NOTES FOR PETE

The format for this Sound Report is based off one I had to do for another project, if you wanted to pass on any feedback I'd love to hear it, as it all helps refine the template for future work, but no pressure!

Also I've gone through and edited the file names, removing the '00' for the take numbers. I personally find it a little more legible, but if you wanted / needed them back to how it was previously just let me know.

I've also corrected the names for incorrect scenes / shots, and any *Dead* / *False* takes are dumped into the **FALSE TAKES** folder for their respective days.

All ATMOS / FOLEY recordings done on-site are in their own specific folder (inside Shoot Day Audio), and any foley or SFX samples I end up collecting along the way will be dumped into a seperate folder in both my own & the shared drive. Links on the **INFO PAGE**, and here [\(Shared Drive\)](#) | [\(TLSA Drive\)](#)

Scrubbing through audio playback - some recordings are full Mono stacked, whereas others sound like a Stereo split (different mics L & R). Shouldn't affect audio quality or anything, but good to know in case you need seperate Mono & Stereo audio tracks when importing.

PROJECT PROCESSES

These notes apply across the whole of the shooting process, and are the basic ideas & processes of how the TLSA audio team works. Any notes specific to the shoot day will be appended onto that days Sound Report page.

Recorded audio (RAW) is backed up on our end and any **dialogue** is *a/ways* under the assumption of '**non-disclosure.**' Processed Foley & SFX recordings are assumed as free-use unless otherwise specified as per project agreement, or if specific recordings are deemed sensitive, private or something similar. All audio will also be passed on in conjunction to the Data Wrangler / Editing teams specifications.

- All audio recorded using the F8n will be using the audio format 'PolyWAV' - **TLDR:** All inputs are bounced into 1 WAV file.
 - This means that each of the different inputs are recorded separately but bounced into the 1 'stacked' WAV file. Inside Premier Pro / Da Vinci - audio can be dropped down to see the full stack & each of its inputs.
- Recordings will also be utilising 'Dual Channel Recording' - **TLDR:** A backup (lower volume) channel is recorded, for each input.
 - This means that each channel recorded is being recorded again on a seperate channel at roughly -10db. This gives us the flexibility to record the audio 'hotter' (at higher sensitivity) with less of a worry about peaking the

TUESDAY 13TH

SHOOT DAY 01

SHOOT DAY NOTES

- Audio was wrangled onsite. | Audio team also has a backup
 - uploaded to both the **Shared Project Drive** as well as the **TL Studio Drive**
- **Gluten Free** products are strictly for the enlightened

SOUND RECORDER: CODY CORK

SOUND MIXER: CODY CORK

SHOOT DAY 01 - TUESDAY 13TH

SCE.	SHOT	NOTES	T1	T2	T3	T4	T5	T6	T7
2	B	-							
2	C	-			CLEAN	CLEAN		TRAFFIC	TRAFFIC
4	A	-		PLANE					
4	B	-							
16	A	-		TRAFFIC

WEDNESDAY 14TH

SHOOT DAY 02

SHOOT DAY NOTES

- Audio was wrangled onsite. | Audio team also has a backup
 - uploaded to both the **Shared Project Drive** as well as the **TL Studio Drive**
- **FUN FACT:** Apparently chickens kinda sound like someone trying to let off a... *'Silent but Deadly'* 🐔
- Wind(?) in some of the takes - not sure if it's from the Lav (clothes rustling) - but a nice reminder regardless ~ that it's good practise to have the Dead Cat on when filming outside.

SOUND RECORDER: CODY CORK

SOUND MIXER: CODY CORK

SHOOT DAY 02 - WEDNESDAY 14TH

SCE.	SHOT	NOTES	T1	T2	T3	T4	T5	T6	T7
5	A	-	CROWS	CROWS	CROWS	CROWS			
5	B	-		TRAFFIC / WIND		CONSTRUCTION			
5	C	-		TRAFFIC					
5	D	-	CROWS	CROWS	WIND	WIND			
7	A	-							
11	A	-							
11	C	TAIL SLATE							
17	A	-		▶ CAR STALLED					

RECORDING / AUDIO NOTES

- **5A-T1** - Start of recording super low, can hear Slate Click, but not the Scene / Shot number. | Charlottes Lav is a bit low compared to Seths
- **5B-T3** - *Dead Take*: Missed mic Record Arm
- **7A** - A lot of the takes Charlottes mic is picking up her jumping / dancing around (lol) ~ Can be annoying to scrub through
- **11C-T1** - Tail Slate but audio was cut before Slate call
- ▶ **17A-T2** - *Car Stalling sound could be useful!!!* | Lav Mic - some scratching against clothes

THURSDAY 15TH

SHOOT DAY 03

SHOOT DAY NOTES

- Audio was wrangled onsite. | Audio team also has a backup
 - uploaded to both the **Shared Project Drive** as well as the **TL Studio Drive**
- **REMINDER:** Leave room in budget for a Pyrotechnics Expert, cause lighting a Sparkler is hard AF... 🤔
- Charlottes pretty soft spoken - could have run her mic a bit hotter / placed mic better | Seth's dialogue is *bang on*

SOUND RECORDER: CODY CORK

SOUND MIXER: CODY CORK

SHOOT DAY 03 - THURSDAY 15TH

SCE.	SHOT	NOTES	T1	T2	T3	T4	T5	T6
3	A	NO SLATE						
3	B	-						
3	C	-		LOL				
3	D	-						
8	A	-						
8	B	-		ONLY CHICKENS?		LOW GAIN		
13	A.1	TAIL SLATE	MINOR TALKING					
13	A.2	-						
14	B	-	VERB ON VOX?	LIGHT TRAFFIC	DOGS BEST VOX			
14	D	-					TRAFFIC BUG??	
14	E	-	TRAIN	DOG				

RECORDING / AUDIO NOTES

- **3A-T1** - No Slate call
- **13A.1-T1** - *IDEA*: [For audio purposes] Maybe for shots like this, a pause in-between changing rhythm / performance would be beneficial for cleaner audio
- **14D-T3** - *Dead Take*
- **8B** - T2 Has best Chicken Foley (hah) | T4 Most usable audio outside of chickens

FRIDAY 16TH

SHOOT DAY 04

SHOOT DAY NOTES

- Audio was wrangled onsite. | Audio team also has a backup
 - uploaded to both the **Shared Project Drive** as well as the **TL Studio Drive**

SOUND RECORDER: CODY CORK

SOUND MIXER: CODY CORK

SHOOT DAY 04 - FRIDAY 16TH

SCE.	SHOT	NOTES	T1	T2	T3	T4	T5
6	B	-	USABLE			G BIKE SOUNDS	NEIGHBOURS
6	C	-					
6	D	-	LOL				
6	E	-	TRAFFIC	TRAFFIC	BIRDS		
9	A	-	BIRDS				
9	B	-					
10	B	-					
10	C	-					
12	A	-		TRAIN	BEST AU TAKE		
12	B	-					
13	A.5	NO SLATE					

RECORDING / AUDIO NOTES

- **6B** - Some of the takes you can hear people talking in the background (people next door?)
- **9A-T1** - Start of audio missing, but still got Slate Call

POST SHOOT

THOUGHTS & AUDIO NOTES

- When on location, should have recorded some basic sounds of the environment. To save time later, as well as having an easy reference for sound ideas. *Things like:*
 - Footsteps & Flooring - Think the kind of footwear on what surface
 - Fans & Appliances - Totally forgot to do this :(
 - General Ambience / Room Tone - Not always that important, but v. handy in certain situations
- Double check Lav gain & placement - some shots had the Lav showing & Charlotte being so soft spoken needed a bit more push, as well as better attention to detail on placement
- WIND SHIELDS FOR LAVS - SAE should have them, but bring your own - cause they never *actually* do
- **'Dead Cats like to play outside'** - Might not be windy but chuck one on anyway - wind can always become an issue half way through shooting a scene
- Bully SAE to hurry up and invest in some wireless kits - cables suck
