? Oh yeah, Erin's um audio book. audio book.

Cody Cork: Oh, also just quickly, so say for audio book, say you wanted to actually um link to the project, if you just type at and then start typing the title. You can actually just link the project

Nicholas Miller: Oh, sick. I'll just I'll just delete my one. There we go. Yeah. And then um what was the Oh, yeah. Music. That's right. Um, yeah, we'll do we'll do music. Hang on. Um, okay. So, the music one. Should we maybe leave the music to like to focus on that one like on Tuesday because we don't really have we don't you still need to send the thing out but with Erin's thing we've actually got like thing

Cody Cork: Um yeah. So with that, um yeah, yeah, yeah.

Nicholas Miller: we've actually got some like we've actually we can actually start working on that on Monday. And then I might also put project title as well like because I um um I would also like to start like doing the um yeah draft draft drafting the asset list getting wise working.

01:15:15

Cody Cork: Um, asset list.

Nicholas Miller: So, what did I do?

Cody Cork: Yeah. Oh, yeah. I still got to go through that. Um, cool.

Nicholas Miller: Where did I go? Hang on. Back. No. Oh, f***. Now that I've linked that, it's f***** make collapsible. Yep. Cool. checklist. Um, I know that we're using this kind we're kind of bypassing the whole project like you know issues thing.

Cody Cork: Yeah. Yeah. Yeah. But I was even thinking Yeah.

Nicholas Miller: I think I but I think for this week this is going to like I think for this week to have this is going to be like really it's just simple like Yeah.

Cody Cork: Yeah. Um Yeah.

Nicholas Miller: Yeah.

Cody Cork: Yeah, cuz even I was even thinking of um like for things that are directly relevant to me, I was actually just going to make the issues anyway. Um cuz we can keep this exactly like it is and then like that'll be like the first point of reference, right?

01:16:31

Nicholas Miller: Yeah.

Cody Cork: Where it's like worst case scenario, you just you just have a to-do list that isn't um confusing as f***.

Nicholas Miller: Well, I think well, I'm going to um I think just for project title, I'll do um uh I'll do wise um troubleshoot, but that's because I'll just get you just to show me. Um and I'll just put H it's all right.

Cody Cork: Oh, you can actually just tag me.

Nicholas Miller: I'll just put you It doesn't matter. I didn't I don't even need to like put our names. I just wanted to put it.

Cody Cork: Yeah.

Nicholas Miller: And then we can we can draft the asset list together, I reckon. Because the thing is I've also got to like think about um uh because like I know I like wrote like the ambient tracks and everything, but the thing is is that some of those track a lot of those are like multiple tracks that are going to be multiple different audio for they're going to be they're going to be different.

Cody Cork: M stems. Yeah.

01:17:37

Nicholas Miller: Yeah. So like the the wind will be a different audio track. The music will be a different audio track. the um the cuz we got to like we've got to also figure we got to also like fiddle around with like all the um attenuation curves and everything.

Cody Cork: Yeah. because Nick did say something about um like dynamic music uh with Wise.

Nicholas Miller: Yeah, we can like look I'll put that down look into damic music.

Cody Cork: So yeah. Yeah. Um I haven't actually seen it yet.

Nicholas Miller: I was actually like listening to something the other day and I was like, "Oh yeah, no, it was Oh, sorry. It was that f***** new thing that Mick Gordon was."

That's I was listening to the music and that I was like I was like I was like that would actually kind of f***** like work. I feel it's kind of like It's very fun toy.

Cody Cork: f*** yeah. Cuz cuz when Doom was still Oh, really?

Nicholas Miller: It's Yeah.

Cody Cork: f*** yeah.

01:18:34

Cody Cork: That' be sick.

Nicholas Miller: And I was like I was like this kind of I was like maybe adapting like Mick Gordon's process with music might actually like come up with some pretty cool ideas. So I might actually put that down. Um into generation. Um and then for the audio book, what do I need to put in for that?

Cody Cork: Uh, actually I can punch in the stuff for that. Um, f***. Where are my goddamn tabs, bro?

Nicholas Miller: cuz I'm I'm thinking like on Mon at least next week we'll just all be closely working together pretty much. So it's like Mhm.

Cody Cork: Yeah. Yeah, for sure. Um, so I'm going to make the document icon red so I can see it. Um, but yeah, just to run through it. Um, so let me get my slack up. Okay. So, she's sent through the actual Ableton project.

Nicholas Miller: Mhm.

Cody Cork: Um, so I'm going to say consolidate Ableton project. Um, so it's usable um for everyone in group cuz she gave me like a list of um things on there that are like, "Oh, this might break that or whatever."

01:20:10

Cody Cork: Um, and she sent through a where is it? F. I hate how Slack looks, bro. I can't f***** find like proper links and s***.

Nicholas Miller: Oh, there's the notebook link. Cool. For some reason, I didn't get it on my email or anything.

Cody Cork: Oh, really?

Nicholas Miller: Oh, it says I'm I'm just going to request as an a I'm going to request editor access.

Cody Cork: Um, I have it literally up as share and I haven't clicked send yet.

Nicholas Miller: Oh, okay.

Cody Cork: Sorry. Sorry.

Nicholas Miller: Well, I just I'll try to click on it through here.

Cody Cork: I just shared it now. Try refresh your page.

Nicholas Miller: Oh, yeah. Sick. Cool.

Cody Cork: Um okay.

Nicholas Miller: honestly like for like when like what's the urg like uh urgency of her because um

Cody Cork: So yeah consider uh sh um Okay. Sorry.

Nicholas Miller: I I think like which if you want and this is how I how I like to do it instead of like making it like a mammoth task you can just be like we'll do this thing today.

01:21:29

Nicholas Miller: Like I know I put a lot in the project title thing, but I know that a lot of that some of that might not get looked at until like the next day or Wednesday.

Cody Cork: Yeah. Yeah. Yeah. Um, so I guess to like explain maybe the logistics for the audio book.

Nicholas Miller: Yeah.

Cody Cork: Um, so it's not going to be like one massive uh project. It's like chapters, I'm pretty sure. Or we have to like uh bounce it into chapters. Um, cuz the deliverable for Audible is to actually be per chapter, not like one big file. So that can be a good way to like maybe structure the process is like do it chapter by chapter.

Nicholas Miller: Right. Mhm.

Cody Cork: Um uh but she I haven't actually looked at it yet, but she sent through the Ableton project.

Nicholas Miller: Yeah.

Cody Cork: She's got a like director's notes and she said that um just be sure to like uh reference the director's notes cuz there's some points where like very specific sounds or very specific things need to be

01:22:22

Nicholas Miller: Yeah.

Cody Cork: in there or done a certain way.

Nicholas Miller: Yeah.

Cody Cork: Um yeah.

Nicholas Miller: So would that mean that um well then we can just do like yeah consolidate yeah consolidate that and then I would say uh we just go through and we start spotting and like going through and we start doing that and then the next day we can start implementing and do or doing all that.

Cody Cork: Yeah. session and notes and directors notes. So create spotting um cuz I sent her a uh the template for the spotting list. So I think she's chucked a lot of stuff in that basically creating a spotting list anyway.

Nicholas Miller: Yeah.

Cody Cork: It's just like specific design prompts in the sense of like um cool rain here but like make it sound like it's in from inside a car or some s***. You know what I mean?

Nicholas Miller: Yeah. Um, I'm going to have to bounce soon. Um, just my booking is almost up and I just kind of want to test this base thing quickly before I go.

01:23:55

Cody Cork: Yeah. Yeah.

Nicholas Miller: But did I don't know if you want to book the control room for Monday or if you want to book another room or or the mastering suite or something, but I couldn't

Cody Cork: Um yeah. Um hang on. Um cuz are you planning to do Monday as well? Like is that was that the plan?

Nicholas Miller: Yeah, I'm I'm definitely coming in on Monday. Like I want to come in

like early on Monday.

Cody Cork: Okay, cool.

Nicholas Miller: Yeah.

Cody Cork: Cool. Cool.

Nicholas Miller: Um, yeah.

Cody Cork: Um, so I'm thinking instead of booking the control room or like a studio from the get-go is like have it maybe a bit staggered cuz sometimes I find like if I have the studio from the start, I end

Nicholas Miller: Yeah.

Cody Cork: up getting distracted by doing studio stuff. Do you know what I where it's like, oh yeah, just Yeah.

Nicholas Miller: Yeah. Yeah. Let's Let's do like from like cuz uh it closes early on Monday.

01:24:50

Nicholas Miller: Let's do it from like one. We can do it from one to like five or something.

Cody Cork: Yeah.

Nicholas Miller: Yeah.

Cody Cork: I'll book it now.

Nicholas Miller: Oh, that's good. I reckon that's that's sick, though. We've got we've got like, you know, 1 2 3 5. We've got roughly like three four uh like nine items that we need to finish on Monday. and spread between the three of us or the two of us. That's like pretty doable.

Cody Cork: Yeah. Yeah. And like there's a bunch of stuff that I still got to like random scattered notes and ideas cuz even like um do you ever worked with Keely Connley the she lectured for like one trimester?

Nicholas Miller: No, I don't think I did.

Cody Cork: Oh, she's dope. But she's um she's super nice f***** and she pretty sure she runs her own studio and all that. So, I'm thinking for the music stuff that might actually be an easy way to actually just shortcut it. Um, but I'll collect all my thoughts for all that s*** um for maybe uh tomorrow or Sunday or some s***.

01:25:58

Nicholas Miller: Yeah. Yeah.

Cody Cork: Um, Yeah.

Nicholas Miller: Yeah. Yeah. Um I might Yeah. I might check in with everyone on Sunday. Um like in like beo and just see where everyone's at, see how we're going. Um, I might even start like research seeing like what I can do beforehand, but the fact that we got the to-do list like means that it's like we can um I I think I think I think it it

Cody Cork: Yeah. Just actually Yeah.

Nicholas Miller: mean I think it's going to be like I think we should do this every time we come. Well, I mean it be Yeah.

Cody Cork: Would you be keen on like a weekly wrap-up then like as a group task?

Nicholas Miller: Yeah. I'd be keen on that. Yeah. And like it doesn't have to be every day like having like a a to-do list every day, you know, but like like a to-do list like on the start of the week, maybe in the m maybe in the

Cody Cork: like or like yeah like or like a weekly agenda.

Nicholas Miller: middle or something.

Cody Cork: So it's like instead of something for every day, it's like oh cool. These are the main things we have to get done this week.

Nicholas Miller: Yeah. like right like this one this one is uh like for Monday specifically but I think we could at the end of like Monday do like a weekly one like in terms of like that on that day we could

Cody Cork: Yeah, actually I might um Cool.

Nicholas Miller: like set up a we could be like okay this is what we need to do because keeping it up in my head is it f***** sucks.

Cody Cork: I might look into that.

Nicholas Miller: All right.

Cody Cork: Yeah, yeah, yeah, yeah.

Nicholas Miller: Yeah, I've got a

Cody Cork: Bounce and do your thing.
