

Work Integrated Learning

Administrative Details

Unit Code & Name: CIM310 Work Integrated Learning

Awards: All SAE Bachelor Degrees

Award Level: AQF 7

Delivery mode: Face to Face, Blended

Course Committee: School of Creative Industries Committee

Duration: 13 Weeks

Prerequisites: CIE152

Core or Elective: Core

Credit Points: 10

Course Outcomes: Course Overviews

Unit Overview

The transition from study to work is an important step for you as an emerging professional in the creative industries. Work Integrated Learning provides you with a professional experience opportunity that both complements and further deepens the skills and knowledge you have gained from study. Throughout your studies you have had to learn on the job (in projects), build strong relationships with people, develop strong communication skills, and use a range of transferable skills. During your work placement you will put this knowledge and skill set into action in a real-world professional workplace. This is a valuable opportunity to gain experience in a professional setting, and further develop your job-readiness. The Work Placement requires a minimum of 80 hours at one or more host organisations. Both the student and the host are required to complete an SAE Agreement that formalises the placement. Work placements can only commence after Stage 1 of your Bachelor course has been completed, and only upon successful completion of CIE152 and approval from the local Industry Learning Partner (ILP). If approved by your ILP, you may undertake a work placement before official enrolment in CIM310, and 'bank' the work placement hours.

The Work Placement Handbook outlines in detail the assessment tasks and obligations of students and hosts. Attendance in this unit also includes a minimum of ten hours of class time for the delivery of unit information and development of documentation. All elements must be successfully completed to the defined standard to receive a Pass.

Unit Learning Outcomes

LO Code	Learning Outcome
CLO1	Demonstrate reflective practice addressing your transferable skills and study/work transition stages
LO1	Apply discipline-specific knowledge and demonstrate an understanding of transferable skills required for employment.
LO2	Demonstrate professional practice and conduct in a workplace setting.
LO3	Self-assess and reflect upon your work placement performance in relation to your program of study.

Student Workload

The learning outcomes in this unit can be achieved in approximately 120 hours over 13 weeks. Learning activities will normally include: face-to-face learning on campus or online, self-paced online learning, research and investigation, practising skills, completing assessment tasks, working with fellow students, self-directed study and transferable skills.

Schedule

This unit will build upon your existing skills, knowledge and behaviours developed in the prerequisite units of Stage 1. In this unit, your ILP and teaching team will encourage you to develop more advanced skills, knowledge and behaviours in relation to:

- portfolio presentation
- transferable skills
- job seeking
- resume writing
- workplace health and safety
- contracts
- company structures.

5 classes will be delivered over the course of the trimester.

Week 1	Facilitator-led session 1	
Week 2	Facilitator-led session 2	Project 1 due
Week 3	Facilitator-led session 3	
Week 4	Host placements	
Week 5	Host placements	
Week 6	Host placements	
Week 7	Host placements	
Week 8	Host placements	
Week 9	Facilitator-led session 4, Host placements	
Week 10	Facilitator-led session 5, Host placements	
Week 11	Host placements	
Week 12	Host placements	Project 2 due
Week 13	Complete host placements	Project 3 due

Work Integrated Learning Assessment

To achieve a **Pass**:

- All placement requirements must be completed, including a minimum of 80 approved hours.
- All projects/assessments must be submitted.
- A host-organisation assessment must confirm your application of transferable skills and discipline-specific knowledge.
- All unit learning outcomes must be met.

Unit Grade: This unit is graded on a **Pass/Fail** basis only. No higher grades are awarded.

- Group Work Agreement

Assessment 1: Portfolio, resume and cover letter

Due	Week 2
Group / Individual Project	Individual
Artificial Intelligence Use	Level 2: possible AI-assisted idea generation and structuring

Overview

You will attend work placement seminars and activities that will help you prepare for your work placement and future employment. Activities will include:

1. Reviewing your current work placement application materials
 - Portfolio: The purpose of a portfolio is primarily to demonstrate the highlights of your academic and creative abilities or skill sets. This collection

of works should be engaging, creative, and professionally presented and will be an essential element in your transition from student to emerging professional.

- **Resume:** A well-structured one-page resume will showcase your skills, document your experience, link to your e-portfolio and provide some information about your goals. Your resume will also include your contact details.
- **Cover letter:** A professional cover letter is tailored to the opportunity you are applying for and should respond to the selection criteria and position description. Your cover letter is an opportunity to showcase your skills, experience and knowledge and how they apply to the position.

2. Participation in the work placement seminars and scheduled classes will also provide you with an overview of the professional and cultural expectations of work placement and an understanding of key legislative issues, namely, Occupational Health & Safety (OHS), discrimination, sexual harassment, etc.

IMPORTANT

You should complete 1 and 2 above before undertaking a work placement, as it supports your understanding of professional, cultural, and legislative responsibilities essential for a safe and successful placement experience.

You are required to dedicate time to researching the industry and suitable host organisations. You can then apply for potential work placement opportunities. Where possible, you should apply directly to the company under the advice of the Industry Learning Partner (ILP). The ILP will assist you if you are unsuccessful in obtaining a position yourself. It is expected, as an emerging professional, that you will make a genuine attempt at finding a placement first.

Steps to follow:

1. **Attend Work Placement Classes**
 1. Participate in preparatory classes (Weeks 1 - 3) and activities.
 2. Engage with sessions on professional and cultural expectations in the workplace, which may include training on Occupational Health & Safety (OHS), discrimination, and sexual harassment.
2. **Prepare Application Materials**
 1. **Portfolio:** Select and compile highlights of your academic and creative work. Ensure presentation is professional, engaging, and relevant to your desired industry. It has to be published online and public-facing.
 2. **Resume:** Develop a concise, one-page resume that includes contact details, skills, experience, goals, and a link to your e-portfolio.
 3. **Cover Letter:** Draft a tailored cover letter responding directly to a

position description/selection criteria, demonstrating transferable and discipline-specific skills.

3. Seek Work Placement Opportunities

1. Research the industry and identify potential host organisations.
2. Apply directly to organisations where possible, using your resume, cover letter, and portfolio.
3. Seek support from your Industry Learning Partner (ILP) only if self-sourced applications are unsuccessful.

4. Gain Approval for Placement

1. Ensure attendance of seminars, classes, and submission of application materials before placement is approved

Deliverables: What to Submit

- Portfolio: Professionally presented web-published showcase of academic/creative works and skill sets.
- Resume: One-page professional document (.pdf) including your skills, experience, goals, contact details, and e-portfolio link.
- Cover Letter: Document (.pdf) tailored to a specific placement opportunity/s with clear response to selection criteria/position description.

Requirements: How your Project will be graded

Assessment Method: Ungraded Pass

Learning Outcome	Requirements
LO1: Apply discipline-specific knowledge and demonstrate an understanding of transferable skills required for employment	• Develop a professional portfolio showcasing academic/creative abilities and skills. • Create a one-page resume highlighting transferable skills, experience, and goals. • Write a tailored cover letter demonstrating the ability to connect skills and knowledge to a specific opportunity.
	• Participate in work placement seminars and activities on workplace expectations and

LO2: Demonstrate professional practice and conduct in a workplace setting	legislation (OHS, discrimination, harassment). • Present application materials (portfolio, resume, cover letter) in a professional and industry-ready format. • Show initiative by researching and applying to suitable host organisations before seeking ILP support.
--	---

Assessment 2: Evidence of Work

Due	End of week 12
Group / Individual Project	Individual
Artificial Intelligence use	Level 1: no AI

Overview

This assessment focuses on the comprehensive documentation of your placement experience through tangible work evidence and verified timesheet records. By creating authentic Evidence of Work documentation, you demonstrate workplace learning and professional development while also providing clear verification of placement completion.

As a stage 3 unit, the assessment consolidates skills developed in earlier study and supports both your professional growth and readiness for future employment. Students are required to have their timesheets recorded weekly by the host organisation, showing no less than 80 hours by the end of placement.

It is the students' responsibility to submit their signed timesheet as part of their 'Evidence of Work' Project

Project Goals: What to Create

The goal of this project is to:

- Demonstrate authentic workplace engagement through tangible evidence of contributions

- Document professional development and skill application in real workplace contexts
- Maintain accurate records of placement hours with appropriate supervisory verification
- Showcase ability to communicate workplace learning effectively
- Provide evidence of problem-solving approaches employed during placement

Steps to follow:

1. Documentation Preparation: Throughout your placement, collect work samples, contribution evidence, and maintain daily timesheet records using the timesheet template provided with supervisory signature
2. Portfolio Compilation: Organise work evidence with reflective commentary explaining relevance to unit learning outcomes
3. Timesheet Verification: Ensure all placement hours are accurately logged with a supervisory verification signature
4. Professional Presentation: Present portfolio materials in a clear, professional format, demonstrating effective communication skills
5. Submission: Submit a complete portfolio and verified timesheet documentation via Campus Online by the end of Week 12

NOTE: In Weeks 9 and 10, dedicated classes will be held for you to meet with your facilitator and receive guidance on your Evidence of Work project.

Deliverables: What to Submit

- Portfolio of Work Evidence: Comprehensive compilation of work samples, contributions, and achievements from placement experience (.pdf)
- Verified Timesheet Documentation: Detailed log of all placement hours with supervisory validation. (.pdf)

Requirements: How your Project will be graded**Assessment Method: Ungraded Pass**

Learning Outcomes	Requirements
CULO1:	• Write reflective commentary on how evidence of work demonstrates transferable skills (e.g.,

Demonstrate reflective practice addressing your transferable skills and study/work transition stages	teamwork, communication, adaptability). • Address how the placement supports transition from study into the workplace. • Use portfolio reflections to show awareness of growth and development.
LO1: Apply discipline-specific knowledge and demonstrate an understanding of transferable skills required for employment	• Showcase work evidence that demonstrates application of discipline-specific knowledge in real tasks. • Highlight transferable skills (e.g., problem-solving, digital literacy, client communication) within the evidence portfolio. • Explain how skills developed in study, were applied in the workplace.
LO2: Demonstrate professional practice and conduct in a workplace setting	• Maintain accurate, signed timesheets documenting no less than 80 hours. • Ensure all evidence reflects adherence to workplace norms (professional communication, ethical practice, reliability). • Present portfolio in a professional format (clear, structured, well-communicated, workplace/discipline specific).
LO3: Self-assess and reflect upon your work placement performance in relation to your program of study	• Provide reflective commentary linked to evidence that evaluates performance during placement. • Critically connect placement experiences with program of study outcomes. • Identify strengths, areas for improvement, and strategies for future growth in professional practice.

Assessment 3: Host Report

Due	Week 13
Group / Individual	Individual

Project	
Artificial Intelligence Use	n/a

Overview

The host supervisor will assess student skills and overall performance.

Your professional work placement behaviour and practices will be assessed by your work placement supervisor using the host assessment document which is aligned to the Transferable Skills Framework.

The host assessment takes into consideration:

- Ability to follow instructions
- Communication skills
- Adherence to the host company's code of conduct
- Display of initiative.

The host will also be asked to highlight areas in which the student excelled, as well as those needing improvement.

The ILP will communicate with the host organisation and collect assessment on the student's behalf. The completed host assessment will be uploaded to Campus Online when complete.

Requirements: How your Project will be graded

Assessment Method: Ungraded Pass

Learning Outcomes	Requirements
LO2: Demonstrate professional practice and conduct in a workplace setting.	Host report: your host will write a report assessing your work placement against their professional code of conduct, such as: punctuality, reliability, following instructions, display of initiative, and clear communication.

Required Readings

SAE Work Placement Handbook

AI Assessment Scale

Level & Category	Description	Application in Creative Industries	Activities
Level 1 - No AI	Students do not use AI tools in their creative process.	Suitable for projects requiring personal expression, original craftsmanship, or the demonstration of foundational creative skills.	Activities: sketching, hand-drawing, analog photography, live performance, in-person critiques.
Level 2- AI-Assisted Idea Generation and Structuring	AI is used for brainstorming and organising ideas, but final creative work must be original and human-authored.	Useful for concept development, mood boards, and initial drafts in design, writing, or multimedia projects, developing effective feedback language.	Activities: collaborative brainstorming, creating project outlines, mood boards, AI-assisted research for inspiration, framing feedback for peers constructively.
Level 3- AI-Assisted Editing	Students use AI for refining, editing, or enhancing their creative outputs.	Beneficial for polishing content such as graphic design, music production, or film editing. AI assists with technical adjustments, but the creative vision remains human-directed.	Activities: correcting grammar/spelling in scripts, adjusting image filters, fine-tuning sound mixing, visual editing.
	AI tools are integrated into	Encourages exploration of AI	Activities: AI-generated visuals

Level 4- AI-Enhanced Creative Task Completion	specific aspects of creative projects, with students critically evaluating AI outputs and integrating them into their work.	as a collaborative partner in tasks like generating visual effects, automating repetitive tasks, or experimenting with generative design.	or music, comparative analysis of AI vs. human work, critical evaluation of AI-generated content, blending AI outputs with human creativity.
Level 5- Full AI Integration	AI is fully integrated throughout the creative process, allowing for deep exploration and innovation.	Suitable for experimental projects where AI plays a central role, pushing boundaries of creativity and exploring new mediums or methods.	Activities: co-creating with AI (e.g., generative art, AI-driven music composition), real-time collaboration with AI tools, iterative feedback loops, AI as a creative tool in producing final projects.
